

## Subscription rates

Subscription rates for volume 43 (2011) of *Advances in Applied Probability (AAP)* are as follows (post free and including online access at <http://projecteuclid.org/aap/>): US\$312.00; A\$360.00; £195.00 for libraries and institutions; or US\$104.00; A\$120.00; £65.00 for individuals belonging to a recognised scientific society. The subscription rates for volume 48 (2011) of *Journal of Applied Probability*, the companion publication, are the same; if both journals are ordered directly from the Applied Probability office at the same time, the combined price is discounted by 10%. Please send all enquiries to: Applied Probability Subscriptions, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK (telephone +44 114 222 3922; fax +44 114 272 9782; email [s.c.boyles@sheffield.ac.uk](mailto:s.c.boyles@sheffield.ac.uk)). Cheques, money orders, etc. should be made payable to 'Applied Probability'. Payment is acceptable in US, Australian or UK currency, or by Visa or Mastercard. We can provide back issue prices on application.

## Notes for contributors

Research papers are published in both *Journal of Applied Probability (JAP)* and *Advances in Applied Probability (AAP)*, with longer papers typically appearing in *AAP*. However, assignment of papers between the two journals is made by the Editor on an issue-by-issue basis. A submission to Applied Probability is considered as a submission to either journal. In addition, *AAP* publishes letters specifically related to papers that have appeared in *AAP* and *JAP* publishes short communications of a few printed pages in the nature of notes and letters specifically related to papers that have appeared in *JAP*. Review papers and papers in *stochastic geometry and statistical applications* are published in *AAP*.

Fifty offprints of each paper will be provided free, with additional offprints available at cost.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L<sup>A</sup>T<sub>E</sub>X class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as hard copy or as electronic files (with hard copy back-up). All submissions will be acknowledged on receipt and **must be accompanied by a covering letter stating the author's postal address and affiliation**. Hard copy: Send **all** submissions to the Applied Probability office in Sheffield, and not to individual editors. Two copies of the paper, at least one of which should be double spaced, should be sent to: **Executive Editor, Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK**. Electronic submission: Please email a **double-spaced** PostScript™ (.ps) or portable document format (.pdf) file, not exceeding 1 Mb. **The files must be clearly identified by name in a separate covering message**. The address for email submissions is [japaap@sheffield.ac.uk](mailto:japaap@sheffield.ac.uk). Authors should also submit one hard copy to the Executive Editor, as above.

## Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0001–8678/11

**Volume 43**      **Number 3**

*Stochastic Geometry and Statistical Applications*

- 597 SEBASTIAN CARSTENS AND THOMAS RICHTHAMMER. The two-type continuum Richardson model: nondependence of the survival of both types on the initial configuration
- 616 AMITES DASGUPTA, RAHUL ROY AND ANISH SARKAR. Geometry of the Poisson Boolean model on a region of logarithmic width in the plane
- 636 MATHEW D. PENROSE AND VADIM SHCHERBAKOV. Asymptotic normality of the maximum likelihood estimator for cooperative sequential adsorption

*General Applied Probability*

- 649 S. QU AND J. C. GITTINS. A forwards induction approach to candidate drug selection
- 666 ILYA MOLCHANOV AND MICHAEL SCHMUTZ. Exchangeability-type properties of asset prices
- 688 ANITA DIANA BEHME. Distributional properties of solutions of  $dV_t = V_{t-} dU_t + dL_t$  with Lévy noise
- 712 PHILIP S. GRIFFIN AND ROSS A. MALLER. Stability of the exit time for Lévy processes
- 735 SANDRO GALLO. Chains with unbounded variable length memory: perfect simulation and a visible regeneration scheme
- 760 MITSUSHI TAMAKI. Maximizing the probability of stopping on any of the last  $m$  successes in independent Bernoulli trials with random horizon
- 782 M. JARA AND T. KOMOROWSKI. Limit theorems for some continuous-time random walks
- 814 ANGELOS DASSIOS AND HONGBIAO ZHAO. A dynamic contagion process
- 847 CHIHOON LEE AND ANANDA WEERASINGHE. Stationarity and control of a tandem fluid network with fractional Brownian motion input
- 875 LARRY GOLDSTEIN AND HAIMENG ZHANG. A Berry–Esseen bound for the lightbulb process
