THE ANZIAM JOURNAL

Volume 43 Part 1

JULY 2001

Combustion meeting in honour of Professor B. F. Gray	
Rodney Weber, Harvinder Sidhu and Geoffrey Mercer	i
How Brian Gray became a combustion scientist	
Huw O. Pritchard	ii
Speech by Professor G. C. Wake for the Professor B. F. Gray dinner	
Graeme Wake	iv
On the critical conditions for an assembly of interacting thermons	
B. F. Gray	1
A reaction-diffusion model of stored bagasse	
C. Macaskill, M. J. Sexton and B. F. Gray	13
A combustion wave of permanent form in a compressible gas	
Lawrence K. Forbes and William Derrick	35
The stability of a near-adiabatic Endex batch CSTR reactor	
A. C. McIntosh, B. F. Gray, G. C. Wake and R. Ball	59
On the crossing of intermediate unstable steady state solutions for thermal ignition in a sphere	
R. O. Weber, G. C. Wake, H. S. Sidhu, G. N. Mercer, B. F. Gray, W. Derrick and E. Balakrishnan	77
The multiplicity of steady-state solutions arising from microwave heating. I. Infinite Biot number and small penetration depth	
M. I. Nelson, G. C. Wake, X. D. Chen and E. Balakrishnan	87
A dynamical systems model of the limiting oxygen index test	
M. I. Nelson, H. S. Sidhu, R. O. Weber and G. N. Mercer	105
Combustion waves with reactant depletion	
J. Graham-Eagle and D. A. Schult	119

Continued overleaf

Set by TeXAdel, Adelaide, Australia.

Printed by Instant Colour Press, Canberra, Australia.

On the heating of a two-dimensional slab in a microwave cavity: aperture effects	
T. R. Marchant and B. Liu	137
Initiation of combustion waves in solids, and the effects of geometry	
J. Brindley, J. F. Griffiths, A. C. McIntosh and J. Zhang	149
Self-heating behaviour of low moisture content particles—modelling the basket-heating of solid particles and some aspects of the cross over behaviour using milk powder as an example	
Xiao Dong Chen	165

The Journal of the Australian Mathematical Society began publication in 1959, and from 1975 appeared in two series, Series A (Pure Mathematics and Statistics) and Series B (Applied Mathematics). Series B is now The ANZIAM Journal and is published in volumes comprising four quarterly parts. There is also a fifth (electronic) part designed for rapid publication (<http://jamsb.austms.org.au/>). Editor: A. J. ROBERTS, Department of Mathematics & Computing, University of Southern Queensland, Toowoomba, QLD 4350; aroberts@usq.edu.au. All five parts are refereed. All accepted papers have the option of publication in the electronic part. Information about Series A and other publications of the Society may be found on the inside back cover.

It is the editorial policy of The ANZIAM Journal to accept papers in any field of applied mathematics and related mathematical sciences. Novel applications of mathematics in real situations are especially welcomed. All papers should include some indication of applicability, and an introduction that can be understood by non-specialist readers from the whole applied mathematical community.

Manuscripts (three copies) for publication should be sent to the editor or to an appropriate associate editor at the address given on the inside front cover. Such action is a representation by the author that the manuscript has not been copyrighted or published, and that it is not being considered for publication elsewhere.

Authors are asked to read the section "Preparation of Manuscripts" on the last page.

Irrespective of the number of authors, 50 free offprints of each copy are provided; additional offprints may be ordered at the expense of the authors.

Excessive costs incurred by the Society through corrections to or withdrawal of articles may be charged to the authors concerned.

The ANZIAM Journal (ISSN 0334-2700) is published quarterly for A\$280.50 (Members A\$42.90) per annum by the Australian Mathematical Society, Mathematics Department, Australian National University, ACT 0200, Australia. Send address change notices to Dr A. Howe, Journal of the Australian Mathematical Society, Mathematics Department, Australian National University, ACT 0200, Australia.
