

Cross infection stops here¹⁻⁵

Protect patients with the sterile barrier-sheath for ENT endoscopy

High level disinfection procedures are not performed properly 40–50% of the time – putting patients at risk of cross-infection.¹ The Slide-On™ EndoSheath™ System is a sterile, latex-free barrier-sheath,² that has been clinically demonstrated to provide more reliable protection against virulent micro-organisms and viruses.¹ Simple to use,⁵ EndoSheath also helps reduce time-consuming and expensive downtime associated with high-level disinfection procedures, and exposure to potentially toxic high-level disinfectants.^{1,3,4} Call 1800 668 670 for further information.

For patients with
Chronic Rhinosinusitis
adding salt to sinus
washing solutions is like...
adding insult to injury

**Physiological saline and
hypertonic salines have
high ionic strengths**
(>154 and >500mMol respectively)
**these adversely affect
innate immune peptides**

(lysozyme, lactoferrin,
Human Defensin Beta)^{1,2}

- ✓ Isotonic and Preservative Free
- ✓ Low ionic strength (26 Mmol)
- ✓ Very low Sodium and Potassium content

Formulated not to adversely
affect innate immune function¹

Three leading technologies. One goal.
To provide superior hearing.

Cochlear™ Nucleus® 5

For moderate to profound sensorineural hearing loss.

Cochlear Hybrid™

For severe to profound high frequency hearing loss.

Cochlear Baha® BP100

For conductive and mixed hearing loss.

We have developed the industry's leading implantable hearing solutions to give hearing impaired adults and children around the world the best opportunity to develop speech and live life to the full. Little wonder we're the first choice for families and hearing healthcare professionals who choose an implant. To find out more, contact us at customerservice@cochlear.com or call 1800 620 929 (Australia) or 0800 444 819 (NZ).

Hear now. And always

Experience the power of **INDIGO™**

Powerful. Versatile. Comfortable.

- High speed and torque for fast mastoid debulking
- Available with straight or angled attachments
- Small, lightweight body helps reduce operating fatigue
- Works with a broad variety of otology burs
- Grooves on attachment nose allows for more stable irrigation
- Powered by the IPC® System with easy touchscreen menus

NEW HIGH-SPEED OTOLOGIC DRILL

With bold power and elegant simplicity, the new Indigo™ drill offers enhanced surgical access and visibility for a wide range of otologic procedures.

For further information, contact your local Medtronic ENT representative.

Innovating for life.
