Experimental Agriculture publishes the results of experimental work in animal and crop husbandry, with an emphasis on research carried out in the warmer climates of the world. It also includes accounts of new experimental techniques, discussions of specific problems met in countries where agricultural production is developing rapidly, review articles on new developments in scientific agriculture, and occasional papers on technical, economic and sociological aspects of farming systems. The journal is the successor to *The Empire Journal of Experimental Agriculture*.

Each annual volume comprises four parts (published in January, April, July and October) plus an index.

Subscriptions may be sent to any bookseller or subscription agent or direct to the Cambridge University Press, Bentley House, 200 Euston Road, London, N.W. 1. Subscriptions in the U.S.A. and Canada should be sent to the American branch of the Press, 32 East 57th Street, New York, N.Y. 10022. The subscription price is 75s. net (including postage) for an annual volume (\$13.50 in the U.S.A.), payable in advance; separate parts cost 25s. net or \$4.50 each (plus postage).

Back Volumes. Inquiries for Vols. 1-32 of *The Empire Journal of Experimental Agriculture* should be addressed to Wm Dawson & Sons Ltd, 16 West Street, Farnham, Surrey. Previously published parts of *Experimental Agriculture* are available from the London or New York offices of the Cambridge University Press.

NOTES FOR CONTRIBUTORS

Contributions will be welcomed from scientists of all nationalities, particularly those working in tropical and sub-tropical countries where up-to-date techniques of agricultural experimentation are helping in the rapid development of more modern methods of farm production. Contributions, which must be written in English, should be sent to the Editor, Professor J. P. Hudson, University of Nottingham School of Agriculture, Sutton Bonington, Loughborough, England.

Conditions of acceptance. Submission of a paper will be taken to imply that the material has not previously been published, and is not being considered for publication elsewhere. Papers published in *Experimental Agriculture* may not be reprinted or published in translation without permission from the Editor, given on behalf of the Editorial Board.

General lay-out. Before having their manuscripts typed contributors are asked to look carefully at the lay-out of

AGRONOMY JOURNAL

This bimonthly publication, the official organ of the American Society of Agronomy, is respected throughout the world for its technical reports on basic and applied research in crop and soil science. Articles in past issues contributed information on the importance of soil aeration, moisture content, and root-zone temperature to the growth, development, and survival of forage crops; improved methods for determining seeding rates; techniques for estimating sugar quantities in plant extracts; a computer program for estimating parameters; and the effects of fertilizers and irrigation on crop yield, composition, and quality. *Publication is open to Society members.*

THE ANNALS OF APPLIED BIOLOGY

INDEX TO VOLUMES 1-50

This work provides separate author and subject indexes to the first fifty volumes of the *Annals of Applied Biology* (1914-1962). 240 pages long, it contains references to more than 2,500 papers. It will be an invaluable tool for all applied biologists.

40s. net (U.S.A. \$6.00)

Back volumes

Now is the time to check that your set of the *Annals* is complete. All past volumes of the *Annals* are either currently available, or will be reprinted. Volumes 1-50 are £6 (U.S.A. \$18.50) each except for the special Jubilee volume (42) which costs £1 5s. (U.S.A. \$4.00), and Volumes 51-54 are £4 10s. (U.S.A. \$15.00) each.

Orders should be sent to your usual bookseller or subscription agent, or direct to Cambridge University Press, Bentley House, 200 Euston Road, London N.W.1; orders in the United States and Canada should be sent to Cambridge University Press, American Branch, 32 East 57th Street, New York, N.Y. 10022, U.S.A.

The Journal of
AGRICULTURAL SCIENCE

(Established 1905)

Edited by G. D. H. Bell, K. L. Blaxter, G. W. Cooke, John Hammond, Jr.,
 Prof. Sir J. B. Hutchinson, Sir Bernard Keen, H. L. Penman,
 H. H. Rogers, E. W. Russell and F. Yates

