**Aims and Scope:** The *International Journal of Technology Assessment in Health Care* has as its specific scope of interest the generation, evaluation, diffusion, and use of health care technology. It addresses the diverse audience of health care providers within medicine, public health, nursing, and the allied health professions; decision makers in government, industry, and health care organizations; and the scholarly disciplines such as ethics, economics, law, history, sociology, psychology, and engineering. The journal aims to fill the needs of those interested in the complexities of interaction between people and technology; technology as a force in social and organizational change; and technology as it is created, produced, applied, and paid for. It examines descriptively and analytically the effects of technology as perceived from the vantage point of different academic disciplines and policy-making organizations and examines methods necessary to conduct studies and evaluations of technology.

The focus of the journal is the international health care community. The experience of different countries in their encounter with health care technology, viewed comparatively, is invaluable to understanding its effects. Further, it is important to establish ties with the scholars, governments, and private institutions concerned with health care technology so that the experiences and learning of the international community in its parts can benefit the whole. The use of technology in health care has created some of the major dilemmas in society today. The journal serves as a forum for the wide range of professionals interested in the assessment of medical technology, its consequences for patients, and its impact on society.

**Publishing, Advertising, and Subscription Offices:** Cambridge University Press, One Liberty Plaza, Floor 20, New York, NY 10006, U.S.A. (for U.S.A., Canada, and Mexico); or Cambridge University Press, Journals Fulfillment Department, UPH, Shaftesbury Road, Cambridge CB2 8BS, UK (for U.K. and elsewhere).

**2017 Subscription Information:** *International Journal of Technology Assessment in Health Care* (ISSN 0266-4623) is

published bimonthly in February, April, June, August, October, and December by Cambridge University Press, One Liberty Plaza, Floor 20, New York, NY 10006; Cambridge University Press, Journals Fulfillment Department, UPH, Shaftesbury Road, Cambridge CB2 8BS, UK. Annual institutional subscription rates for Volume 33 (2017): Institutions online only US \$679.00, and online only UK and elsewhere £390.00. Individuals online only US \$326.00, and online only UK and elsewhere £183.00. Single part: US \$130.00 in the U.S.A., Canada and Mexico; UK £75.00 and elsewhere. Online only for all institutions. Print editions ceased in 2014. Back volume prices are available upon request. *International Journal of Technology Assessment in Health Care* and other Cambridge journals can be found at <http://journals.cambridge.org>

**Founding Editors:** Egon Jonsson and Stanley J. Reiser

## CONTENTS

### Editorial

- 1** Why patients should be involved in health technology assessment  
*Janet Wale, Anna Mae Scott, Bjørn Hofmann, Sarah Garner, Eric Low and Lloyd Sansom*

### Methods

- 5** Headroom beyond the quality-adjusted life-year: The case of complex pediatric neurology  
*Kirsten J.M. van Nimwegen, Richard J. Lilford, Gert J. van der Wilt and Janneke P.C. Grutters*
- 11** Secure internet of things-based cloud framework to control zika virus outbreak  
*Sanjay Sareen, Sandeep K. Sood and Sunil Kumar Gupta*
- 19** A new health technology assessment system for devices: The first five years  
*Bruce Campbell, Lee Dobson, Joanne Higgins, Bernice Dillon, Mirella Marlow and Chris Pomfrett*

### Assessments

- 25** Systematic reviews of economic evaluations: How extensive are their searches?  
*Hannah Wood, Mick Arber and Julie M. Glanville*
- 32** Gene expression profiling and expanded immunohistochemistry tests to guide selection of chemotherapy regimens in breast cancer management: A systematic review  
*Alison Scope, Munira Essat, Abdullah Pandor, Rachid Rafia, Sue E. Ward, Lynda Wyld, Simon Cross and Helen Buckley Woods*
- 46** Attitudes of orthopedic specialists toward effects of medical device purchasing  
*Myriam Lingg, Everth Merida-Herrera, Kaspar Wyss and Luis Durán-Arenas*
- 54** Using the health technology assessment toolbox to facilitate procurement: The case of smart pumps in a canadian hospital  
*Thomas G. Poder*
- 63** Patient web portals and patient–provider relationships: A summary perspective  
*Hannah D. Caldwell, Neil B. Minkoff and Kalyani Murthy*
- 69** Dosage and duration of etanercept therapy for ankylosing spondylitis: A meta-analysis  
*Heeyoung Lee, Younjoo Jung, Seungyeon Song, Jihyung Lee, Hyunjun Shim, Wonku Kang and Eunyoung Kim*
- 76** Cardiovascular screening of young athletes: A review of economic evaluations  
*Sophie Gerken, Hans Van Brabant, Anja Desomer, Christian Leonard and Mattias Neyt*
- 84** Defining the relevant outcome measures in medical device assessments: An analysis of the definition process in health technology assessment  
*Esther Jacobs, Sunya-Lee Antoine, Barbara Prediger, Edmund Neugebauer and Michaela Eikermann*
- 93** Knowledge gaps in oral and maxillofacial surgery: A systematic mapping  
*Marie Österberg, Anders Holmlund, Bo Sunzel, Sofia Trancæus, Svante Twetman and Bodil Lund*
- 103** Quality of sample size estimation in trials of medical devices: High-risk devices for neurological conditions as example  
*Britta Olberg, Matthias Perleth, Katja Felgentraeger, Sandra Schulz and Reinhard Busse*

## Policies

- 111** Drug evaluation and decision making in catalonia: Development and validation of a methodological framework based on multi-criteria decision analysis (mcda) for orphan drugs  
*Antoni Gilabert-Perramon, Josep Torrent-Farnell, Arancha Catalan, Alba Prat, Manel Fontanet, Ruth Puig-Peiró, Sandra Merino-Montero, Hanane Khoury, Mireille M. Goetghebeur and Xavier Badia*
- 121** A new health technology assessment system for japan? simulating the potential impact on the price of simeprevir  
*Jörg Mahlich, Isao Kamae and Bruno Rossi*
- 128** Health technology assessment: The scientific career of a policy concept  
*Cyril Benoit and Philippe Gorry*
