We have bought and sold books since 1855—good and fine books on all manner of subjects. Among our specialities are Science, Natural History, Technology and Medicine.

We publish specialized catalogues throughout the year, which we send on request—but if you would prefer to come and look at our stock, we are open from 9 a.m. to 5 p.m., Monday to Friday.

## BOOKS AND GRAPHICS IN THE HISTORY OF SCIENCE AND TECHNOLOGY

- |        |  |       |
|--------|--|-------|
| No. 10 | GALVANI, Luigi THE EFFECTS OF ELECTRICITY on Muscular Motion, translation and facsimile, folding plates, quarto, 176 pp., 1953 | £3.00 |
| No. 14 | DIBNER, Bern EARLY ELECTRICAL MACHINES, 1957, 57 pp., 48 illustrations   | £1.15 |
| No. 15 | DIBNER, Bern AGRICOLA ON METALS, 1958, 128 pp., 72 illustrations   | £1.35 |
| No. 22 | DIBNER, Bern ALESSANDRO VOLTA and the ELECTRIC BATTERY, 1964, 135 pp., 25 illustrations  | £1.50 |
| No. 24 | DIBNER and DRAKE A LETTER FROM GALILEO, 1967, 57 pp., 16 illustrations   | £1.15 |
| No. 25 | RETI and DIBNER LEONARDO DA VINCI—TECHNOLOGIST, 1969, 96 pp., 63 illustrations   | £1.15 |

## **Scientific Knowledge and Its Social Problems**

JEROME R. RAVETZ

'This book is too good for its argument to be summarized for those too lazy to read it for themselves. It is too rich and profound in detail to survive such discourtesy, and contains no obscurities to be reinterpreted. All that need be said in general is that it is thoughtful, incisive, scholarly, lucid, humane, and sane. Everyone—but everyone—within or concerned about science should read it slowly and carefully.'—JOHN ZIMAN in *Nature*. £5

## **Law and Explanation**

An Essay in the Philosophy of Science

PETER ACHINSTEIN

The author considers those characteristics of laws in virtue of which they express regularities, features that constitute their generality and necessity, the nature of explanation and the kinds of explanations laws supply, and types of reasoning in which the scientist engages when he proposes a law. £2.75

## **A Bibliography of Sir William Petty F.R.S. and of *Observations on the Bills of Mortality* by John Graunt F.R.S.**

SIR GEOFFREY KEYNES

Sir William Petty and Dr John Graunt, two early Fellows of the Royal Society, are remembered as the twin originators of political economy and medico-social statistics. Sir Geoffrey Keynes's *Bibliography* of their works is therefore mainly taken up with annotated descriptions of Petty's books, the product of his extraordinary mental agility ranging over education, economics, statistics, Irish cartography, scientific inventions, and double-bottom boats. 12 plates. 11 facsimiles of title pages £5.50

## **The Philosophies of Science**

An Introductory Survey

H. R. HARRÉ

This book shows how various views about the nature of science are related to the great historical schools of philosophy. The argument is set out in terms of certain concrete episodes in the history of science—a manner of exposition which brings out most clearly the influence of philosophical theories on the development of science, and of scientific discovery on modes of thinking in philosophy. 7 text figures £1.30 paper covers 60p OPUS

## **Atoms and Powers**

An Essay on Newtonian Matter-Theory and the Development of Chemistry

ARNOLD THACKRAY

Mr Thackray discusses the intellectual and social implications of Newtonian matter-theory and explores the creative tensions lying behind what at first might appear purely scientific questions. This work challenges the traditional historiography of the period, while raising broader interpretative issues within the history of science. 13 text figures £4.20 *Harvard University Press*

OXFORD UNIVERSITY PRESS

## CUMULATIVE BIBLIOGRAPHY

Volume 1 : Personalities A-J  
Volume 2 : Personalities K-Z and Institutions

*Edited by Magda Whitrow for the History of Science Society*

In the first two parts of the *ISIS Cumulative Bibliography* have been gathered the entries of the *ISIS* Critical Bibliographies 1-90, 1913-65. This material has been re-edited and reorganized so that it provides an index to *ISIS* itself and an invaluable reference source for the extensive literature of the history of science and related subjects which has appeared in *ISIS* over the past half century. The 'Personalities' section alone contains nearly 40,000 entries relating to 10,000 individuals.

These two volumes are the first substantial instalment of a project which will provide a fuller and better organized bibliography of the history of science than has hitherto been available.

Two volumes Approximately 750 pages each

## THE BRITISH SOCIETY FOR THE HISTORY OF SCIENCE

THE objects of the Society are to further the study of the history of science, by holding meetings for the reading and discussion of papers, and by facilitating the publication of relevant material.

*The British Journal for the History of Science* is the official organ of the Society.

There will generally be a Summer meeting, a Winter meeting and an Easter meeting of the Society. It is intended that additional meetings be arranged for specific occasions such as important anniversaries.

Membership is open to all persons approved by the Council of the Society, and elected at an Ordinary Meeting. The annual subscription is at present £2.50 (for Students £1.50) and includes a free issue of the Society's Journal, which appears in June and December each year.

Those who wish to join the Society should write to the Assistant Secretary, British Society for the History of Science, 47 Belgrave Square, London S.W.1.

Papers for inclusion in the Journal should be submitted to the Hon. Editor, Dr R. Fox, Department of History, University of Lancaster, Bailrigg, Lancaster, from whom instructions may be obtained concerning the presentation and documentation of papers. All communications on editorial matters, and books for review, should be addressed to the Hon. Editor.

Particulars regarding advertising in the Journal may be obtained from the Assistant Secretary, B.S.H.S., 47 Belgrave Square, London S.W.1.

*The British Journal for the History of Science* is published by the Society. Four parts constitute one Volume; each part contains approximately 100 pages. The cover of each issue has a consecutive number for ease of collation in subsequent binding, e.g. No. 16 is numbered: Vol. iv Part iv No. 16, and No. 17 is: Vol. v Part I No. 17.

Order Forms, with lists of contents of Parts already published, are obtainable from: *British Journal for the History of Science*, HEADLEY BROTHERS LTD., ASHFORD, KENT, ENGLAND, to whom Orders for the Journal should be sent.

Whole Cloth Binding Cases lettered in Gold on spine and particulars of binding costs may also be obtained from HEADLEY BROTHERS LTD.