Contents of Volume 67, No. 1, August 1966

- ALSTON, A. M. The effects of limestone, N, K and Mg fertilizers on Mg absorption by oats and barley
- SYMINGTON, R. B. and OLIVER, J. Observations on the reproductive activity of tropical sheep in relation to the photoperiod.
- GREENHALGH, J. F. D., REID, G. W., AITKEN, J. N. and FLORENCE, E. The effects of grazing intensity on herbage consumption and animal production. I. Short-term effects in strip-grazed dairy cows.
- DONEY, J. M. Breed differences in response of wool growth to annual nutritional and climatic cycles.
- DOGGETT, H. and JOWETT, D. Yields of maize, sorghum varieties and sorghum hybrids in the East African Lowlands.
- LARGE, R. V. and SPEDDING, C. R. W. The health and performance of the grazing animal in relation to fertilizer nitrogen usage. II Weaned lambs.
- BRAUDE, R. and ROWELL, J. G. Comparison of meal and pellets for growing pigs fed either in troughs or off the floor.
- WILLIAMS, V. J. and CHRISTIAN, K. R. Rumen fermentation of fresh herbage.
- BLAXTER, K. L. CLAPPERTON, J. L. and WAINMAN, F. W. Utilization of the energy and protein of the same diet by cattle of different ages.
- ASHTON, W. M. and YOUSEF, I. M. A study of the composition of Clun Forest ewe's milk. II. Mineral constituents.
- GRIFFITH, G. ap and WALTERS, R. J. K. The sodium and potassium content of some grass genera, species and varieties.
- COKER, E. G. The value of liquid digested sewage sludge. I. The effect of liquid sewage sludge on growth and composition of grass-clover swards in South-east England. II. Experiments on rye-grass in South-east England, comparing sludge with fertilizers supplying equivalent nitrogen, phosphorous, potassium and water. III The results of an experiment on barley.
- AUCKLAND, A. K. Soyabans in Tanzania. I. The exploitation of hybridization for the improvement of soya beans.
- WIDDOWSON, F. V., PENNY, A. and WILLIAMS, R. J. B. An experiment measuring effects of N, P and K fertilizers on yield and N, P and K contents of grazed grass.
- SABA, N., BURNS, K. N., CUNNINGHAM, N. F., NANCY HEBERT, C. and PATTERSON, D. S. P. Some biochemical and hormonal aspects of experimental ovine pregnancy toxæmia.
- DAVIES, ALISON. The regrowth of swards of S 24 perennial rye-grass subjected to different pre-treatments.

Issued at two-monthly intervals in parts of about 136 pages with plates and figures, three parts constituting a volume, 2 volumes yearly
Subscription price 75s. per volume. Single parts 32s. 6d. net

ANIMAL PRODUCTION

Journal of the British Society of Animal Production

Contents of Volume 8, Part 3, October 1966

INCLUDE

- JONES, MADDEVER, COURT and PHILLIPS. The time taken by cows to eat concentrates.
- BICHARD and COOPER. Analysis of production records from a lowland sheep flock: 1.
- MOAV. Specialised sire and dam lines. III: Choice of the most profitable parental combination.
- MOAV and HILL. Specialised sire and dam lines; IV. Selection within lines.
- BROADBENT and WATSON. Factors governing the shape of the growth curve of Suffolk × Welsh lambs.
- WIESER, PRESTON and MACDEARMID. Intensive beef production. 8. The effect of chlortetracycline on barley beef cattle.
- HINKS. Selection practices in dairy herds. I. and II.
- DOORNENBAL and MARTIN. The association between commercial cut-out yield and gross chemical composition in market pigs.
- LODGE, ELSLEY and MACPHERSON. The effects of level of feeding of sows during pregnancy. II.
- ELSLEY, ANDERSON, McDONALD, MACPHERSON and SMART. A comparison of the liveweight changes, nitrogen retention and carcass composition of pregnant and non-pregnant gilts.
- SLEE. Variation in the responses of shorn sheep to cold exposure.
- HUNTER. The effect of superovulation on fertilisation and embryonic survival in the pig.

The Journal is published three times a year, but COMMENCING 1967 WILL BE PUBLISHED QUARTERLY IN FEBRUARY, MAY, AUGUST and NOVEMBER.

The 1966 annual subscription rate is 65s (U.S.A. \$11.00) single copy 25s (U.S.A. \$4.00). COMMENCING 1967 THE SUBSCRIPTION RATE WILL BE 90s (U.S.A. \$14.00). Orders and subscriptions may be sent to any Bookseller or direct to:

JOURNAL OF THE BRITISH GRASSLAND SOCIETY

This Journal is a medium for the publication of the results of research and practical experience in the realm of grassland husbandry.

