

THE EDINBURGH MATHEMATICAL SOCIETY

The Edinburgh Mathematical Society was instituted in 1883 for “the promotion and extension of Mathematical Science, Pure and Applied”.

Members may subscribe to the *Proceedings* at a reduced rate. Further information about membership can be obtained from the Secretary.

The Society’s address is

The Edinburgh Mathematical Society
James Clerk Maxwell Building
The King’s Buildings
Edinburgh EH9 3JZ

Submission of papers

Papers to be considered for publication should be sent to the Secretary or to an Editor. Manuscripts (2 copies) should be typewritten on A4 paper with double spacing and generous margins. The style and arrangement should conform to current practice in the *Proceedings*. Each manuscript should contain a short abstract of not more than 200 words and also a primary classification number from the American Mathematical Society’s 1990 Mathematics Subject Classification Scheme. References, including titles of papers, should be given in the form adopted by *Mathematical Reviews*, footnotes being avoided if possible. Figures should be separated from the text and lettered, ready for photographic reduction; their intended location should be clearly indicated. Manuscripts which are not suitable for submission to the printer will not be accepted. Authors are advised to retain a copy of any material submitted as the Society cannot accept responsibility for any loss.

A proof is supplied once. Authors are particularly requested to correct and return the proof promptly. Excessive corrections may be charged to authors. Fifty free offprints, and additional copies at cost, will be supplied if ordered on a form returned with the proof.

Addresses of editors

C. M. Campbell
Mathematical Institute
University of St Andrews
North Haugh
St Andrews KY16 9SS

S. D. Cohen

Proceedings of the Edinburgh Mathematical Society

VOLUME 39 (SERIES II), PART 1

FEBRUARY 1996

Prime ideals and radicals in semigroup-graded rings	1
<i>Allen D. Bell, Shubhangi S. Stalder and Mark L. Teply</i>	
On the inner automorphisms of finite transformation semigroups	27
<i>Inessa Levi</i>	
Existence theorems on the Dirichlet problem for the equation $\Delta u + f(x, u) = 0$	31
<i>Gabriele Bonanno</i>	
A note on the product of \mathcal{F}-subgroups in a finite group	37
<i>Angel Carocca</i>	
Submodules of Specht modules for Weyl groups	43
<i>Sait Halicioğlu</i>	
Foldings and monomorphisms	51
<i>R. Z. Goldstein</i>	
A simplistic approach to inverse transversals	57
<i>T. S. Blyth and M. H. Almeida Santos</i>	
Congruence coherent distributive double p-algebras	71
<i>M. E. Adams, M. Atallah and R. Beazer</i>	
Asymptotic behaviour and blow-up of some unbounded solutions for a semilinear heat equation	81
<i>D. E. Tzaniotis</i>	
On a quartic diophantine equation	97
<i>R. J. Stroeker and B. M. M. de Weger</i>	
The decomposition of artinian modules over hyper-(cyclic or finite) groups	115
<i>Y. B. Qin</i>	
Asymptotic spectrum of multiparameter eigenvalue problems	119
<i>Hans Volkmer</i>	
On an existence result for nonlinear evolution inclusions	133
<i>Stanislaw Migórski</i>	
Local spectral properties of convolution operators on non-abelian groups	143
<i>Volker Runde</i>	
A mixed Dirichlet–Neumann problem for a nonlinear Reynolds equation in elastohydrodynamic piezoviscous lubrication	151
<i>J. Durany, G. García and C. Vázquez</i>	
Lattice packing of nearly-euclidean balls in spaces of even dimension	163
<i>J. A. Rush</i>	
A lower bound for the number of zeros of a meromorphic function and its second derivative	171
<i>J. K. Langley</i>	
Book Reviews	187
