

General Notes

TEMPORAL BONE SURGICAL DISSECTION COURSE

OFFERED BY

THE DEPARTMENT OF OTOLARYNGOLOGY

THE UNIVERSITY OF MICHIGAN MEDICAL SCHOOL, ANN ARBOR, MICHIGAN

COURSE DIRECTOR: JOHN L. KEMINK, M.D.

1991: 22–26 April 27–31 May 7–11 October 11–15 November

Intensive one-week courses emphasize the surgical and anatomical approaches to the temporal bone, and are presented in a manner relevant for the otologic surgeon, utilizing lectures, videotapes, and dissection.

Mornings and afternoons are spent in the dissection laboratory, giving extensive drilling experience in temporal bone anatomy and surgical techniques. All instruments and high-speed handpieces will be provided.

Course fee: Physicians \$1,000 Residents \$750

MSc IN OTOLARYNGOLOGY

The University of Glasgow has recently instituted a two-year post-graduate course in Otolaryngology which proceeds to an MSc (Med Sci).

The second course commences in October 1991 and is primarily clinical but includes a dissertation. Candidates are expected to have had at least three years' post-graduate clinical experience. The holding of a P.L.A.B. certificate is desirable but not necessary for admission.

The standard U.K. yearly course fee for overseas graduates will apply. This is currently in the region of £12,210 per year.

Further details from:

Professor G. G. Browning
Department of Otolaryngology
University of Glasgow
Royal Infirmary
Glasgow G4 0SF
United Kingdom

June 14–20, 1992

Hanover, Germany

FIRST INTERNATIONAL SKULL BASE CONGRESS

Organized by Skull Base Societies all over the World

Main Topics:

- Anterior Skull Base Including Paranasal Sinuses
- Sellar and Parasellar Region Including Cavernous Sinus
- Middle Fossa and Infratemporal Fossa Including Orbit and T. M. Joint
- Clivus, Midface and Craniocervical Junction
- Petrous Bone Including Jugular Foramen and CPA
- Reconstruction and Rehabilitation of Skull Base Structures (Skin, Muscle, Bone, Nerves, Vessels)

This congress is aimed at experts on

ANATOMY, PATHOLOGY, NEUROPHYSIOLOGY, NEURORADIOLOGY,
NEUROSURGERY, ENT, MAXILLO-FACIAL,
PLASTIC AND RECONSTRUCTIVE SURGERY, OPHTHALMOLOGY

General scientific sessions, free papers, overview lectures, roundtable discussions, video presentations, workshops and poster sessions form part of the program. Social engagements and business meetings are also scheduled. An interesting and up to date industrial exposition will serve as bridge between industry and science.

THE TWJ FOUNDATION

THE TRUSTEES OF THE TWJ FOUNDATION INVITE APPLICATIONS
for
AN OTOLOGICAL RESEARCH AND CLINICAL FELLOWSHIP
at
THE COLEMAN LABORATORY, SAN FRANCISCO
IN THE UNIVERSITY OF CALIFORNIA
for
SIX MONTHS DURING 1992

The main emphasis will be on research projects in the Coleman Laboratory under the supervision of Professor Michael Merzenich but the holder will also have the opportunity to observe clinical work in the Department of Otolaryngology as the appointment has the approval of both Dr Boles and Dr Dedo.

Applicants must be Fellows of one of the Royal Colleges of Surgeons and a Senior Registrar in Otolaryngology in an appointment recognized for Higher Surgical Training in the United Kingdom or the Republic of Ireland.

Further details concerning applications should be obtained *now* from:

The Trustees of the TWJ Foundation
Courtlands, 61 Kingswood Firs
Grayshott, HINDHEAD
Surrey GU26 6ER

The closing date for formal applications will be
Saturday, 9 March 1991

FONDATION GEORGES PORTMANN

CLINIQUE UNIVERSITAIRE D'OTO-RHINO-LARYNGOLOGIE DE BORDEAUX
32ND ENGLISH COURSE ON MICRO SURGERY IN OTOTOLOGY AND OTONEUROLOGY
1-6 July, 1991

Conducted by Professor Michel Portmann, M.D.

- Participation of Jean-Pierre Bebear, M.D. and Guy Lacher, M.D. (*Bordeaux*)
- with collaboration of A. Richards, N. Shah (*London, UK*) and J. Garro (*Washington D.C., USA*)
- and the collaboration of the Staff of the ENT Department of the University of Bordeaux.

A six-day intensive course including:

- Theoretical and practical lectures: basic principles in otological surgery; pathology of the middle ear; impedance audiometry; various techniques of tympanoplasty; reconstruction of the middle ear; agenesis of the ear; ossiculoplasty; facial nerve surgery; surgery for vertigo; oto-neuro surgery (neurinoma etc.).
- Surgical demonstrations on colour TV.
- Temporal bone dissection (equipment provided to each participant).
- Cases presentations.
- Discussion.

