

AUTHOR INDEX FOR VOLUME 109

ABRAMOV, V. M.; Conditions for recurrence and transience for time-inhomogeneous birth-and-death processes	393
AHANJIDEH, N.; see ESKANDARI, E.	507
ALI, M. F. and NUREZZAMAN, M.; On certain close-to-convex functions	365
ASGARLI, S. and GHIOCA, D.; Tangent-filling plane curves over finite fields	301
AWTREY, C. and LEE, A.; Galois groups of reciprocal sextic polynomials	37
BALLESTER-BOLINCHES, A., KAMORNIKOV, S. F., PÉREZ-CALABUIG, V. and TYUTYANOV, V. N.; Finite groups with hereditarily G -permutable Schmidt subgroups	522
BARMAN, R., SINGH, G. and SINGH, A.; Divisibility of the partition function $PDO_f(n)$ by powers of 2 and 3	14
BEIKE, N. F., CARLETON, R., COSTANZO, D. G., HEATH, C., LEWIS, M. L., LU, K. and PEARCE, J. D.; Finite solvable tidy groups are determined by Hall subgroups with two primes	342
BHATTACHARJEE, S., DIXIT, A. B. and SAIKIA, D.; An effective bound for generalised Diophantine m -tuples	242
BHOWMIK, B. and PARVEEN, F.; Bounds for functionals defined on a certain class of meromorphic functions	101
BLEILE, Y. B.; Geometric and topological shape analysis: Investigating and summarising the shape of data	168
BOGART, T., O'NEILL, C. and WOODS, K.; When is a numerical semigroup a quotient?	67
BROWN, B., GRIEBEL, M., KUO, F. Y. and SLOAN, I. H.; On the expected uniform error of Brownian motion approximated by the Lévy–Ciesielski construction	581
CARLETON, R.; see BEIKE, N. F.	342
CHEN, J.; see LIANG, Y.-P.	177
CHEN, M. and TANG, M.; Sumsets containing a term of a sequence	420
CHU, W.; see LI, C. L.	225
CHU, W. and KILIÇ, E.; Left and right eigenvectors of a variant of the Sylvester–Kac matrix	316
COSTANZO, D. G.; see BEIKE, N. F.	342
DANH, T. N. T., DUNG, H. T., HUNG, P. V., KIEN, N. D., THINH, N. A., TOAN, K. D. and THO, N. X.; An improvement to a theorem of Leonetti and Luca	437
DEVHARE, S., JOSHI, V. and LAGRANGE, J.; Correction to ‘On the complement of the zero-divisor graph of a partially ordered set’	170
DIXIT, A. B.; see BHATTACHARJEE, S.	242
DIXIT, A. B., KUMAR, V. and PATHAK, S. S.; Linear independence of values of the q -exponential and related functions	453
DOLORFINO, M., MARTIN, L., SLONIM, Z., SUN, Y. and YANG, Y.; On the characterisation of sporadic simple groups by codegrees	57

DU, J. Q. D. and TANG, D.; A conjecture of Merca on congruences modulo powers of 2 for partitions into distinct parts	26
DU, J. Q. D. and TANG, D.; On a conjecture for a refinement of the sum of minimal excludants	276
DUNG, H. T.; see DANH, T. N. T.	437
EL BACHRAOUI, M.; Theorems of Legendre type for overpartitions	265
ESKANDARI, E. and AHANJIDEH, N.; On p -solvability and average character degree in a finite group	507
FANG, J.-H. and SÁNDOR, C.; Additive completion of thin sets	429
FERRARA, M. and TROMBETTI, M.; Locally finite simple groups whose nonnilpotent subgroups are pronormal	512
FUJITA, Y. and LE, M.-H.; A note on the Goormaghtigh equation concerning difference sets	443
GHIOCA, D.; see ASGARLI, S.	301
GHIOCA, D. and YANG, S.; The Mordell–Lang conjecture for semiabelian varieties defined over fields of positive characteristic	254
GRIEBEL, M.; see BROWN, B.	581
HAN, B. B., ZHANG, W. T. and LUO, Y. F.; Finite basis problem for involution monoids of order five	350
HARRINGTON, J., LITMAN, M. and WONG, T. W. H.; Every arithmetic progression contains infinitely many b -Niven numbers	409
HARTE, R.; see MOUTON, S.	388
HEATH, C.; see BEIKE, N. F.	342
HIGGS, R. J.; Hall subgroups and 2-cocycle regularity	51
HIGGS, R. J.; Strict regularity for 2-cocycles of finite groups	45
HUNG, P. V.; see DANH, T. N. T.	437
JIA, X. B.; see MA, S. S.	125
JIANG, Y., WANG, J. and YANG, F.; Arithmeticity of \mathbb{C} -Fuchsian subgroups of some nonarithmetic lattices	77
JOSE, J.; Extraction of density-layered fluid from a porous medium	594
JOSHI, V.; see DEVHARE, S.	170
KAMORNIKOV, S. F.; see BALLESTER-BOLINCHES, A.	522
KANDHIL, N. and LUNIA, R.; Transcendence of generalised Euler–Kronecker constants	464
KHAN, G.; Curvature-torsion entropy for twisted curves under curve shortening flow	571
KHAN, M. A.; see UYANIK, M.	541
KIEN, N. D.; see DANH, T. N. T.	437
KILIÇ, E.; see CHU, W.	316
KISS, S. Z., SÁNDOR, C. and YANG, Q.-H.; On monotone increasing representation functions	196
KIUCHI, I. and TSURUTA, Y.; On sums involving the Euler totient function	486
KUMAR, V.; see DIXIT, A. B.	453
KUO, F. Y.; see BROWN, B.	581

