

Forthcoming papers

Volume 82/2 of *The Netherlands Journal of Geosciences*:

Contents:

Cheloniid remains from the middle Turonian of Northwest Germany

C. Diedrich & Hirayima

Deformation of the Carboniferous on the Oldenburg High and the location of the Variscan front in Northwest Germany

H. von Hartmann

The first record of Siegenite (Ni, Co)₃S₄ from the Netherlands

H. Bongaerts

The paleosol in the Kerkom Sands near Pellenberg (Belgium) revisited

S. van Herrewege, S. Deckers, F. De Coninck, R. Merckx & F. Gullentops

The origin of brackish and saline water in the coastal area of the Netherlands

V. Post, H. van der Plicht & H. A. J. Meijer

Late Quaternary tectonic evolution and aseismic near surface fault displacement along the Geleen Fault (Feldbiss Fault Zone - Roer Valley Rift System, the Netherlands), based on trenching

Houtgast, R. T. van Balen, C. Kasse & J. Vandenberghe

Identification of vivianite in Dutch soil by Raman microscopy

Th. Kloprogge

Relative water-level rise in the Flevo lagoon (The Netherlands), 5300-2800 cal. yr BC: an evaluation of new and existing basal peat time-depth data

B. Makaske, D. G. van Smeerdijk, H. Peeters, J. R. Mulder & Th. Spek

Boron-metasomatism in the Brabant Massif, Belgium: Geochemical and petrographical evidence of Devonian tourmalinite pebbles

C. Corteel & P. De Paepe
