1.1 The Sustainable Development Goals (SDGs) for 2027 *Page* 7
1.2 Health care for all policies? 11
2.1 Causal connections in Health for All Policies 22
2.2 Two causal pathways 24
3.1 A high salience, low conflict problem has the highest potential of being resolved 39
5.1 Improvements to coverage design led to benefits for both SDG1 and SDG3 67
5.2 Catastrophic spending using the WHO Europe method, latest year available 69
5.3 Impoverishing spending by country, latest year available 70
5.4 Incidence of catastrophic health spending and out-of-pocket payments as a share of current spending on health, latest year available 71
5.5 Incidence of impoverishing (i.e., impoverished and further impoverished) spending and out-of-pocket payments as a share of current spending on health, latest year available 72
5.6 Public spending on health as a share of GDP and out-of-pocket payments, WHO European Region, 2020 72
5.7 The coverage cube demonstrates the three dimensions of health coverage 74
6.1 SDGs influenced by strengthening health literacy 92
6.2 The complex interplay between health literacy, health and education 94
6.3 Examples of stakeholders safeguarding health in school settings 97
7.1 Connected pathways of SDG3 and SDG5 co-benefits 111

Published online by Cambridge University Press

8.1 Causal pathway mapping for SDG8: the health and economic outcomes, as influenced by governance mechanisms used by the combined economic and health sectors 133
9.1 Mapping causal pathways between health programmes and co-benefits 156
10.1 Mapping proposed causal pathways between health policy and equality 176
11.1 Urban health system governance and Sustainable Development Goal co-benefits 197
12.1 Co-benefits for climate change through health system actions 223
