

## SUBSCRIPTION RATES

Subscription rates (post free) for Volume **31** (1999) of *Advances in Applied Probability* are as follows:

US\$232.50; \$A366.60; £141.00 for libraries and institutions;

US \$77.50; \$A122.20; £47.00 for individuals belonging to a recognised scientific society.

Please send all enquiries to: Applied Probability, School of Mathematics and Statistics, The University, Sheffield S3 7RH, UK.

We can provide back issue prices on application. Cheques, money orders, etc. should be made out to APPLIED PROBABILITY. Payment is accepted in US, UK or Australian currency or by VISA or Mastercard (phone: +44 114 222 3922; fax: +44 114 272 9782).

## NOTES FOR CONTRIBUTORS

Contributors in *Advances* may be of six kinds:

(1) *review papers*; (2) *longer research papers* in applied probability, which may include expository material; (3) *expository papers* on branches of mathematics of interests to probabilists; (4) *papers outlining areas in the biological, physical, social and technological sciences* in which probability models can usefully be developed; (5) *papers in applied probability* presented at conferences which do not publish their proceedings; (6) *letters to the editor* on any appropriate topic in applied probability. In addition, the SGSA section includes contributions relating to stochastic geometry and statistical applications. Letters relating specifically to papers which have appeared in the *Journal of Applied Probability* will continue to be published in that journal.

*Shorter research papers* and *short communications* are published in the *Journal of Applied Probability*. The editors may publish accepted papers in either journal, however, according to the space available, in order to meet publication deadlines.

### Submission of papers

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Papers will not be reprinted without the written permission of the Trust. It is the policy not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Fifty reprints of each paper will be provided free; additional reprints are available at cost.

Papers should be written in English or French; papers in other languages may be accepted by the editors, but will appear (subject to the author's agreement) in English or French translation. Please supply *three* double-spaced hard copies, at least one of which should be printed on one side of the paper only. The paper should include: (1) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results; (2) list of keywords detailing the contents for the purposes of computerised information retrieval; (3) primary and secondary classifications according to the 1991 Mathematics Subject Classification, to be found in the 1990 Annual Index of *Mathematical Reviews*.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained free of charge from the Applied Probability Office. An updated version of the guide, with LATEX style files, can be obtained in electronic form on <http://www.shef.ac.uk/~apt> or on PC-compatible disk from the Applied Probability Office.

For efficiency in processing, authors are requested to send all submissions to the Applied Probability Office in Sheffield, rather than to individual editors. The address for all submissions is:

**Executive Editor, Applied Probability, School of Mathematics and Statistics,  
The University, Sheffield S3 7RH, UK.**

## COPYRIGHT

The copyright of all published papers shall be vested in the Trust. When a paper is accepted for publication, the Trust requests the author(s) to sign a form assigning copyright to the Trust. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Centre (CCC) Transactional Reporting Service, provided that the base fee of \$00.70 per copy, plus 0.20 per page is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0001-8678/99 \$00.70 + 020.

*Stochastic Geometry and Statistical Applications*

- 1 FRANCIS K. C. CHEN AND RICHARD COWAN. Invariant distributions for shapes in sequences of randomly-divided rectangles
- 15 MARTIN B. HANSEN, ADRIAN BADDELEY AND RICHARD D. GILL. First contact distributions for spatial patterns: regularity and estimation
- 34 IRENE HUETER. The convex hull of samples from self-similar distributions
- 48 KIÊN KIÊU AND MARIANNE MORA. Estimating the reduced moments of a random measure
- 63 ROLF SCHNEIDER. A duality for Poisson flats

*General Applied Probability*

- 69 ELKE THÖNNES. Perfect simulation of some point processes for the impatient user
- 88 KLAUS FLEISCHMANN AND VLADIMIR A. VATUTIN. Reduced subcritical Galton–Watson processes in a random environment
- 112 JOSTEIN PAULSEN AND ARNE HOVE. Markov chain Monte Carlo simulation of the distribution of some perpetuities
- 135 JINWOO CHOE AND NESS B. SHROFF. On the supremum distribution of integrated stationary Gaussian process with negative linear drift
- 158 VLADIMIR PITERBARG AND IGOR RYCHLIK. Central limit theorem for wave-functionals of Gaussian processes
- 178 FRANS A. BOSCHUIZEN AND ROBERT P. KERTZ. Smallest-fit selection of random sizes under a sum constraint: weak convergence and moment comparisons
- 199 J. M. C. CLARK AND V. KATSOUROS. Stably coalescent stochastic froths
- 220 MIKAEL ANDERSSON. The asymptotic final size distribution of multitype chain-binomial epidemic processes
- 235 TOMASZ ROLSKI, SABINE SCHLEGEL AND VOLKER SCHMIDT. Asymptotics of palm-stationary buffer content distributions in fluid flow queues
- 254 CHENG-SHANG CHANG, DAVID D. YAO AND TIM ZAJIC. Large deviations, moderate deviations, and queues with long-range dependent input
