

CONTENTS OF VOLUME 33

V. V. ANH: <i>See</i> N. M. SPENCER	
C. ATKINSON and C. R. CHAMPION: Some boundary-value problems for non-linear (N) diffusion and pseudo-plastic flow	255
P. J. BANKS: <i>See</i> P. BROADBRIDGE	
N. G. BARTON, C.-H. LI and S. J. SPENCER: Control of a surface of discontinuity in continuous thickness	269
R. K. BERA and A. CHAKRABARTI: Cooling of an infinite slab in a two-fluid medium	474
P. BROADBRIDGE and P. J. BANKS: Exact nonlinear solution for constant-rate expression from material of finite thickness	430
J. R. CANNON, YANPING LIN and SHINGMIN WANG: Determination of a control parameter in a parabolic partial differential equation	149
A. CHAKRABARTI: <i>See</i> R. K. BERA	
C. R. CHAMPION: <i>See</i> C. ATKINSON	
YONGSHAO CHEN: The existence of periodic solutions for a class of neutral differential difference equations	508
DAVID L. CLEMENTS and ASHLEY LARSSON: Ground motion on alluvial valleys under incident plane SH waves	240
C. J. COLEMAN: On the microwave hotspot problem	1
R. N. DUBEY: <i>See</i> J. MAZUMDAR	
R. R. EGUDO, T. WEIR and B. MOND: Duality without constraint qualification for multiobjective programming	531
LYNN H. ERBE and ZHONGCHAO LIANG: Continuation and uniqueness for generalised Emden-Fowler systems	85
N. K. GHOSH: A cylindrical wave-maker problem in a liquid of finite depth with an inertial surface in the presence of surface tension	111
I. G. GRAHAM and Y. YAN: Piecewise-constant collocation for first-kind boundary integral equations	39
R. E. GRUNDY: The asymptotics of extinction in nonlinear diffusion reaction equations	414
XIANGJIAN HE: Hopf bifurcation at infinity with discontinuous nonlinearities	133
JAMES M. HILL and ADRIAN H. PINCOMBE: Some similarity temperature profiles for the microwave heating of a half-space	290
J. R. KING: Local transformations between some nonlinear diffusion equations	321
SHARDA S. KOPPAR: <i>See</i> L. K. PATEL	
A. A. LACEY and G. C. WAKE: Critical initial conditions for spatially-distributed thermal explosions	350
ASHLEY LARSSON: <i>See</i> DAVID L. CLEMENTS	
C.-H. LI: <i>See</i> N. G. BARTON	
ZHONGCHAO LIANG: <i>See</i> LYNN H. ERBE	

YANPING LIN: <i>See</i> J. R. CANNON	
J. MAZUMDAR and R. N. DUBEY: A method for the study of fully developed parallel flow in straight ducts of arbitrary cross section	211
NEVILLE DE MESTRE: A mathematical analysis of wind effects on a long-jumper	65
B. MOND: <i>See</i> R. R. EGUDO	
SIDNEY A. MORRIS and PETER J. NYIKOS: Sudden cardiac arrest and a problem in topology	123
DAVID MUSTARD: Uncertainty principles invariant under the fractional Fourier transform	180
PETER J. NYIKOS: <i>See</i> SIDNEY A. MORRIS	
L. K. PATEL and SHARDA S. KOPPAR: Some Bianchi type VI ₀ viscous fluid cosmological models	77
SHIGE PENG and JIONGMIN YONG: Determination of a controllable set for a controlled dynamic system	164
J. R. PHILIP: Exact solutions for redistribution by nonlinear convection-diffusion	363
ADRIAN H. PINCOMBE: <i>See</i> JAMES M. HILL	
RODOLFO SALVI: The equations of viscous incompressible non-homogeneous fluids: on the existence and regularity	94
G. C. SANDER: Exact solutions to nonlinear diffusion-convection problems on finite domains	384
N. F. SMYTH: The effect of conductivity on hotspots	403
JOSEPH WAI HUNG SO: Inertial manifold for a reaction diffusion equation model of competition in a chemostat	9
N. M. SPENCER and V. V. ANH: Spectral factorisation and prediction of multivariate processes with time-dependent rational spectral density matrices	192
S. J. SPENCER: <i>See</i> N. G. BARTON	
K. K. TAM: Porous medium combustion: ignition, temporal evolution, and parameter dependence	16
S. TANG and R. O. WEBER: Numerical study of Fisher's equation by a Petrov-Galerkin finite element method	27
K. L. TEO and K. H. WONG: Nonlinearly constrained optimal control problems	517
GERARD THOMPSON: Normal forms for elements of $o(p, q)$ and Hamiltonians with integrals linear in momenta	486
G. C. WAKE: <i>See</i> A. A. LACEY	
SHINGMIN WANG: <i>See</i> J. R. CANNON	
R. O. WEBER: <i>See</i> S. TANG	
T. WEIR: <i>See</i> R. R. EGUDO	
P. J. WICKS: Interaction of buoyant plumes in open-channel flow	451
K. H. WONG: <i>See</i> K. L. TEO	
Y. YAN: <i>See</i> I. G. GRAHAM	
JIONGMIN YONG: <i>See</i> SHIGE PENG
