

Proceedings of the
CAMBRIDGE PHILOSOPHICAL
SOCIETY

(MATHEMATICAL AND PHYSICAL SCIENCES)

VOLUME 62

PART 4

CAMBRIDGE UNIVERSITY PRESS

BENTLEY HOUSE, 200 EUSTON ROAD, LONDON, N.W.1

AMERICAN BRANCH: 32 EAST 57TH STREET, NEW YORK, N.Y. 10022

Price Forty-five Shillings Net (U.S.A. \$8.00)

Subscription price per volume £8 net post free (\$28.50 in U.S.A.)

October 1966

CAMBRIDGE PHILOSOPHICAL SOCIETY

FOUNDED 1819; ROYAL CHARTER 1832

Session 1965-1966

President: SIR RUDOLPH PETERS

Vice Presidents: M. RYLE, E. N. WILLMER, O. R. FRISCH

Treasurer: R. C. EVANS

Secretaries: (Mathematical) G. R. ALLAN

(Physical) L. T. CHADDERTON

(Biological) S. SMITH

The publications of the Society consist of the *Proceedings* and of the *Biological Reviews*. The publication of *Transactions* was suspended at the end of Volume XXIII.

Orders should be sent to: THE MANAGER, CAMBRIDGE UNIVERSITY PRESS, BENTLEY HOUSE, 200 EUSTON ROAD, LONDON, N.W.1. Enquiries from the U.S.A. should be addressed to the Cambridge University Press, American Branch, 32 East 57th Street, New York, N.Y. 10022.

For the purchase of early parts of the *Transactions* and *Proceedings*, application should be made to the Librarian at the Society's office, THE PHILOSOPHICAL LIBRARY, BENE'T STREET AND FREE SCHOOL LANE, CAMBRIDGE, ENGLAND, and for early parts of *Biological Reviews* to the Cambridge University Press. All parts of the *Proceedings* (including the cumulative index to Vols. 1 to 50) and *Biological Reviews* are available, and prices of sets or single parts will be quoted on application.

Fellows and Associates of the Society are particularly requested to inform the Secretaries of any change of postal address and to send their subscriptions to the Treasurer, at the Society's office.

All correspondence regarding library exchanges and Fellows' copies should be addressed to the Librarian at the Society's office.

PROCEEDINGS of the CAMBRIDGE PHILOSOPHICAL SOCIETY

edited by

G. R. ALLAN

in consultation with

J. W. S. CASSELS

E. R. LAPWOOD

J. M. C. SCOTT

H. T. CROFT

W. B. R. LICKORISH

A. M. WALKER

P. V. LANDSHOFF

D. W. S. SCIAMA

1. Four parts of the *Proceedings* are issued each year, in January, April, July and October. Papers in all branches of mathematics (including applications of mathematics in the natural and biological sciences) are within its scope.

2. Contributions for the *Proceedings* should be sent to the Mathematical Secretary at the Society's office (see above). Papers should be communicated directly by the author.

3. Papers which (if printed) would occupy more than 20 pages can only rarely be accepted.

4. Papers in languages other than English should be accompanied by a brief summary in English.

5. It is extremely helpful if diagrams are drawn in indian ink on white card, faintly blue or green-lined graph paper, or tracing cloth or paper. *Symbols, legends and captions should be given on a transparent overlay.* The Society recognizes that many authors do not have the facilities for producing drawings of a sufficiently high standard to be reproduced directly and it is therefore willing to have such diagrams re-drawn, provided they are reasonably clear.

6. References should be listed at the end of each paper. Titles of journals should be abbreviated as in *Mathematical Reviews*. Any systematic method of ordering the list of references is acceptable.

7. Authors are particularly requested to prepare their manuscripts in a form suitable for printing, with adequate margins. The Secretary reserves the right to return scarcely legible manuscripts to the author. A pamphlet on the preparation of manuscripts may be obtained on application to the Librarian. If a large number of corrections are required in the proofs, the Council reserves the right to make a charge towards the cost.

8. Authors may receive on request 100 free offprints (for each set of authors in the case of a joint paper). Alternatively authors may have 50 free offprints in covers. Further copies may be obtained at reasonable cost. An order form is included with the galley proofs of each paper.

ELECTRONICS LETTERS

AN INTERNATIONAL PUBLICATION

ELECTRONICS LETTERS is a monthly fast-communication periodical published by the IEE. Its contents are letters (about 1000 words in length) on original advances in electronic science and engineering, radio and automatic control. Letters, which are accepted in French, German, Russian and Italian in addition to English, are published within 2 to 6 weeks of receipt.

The annual subscription is £4. Individual copies cost 8s.

Copies and further details may be obtained from the Secretary (Publications Department).

