Facilitator Pre-Brief Script You have been asked to participate in a simulation that involves a highly volatile patient/family situation. • This simulation may elicit strong emotional reactions. • You will not be harmed. • Do not harm or physically touch any of the actors. Instead, simulate and verbalize any actions that you plan to undertake. • Do not make any real phone calls. Simulate all emergency calls. • The simulation and debrief will take no longer than 10 minutes. • Respond in the manner that you would if the situation were actually occurring. • If an actual emergency occurs during the simulation, approach any member of planning group and state "Real World." The planning group member will stop the simulation immediately

IN THIS ISSUE:

Caribbean Strong: Building Resilience with Equity

We invite you to join us in this important event to share your experiences, lessons learned and recommendations for enhanced resilience in health care systems and public health.

An emphasis will be placed on the critical need for collaboration and integration across all sectors to improve and strengthen the health and resilience of the Caribbean's citizens and communities during this important recovery and rebuilding phase.