LAGRANGE, J.; see DEVHARE, S.	170
LE, M.-H.; see FUJITA, Y.	443
LEE, A.; see AWTREY, C.	37
LEONETTI, P. and LUCA, F.; On the iterates of the shifted Euler's function	206
LEONETTI, P. and TRINGALI, S.; On the density of sumsets, II	414
LEWIS, M. L.; see BEIKE, N. F.	342
LI, C. L. and CHU, W.; Infinite series concerning harmonic numbers and quintic central binomial coefficients	225
LI, D. and WANG, Q.; A note on normalised ground states for the two-dimensional cubic-quintic nonlinear Schrödinger equation	552
LI, Y.-N.; see LIU, J.-C.	215
LIANG, Y.-P., CHEN, J. and XU, S.-J.; Upper bounds on the semitotal forcing number of graphs	177
LIMANTA, K.; An algebraic interpretation of the super Catalan numbers	498
LITMAN, M.; see HARRINGTON, J.	409
LIU, J.-C. and LI, Y.-N.; On the divisibility of sums of q -super Catalan numbers	215
LU, K.; see BEIKE, N. F.	342
LUCA, F.; see LEONETTI, P.	206
LUNIA, R.; see KANDHIL, N.	464
LUO, Y. F.; see HAN, B. B.	350
MA, B.; Reflexivity index of the product of some topological spaces and lattices	376
MA, L. and MA, Z.; On the number of real zeros of polynomials of even degree	89
MA, S. S. and JIA, X. B.; The growth of solutions of Monge–Ampère equations in half spaces and its application	125
MA, Z.; see MA, L.	89
MAHENTHIRAM, A.; Harmonic-measure distribution functions and related functions for simply connected and multiply connected two-dimensional regions	163
MARTIN, L.; see DOLORFINO, M.	57
MICHAUD-JACOBS, P.; Computing points on bielliptic modular curves over fixed quadratic fields	6
MOUTON, S. and HARTE, R.; The restricted connected hull: filling the hole	388
MUI, J.; Eventual positivity and asymptotic behaviour for higher-order evolution equations	165
NIKNAMI, B.; Stochastic matching models	407
NUREZZAMAN, M.; see ALI, M. F.	365
O'NEILL, C.; see BOGART, T.	67
PANRAKSA, C., SAMART, D. and SRIWONGSA, S.; A dynamical system proof of Niven's theorem and its extensions	138
PARVEEN, F.; see BHOWMIK, B.	101
PATHAK, S. S.; see DIXIT, A. B.	453
PEARCE, J. D.; see BEIKE, N. F.	342
PÉREZ-CALABUIG, V.; see BALLESTER-BOLINCHES, A.	522

RAZA, M., RIAZ, A. and THOMAS, D. K.; The third Hankel determinant for inverse coefficients of convex functions	94
RIAZ, A.; see RAZA, M.	94
ROBINSON, P. L.; Jacobian elliptic functions in signature four	110
RUAN, H.-J. and XIAO, J.-C.; Correction to 'Existence and box dimension of general recurrent fractal interpolation functions'	174
RUNGTANAPIROM, N.; see WANANIYAKUL, S.	288
SAIKIA, D.; see BHATTACHARJEE, S.	242
SAMART, D.; see PANRAKSA, C.	138
SAMBALE, B.; Real blocks with dihedral defect groups revisited	327
SÁNDOR, C.; see FANG, J.-H.	429
SÁNDOR, C.; see KISS, S. Z.	196
SHI, S. S. and ZHOU, Q. L.; On the shortest distance function in continued fractions	186
SHPARLINSKI, I. E.; On quadratic fields generated by polynomials	476
SIMONIČ, A.; New effective results in the theory of the Riemann zeta-function	403
SINGH, A.; see BARMAN, R.	14
SINGH, G.; see BARMAN, R.	14
SLOAN, I. H.; see BROWN, B.	581
SLONIM, Z.; see DOLORFINO, M.	57
SRIWONGSA, S.; see PANRAKSA, C.	138
STEUDING, J.; see WANANIYAKUL, S.	288
SUN, Y.; see DOLORFINO, M.	57
TAN, D. and ZHANG, F.; Min-phase-isometries in strictly convex normed spaces	152
TANAKA, R.; On real nonisomorphic Banach spaces with homeomorphic geometric structure spaces	562
TANG, D.; see DU, J. Q. D.	26
TANG, D.; see DU, J. Q. D.	276
TANG, M.; see CHEN, M.	420
TAYLOR, D. E.; see ZHENG, J.	529
THINH, N. A.; see DANH, T. N. T.	437
THO, N. X.; see DANH, T. N. T.	437
THOMAS, D. K.; see RAZA, M.	94
TOAN, K. D.; see DANH, T. N. T.	437
TRINGALI, S.; see LEONETTI, P.	414
TROMBETTI, M.; see FERRARA, M.	512
TSURUTA, Y.; see KIUCHI, I.	486
TYUTYANOV, V. N.; see BALLESTER-BOLINCHES, A.	522
UYANIK, M. and KHAN, M. A.; On separate continuity and separate convexity: a synthetic treatment for functions and sets	541
WANANIYAKUL, S., STEUDING, J. and RUNGTANAPIROM, N.; Sum of values of the ideal class zeta-function over nontrivial zeros of the Riemann zeta-function	288
WANG, J.; see JIANG, Y.	77

WANG, Q.; see LI, D.	552
WEIß, C.; On the N -point correlation of van der Corput sequences	471
WONG, T. W. H.; see HARRINGTON, J.	409
WOODS, K.; see BOGART, T.	67