EDITOR: A. G. G. HILL

Contents of Volume 21, No. 2, June 1966

- THE NEED FOR A FRESH APPROACH TO THE PLACE AND PURPOSE OF THE LEY. *By E. K. Woodford.*
- THE SIGNIFICANCE OF VIRUS DISEASES FOR THE PRODUCTIVITY OF GRASSLAND. *By P. L. Catherall.*
- THE INTAKE AND NUTRITIVE VALUE OF FRESH, FROZEN AND DRIED *Sorghum almum*, *Digitari decumbens* and *Panicum maximum*. *By D. J. Minson.*
- THE EFFECT OF RELATING APPLICATIONS OF NITROGEN TO THE STAGE OF DEVELOPMENT OF COCKSFOOT (*Dactylis glomerata* L.) GROWN FOR PRODUCTION OF SEED. *By D. A. Lambert.*
- FERTILIZERS AND SEED RATIOS FOR CONTROLLING LUCERNE DOMINATION IN MIXTURES. *By M. R. Kilcher.*
- THE ROUTINE DETERMINATION OF *in vitro* DETERMINATION OF ORGANIC MATTER IN FORAGES. *By R. H. Alexander and Mary McGowan.*
- MOLEHILLS AND PASTURE REVERSION. *By H. Davies.*
- A MODIFIED METHOD FOR THE *in vitro* DETERMINATION OF HERBAGE DIGESTIBILITY IN PLANT-BREEDING STUDIES. *By H. H. Rogers and E. T. Whitmore.*
- FERTILITY BUILDING UNDER GRASSES. *By A. K. Sinha and B. N. Chatterjee.*
- CROSS-FERTILIZATION BETWEEN DIPLOID AND TETRAPLOID RYE-GRASSES. *By D. J. Griffiths and R. A. D. Pegler.*
- OBSERVATIONS ON THE UTILIZATION OF GRASS GRAZED BY YOUNG BEEF CATTLE WITH AND WITHOUT BARLEY SUPPLEMENTATION. *By T. J. Forbes, A. M. Raven and K. L. Robinson.*
- RESEEDING AND SURFACE TREATMENT—A COMPARISON OF TWO METHODS OF IMPROVING HILL GRAZINGS *By Alun Rowlands.*
- THE USE OF LIVELINE-GAIN TRIALS FOR PASTURE EVALUATION IN THE TROPICS II. VARIABLE STOCKING RATE DESIGNS. *By T. H. Stobbs and A. D. H. Joblin.*

Published quarterly. The annual subscription is 60s. or \$8.40, post free. Back numbers are still available, at the following prices; Volume 1, 20s. or \$2.80; volumes 2–17, 40s. or \$5.60 each; volumes 18 onwards, 60s. or \$8.40.

Orders to: The Secretary, British Grassland Society, Grassland Research Institute, Hurley, Berkshire, England.

RHODESIA, ZAMBIA AND MALAWI JOURNAL OF AGRICULTURAL RESEARCH

(Formerly the *Rhodesian Journal of Agricultural Research*)
The Journal of the Agricultural Research Council of Central Africa

VOL. 4 No. 2

CONTENTS

JULY 1966

Radio-isotope sampling in river flow.
Survival feeding of Afrikander cows.
Digestibility of diets for young steers.
Poisonous plants in range grazing.
Soil temperatures under soya beans.
Moisture stress on soya beans.
Heritability of pine characteristics.
Grand-parent, parent and offspring regressions.
Prediction of tasselling dates for maize.
Response of Rhodes grass to nitrogen.

RESEARCH NOTES

Another vector for groundnut rosette virus.
Approximations for the variance of standard deviations.
Establishment of Rhodes grass under mulches.

Published January and July of each year
Annual Subscription 30s. Individual numbers 15s.
Back numbers available.

Specimen copies are available free of charge to libraries from :

CONTROL INSECTS ON CITRUS CROPS WITH NEW, SYSTEMIC, PERSISTENT, ACTIVE BIDRIN

Bidrin is Shell's new organo-phosphorus insecticide. It is systemic and has particular advantages for many crops. For example, Bidrin's extremely wide spectrum of activity includes the easy control of scale and other insects on citrus crops. Bidrin is equally useful in dealing with stem borers and leaf hoppers on rice — aphids, mites and thrips on vegetables, cotton and seedcrops — and even the elm bark beetle. Bidrin kills on contact then continues to control biting and sucking insects for up to two to three weeks. Bidrin may be used to within four weeks before harvest, by then it has completely broken down and crops are ready for consumption. Current trials are proving that Bidrin may have many other valuable uses.

For further details about Bidrin contact your Shell company.
