Economic Reform in Eastern Europe

edited by Morris Bornstein

Since the early 1960s, economic reform has been in progress in Eastern Europe, taking various forms and proceeding at different speeds in different countries. In this volume, thirteen specialists on Eastern Europe cover the exciting key issues, blending theoretical analysis and empirical observation and considering the political and social as well as economic aspects of system change. Their constant concern is why and how economic systems change, how such change is measured and evaluated, and what the consequences are. The authors' rare language talents, technical skills, institutional knowledge, and recent field research bring special authority and insight to their analysis. \$15.00

The Enigmatic Chancellor

Bethmann Hollweg and the Hubris of Imperial Germany

by Konrad H. Jarausch

This sympathetic biography of Theobald von Bethmann Hollweg, fifth chancellor of imperial Germany, explores the ideologies and political dynamics of German policy before and during World War I. Drawing heavily on the diary of Bethmann's personal assistant, Kurt Riezler, as well as the chancellor's own correspondence and contemporary records and documents, Mr. Jarausch seeks to explain the seeming enigma of Bethmann's halting progressivism at a time of chaotic pressures in mass politics that made him a victim as well as an accomplice in the tragic course of twentieth-century German history. \$20.00

Kievan Russia

A History of Russia, Volume II

by George Vernadsky

"The account of this little-known chapter of Russian history is based on a formidable mass of Slavic, Byzantine, Germanic, and Oriental (notably Arabic and Persian) sources. . . . There is hardly an aspect of the life of Russia at that time which remains untouched, and the scope of the author's interests and erudition is indeed impressive. . . . When all is said, Vernadsky's volume represents a superb job of scholarship, filling a definite gap in American historical-literature."—*The Annals* (Kievan Russia was originally published in a clothbound edition in 1948 as volume two in George Vernadsky's comprehensive series, *A History of Russia*. It is now available for the first time in a paperbound edition.) paper \$3.75 cloth \$12.50

Beginning Polish

Revised Edition

by Alexander M. Schenker

First published in 1966-67, *Beginning Polish* received critical acclaim and has become a standard text for the teaching of Polish. The revised edition introduces two new features: a grammatical sketch of Polish and an index. Volume I includes twenty-five lessons each divided into sentences, pronunciation, grammar exercises, and vocabulary. Volume II contains drills for the lessons in Volume I designed specifically for classroom instruction, a survey of Polish grammar, and an index to both volumes. A set of tapes with sentences, pronunciation, and drills recorded by native speakers of Polish is available from the Yale Language Laboratory.

Volume I cloth \$10.00 paper \$7.00

Volume II cloth \$10.00 paper \$7.00