The course will be given in English.

CME credit: 59 hours sponsored by the American Academy of Otolaryngology Head and Neck Surgery.

Fee: FF 5 500.

G. Portmann Foundation members, residents in training (with a letter of certification) will benefit of a 20% discount.

9TH INTERNATIONAL COURSE
IN
FUNCTIONAL CORRECTIVE NASAL SURGERY

9-14 June, 1991

UTRECHT, THE NETHERLANDS

From 9-14 June, 1991 a course in functional corrective nasal surgery will be given at the University of Utrecht, The Netherlands, under the direction of Professor E. H. Huizing. The course will consist of lectures, TV-demonstrations, cadaver dissection and live TV-surgery.

Teacher Board: Professor W. Pirsig (Ulm), Professor S. Hellmich (Dortmund), Professor E. B. Kern (Rochester), Professor G. Rettinger (Erlangen), Dr A. F. van Olphen (Utrecht), Dr J. A. M. de Groot (Utrecht) and the Staff of the Department of ORL of the Utrecht University Hospital.

Instructions to Authors

Historical Articles. Articles of this type are generally encouraged, but it is obvious that they have to provide some new information or interpretation, whether it be about a well-known person or for example an instrument associated with him, but those from within a Hospital's own department who have made a hitherto less well-known contribution would be welcome.

Letters to the Editor. This feature has been re-introduced to give those who wish to comment about a paper previously published within the Journal, an opportunity to express their views. Wherever possible, the original author is asked to add his further comment, thereby adding to the value of the contribution. Such letters should be sent as soon as possible after publication of each month's issue of the Journal in the hope of including them as soon as possible thereafter.

'Mini-papers, such as those which appear in the British Medical Journal, Lancet, or New England Journal of Medicine, will not be acceptable except on the rare occasion that they bring information of immediate interest to the reader.

Pathology. Articles which are of pathological interest with particular emphasis on the way the diagnosis was achieved now appear on a monthly or bi-monthly basis. It is hoped that clinicians will involve their pathologists in these reports, and all illustrations must be of first-class quality. Where a department, particularly those overseas, may not have such specialized facilities, it may be possible, if a block or several unstained sections are provided for our Adviser to produce or supplement the illustration submitted. Only contributions of particular pathological interest will be accepted.

Radiology. Short reports on cases in which the radiology has been crucial in the making of the diagnosis or the management of a particular case now appear on a monthly or bi-monthly basis. This spot is to encourage clinicians and radiologists to produce material of particular interest in the specialty and to encourage co-operation in this field. Only presentations with first-class illustrations can be accepted and these must emphasise a problem of unusual clinical interest.

Short Communications. This feature will be used on an occasional basis. Examples of material suitable for inclusion under this title would be, for example: a piece of work which was of clinical interest but had failed to produce findings which were of statistical significance; where an investigative technique has been applied to an allied field, not warranting a further in-depth description of its earlier application and methodology.

Check List for Authors/Secretaries

1. Title page—Titles should be short with names of the authors, higher degrees only and the city/country. Details of the departments in which the authors work should be put lower down.
An address for correspondence should be supplied together with the author who should receive this and this will ultimately appear beneath the list of references. If the paper was presented at a meeting, the details of this must be given and will be inserted at the bottom of the first page of the printed script.
2. Abstract—No paper will be accepted without this and it adds considerably to the Editor's time to have to write and request this if the paper is accepted.
3. To follow the instructions to Authors with the way in which the paper is set out. It is preferred that each section should start on a fresh page with double spacing and wide margins.
4. References must be in the Harvard system; to submit a paper using the Vancouver system is automatically to have it returned or rejected.
5. Two sets of illustrations must be included, one of half-plate size and the other with the width of 80 mm. Illustrations must be clearly labelled with the author's name on the reverse side and where appropriate with an arrow to give orientation.
6. Authors to check manuscript and references to see that these match up particularly for dates and spelling.
7. Title of Journals must be given in full with the date, volume number and first and *last* pages.
8. Consent to be obtained from a patient if a photograph of their face is to be reproduced.
9. If the author to whom correspondence is to be directed changes his address, he should let the Editorial Office know as soon as possible.
10. Page proofs will normally be sent out three months in advance and must be returned as soon as possible.
11. Authors should provide a Facsimile number (FAX) whenever possible to speed communication. The FAX number of the Editorial office is 071-224 1645.
12. Manuscripts with tables only may be transmitted by FAX; those with graphic or visual illustrations, e.g. graphs, X-rays, pathology, electrical records (ENG, BSER etc) must continue to be sent by post as the quality of reproduction does not give sufficient accuracy of detail.