SAVOY PLACE, LONDON W.C. 2

THE JOURNAL OF THE SOCIETY FOR INDUSTRIAL AND APPLIED MATHEMATICS

VOLUME 14, NUMBER 4, SEPTEMBER 1966

The Theory of Max.-Min., with Applications. JOHN M. DANSKIN.
The Lagrange Multiplier Theorem for Max.-Min. with Several Constraints. JOSEPH BRAM.
Approximation Formulas for Stochastic Linear Programming. A. C. WILLIAMS.
The Hankel Transformation of Certain Distributions of Rapid Growth. A. H. ZEMANIAN.
Method of Undetermined Coefficients in Linear Differential Systems and the Matrix Equation $YB - AY = F$. A. DOU.
A New Class of Monte Carlo Estimators. E. M. GELBARD, L. A. ONDIS, II, and J. SPANIER.
Two Pairs of Families of Estimators for Transport Problems. J. SPANIER.
Bounds for Truncation Error of the Sampling Expansion. D. JAGERMAN.
On Two Theorems of Waltman. JAMES, S. W. WONG.
On the Maximum Order of the Automorphism Group of a Planar Triply Connected Graph. LOUIS WEINBERG.
Transfer Matrix Synthesis with Active RC Networks. D. HAZONY and R. D. JOSEPH.
The Structure of Powers of Nonnegative Matrices. II. The Index of Maximum Density. B. R. HEAP and M. S. LYNN.

A Graph-Theoretic Approach to a Communications Problem. GARY CHARTRAND.
On Linear Ordinary Differential Equations with Periodic Coefficients. KARL K. STEVENS.
An Alternate Definition of the Pseudo Inverse of a Matrix. JAMES E. SCROGGS and PATRICK L. ODELL.
Partitions of N -Space by Hyperplanes. R. O. WINDER.
An Integral Equation Solution of the Inhomogeneous Torsion Problem. A. R. S. PONTER.
Boundary Value Problems and Orthogonal Expansions. C. LANCZOS.
Infinitely Divisible Distributions and Bessel Functions Associated with Random Walks. WILLIAM FELLER.
High Frequency Sound According to the Boltzmann Equation. HAROLD GRAD.
On the Mathematical Theory of a Galaxy of Stars. C. C. LIN.
Half-Order Differentials on Riemann Surfaces. MENAHEM SCHIFFER.
Nonlinear Dispersive Waves. G. B. WHITHAM.
The Role of Inequalities in the Mathematical Theory of Elasticity. (Abstract.) F. JOHN.

The Journal is published bi-monthly. Subscriptions are \$20.00 per volume

Orders should be placed with the

SOCIETY FOR INDUSTRIAL AND APPLIED MATHEMATICS

33 So. 17th St., Philadelphia, Pennsylvania, 19103 U.S.A.

ROYAL STATISTICAL SOCIETY

THE JOURNAL OF THE ROYAL STATISTICAL SOCIETY is published in three series: SERIES A (GENERAL), four issues a year, annual subscription post free £5. 4s. (U.S. \$15), price each part 30s.; SERIES B (METHODOLOGICAL), three issues a year, annual subscription post free £4. 2s. (U.S. \$12), price each part 35s.; APPLIED STATISTICS (SERIES C), three issues a year, annual subscription post free 30s. (U.S. \$5), price each part 15s.

Contents of Series B (Methodological), Vol. 28, Part 3, 1966

The decision theory approach to sampling inspection (with Discussion). G. B. WETHERILL and G. E. G. CAMPLING.

An approach to the study of Markov processes (with Discussion). J. F. C. KINGMAN.

The almost full dam with Poisson input: Further results. A. M. HASOFER.

On a generalized queueing system with Poisson arrivals. D. N. SHANBHAG.

The reliability of multiplex systems with repair. F. DOWNTON.

A technique for discussing the passage time distribution for stable systems. J. KEILSON.

On the size of an epidemic and the number hearing a rumour. VIOLET R. CANE.

First-passage percolation. J. M. HAMMERSLEY.

Some aspects of the estimation of quantiles. R. M. LOYNES.

Some new results on the distribution of the sample correlation coefficient. HAROLD RUBEN.

On the distribution of the F -type statistics in the analysis of a group of experiments. T. CALINSKI.

Some aspects of randomization. G. E. P. BOX and IRWIN GUTTMAN.

Balanced factorial experiments. A. M. KSHIRSAGAR.

A Bayesian approach to classification. I. R. DUNSMORE.

A derivation of the probabilistic explication of information. I. J. GOOD.

On the independence of quadratic forms. D. N. SHANBHAG.

On the independence of quadratic expressions: Corrigenda. I. J. GOOD.

Obtainable through any bookseller or direct from:
