

Behavioural Psychotherapy

Behavioural Psychotherapy is an international multidisciplinary journal for the publication of original research, of an experimental and clinical nature, which contributes to the theory, practice and evaluation of behaviour therapy. As such the scope of the journal is very broad and articles relevant to most areas of human behaviour and human experience, which would be of interest to members of the helping and teaching professions, will be considered for publication.

While the emphasis is placed on empirical research, articles concerned with theoretical and methodological issues as well as evaluative reviews of the behavioural literature are also published. In addition, given the emphasis of behaviour therapy on the experimental investigation of the single case, the Clinical Section of the Journal, publishes case studies where, although the interventions have not been experimentally evaluated, the treatment approach and/or problem dealt with is considered of particular interest. Correspondence, relating to articles published in *Behavioural Psychotherapy*, is also invited.

As an applied science the concepts, methodology and techniques of behavioural psychotherapy continue to change. The journal seeks both to reflect and to influence these changes.

The following types of articles are suitable for *Behavioural Psychotherapy*:

Reports of original research employing experimental or correlational methods and using within or between subject designs.

Review or discussion articles having theoretical, conceptual or applied implications.

Brief Reports and Case Studies employing innovative techniques and/or approaches.

British Association of Behavioural Psychotherapy (B.A.B.P.)

B.A.B.P. was founded in 1972, and the journal, *Behavioural Psychotherapy*, has grown naturally out of the Associations' Bulletin. The journal now has a worldwide circulation and is read by a large cross-section of the helping professions.

B.A.B.P. itself is a multi-disciplinary organization and full membership is open to members of the helping professions – psychologists, psychiatrists, social workers, nurses, teachers, etc. The objects of the Association are to promote the advancement of the theory and practice of behavioural psychotherapy, to provide a forum for discussion, to disseminate information, to liaise with public and professional bodies, to promote research and to assist in training.

B.A.B.P. Membership Secretary: Howard Lomas, Craig House, Bank Street, Bury, Lancs BL9 0AB.

UNIVERSITY OF LEICESTER

Diploma in Social Learning Theory and Practice in Applied Settings

The Diploma is a post-qualification multi-disciplinary course, designed to give a practical and theoretical training in behaviour therapy for those working with a variety of client groups. The course is based jointly in the Psychology Department at the University of Leicester and at the Glenthorne Youth Treatment Centre at Birmingham. It is a one-day per week release course, lasting for one calendar year. Most of the teaching days are held at the University, with occasional days at Glenthorne Youth Treatment Centre.

Applications are invited from those holding professional qualifications, e.g. youth work, social work, nursing, teaching, and psychology, although applications based on experience and merit will readily be considered.

Training takes place through the use of lectures, seminars, practical workshops, and tutorials. Students are assessed by continuous course assessment including a research project and several written assignments. Practice is supervised and assessed.

Application forms are available from the Diploma Course Secretary, Mrs. Vivienne Doughty, at the Psychology Department, University of Leicester, Leicester LE1 7RH.

The Psychology of Embarrassment

ROBERT J. EDELMANN, University of Surrey

This book is about embarrassment, both as an everyday phenomenon and, in its chronic form, a disabling condition, each of which require an explanatory framework. It draws together a wide range of research from clinical, social, personality and developmental psychology in order to present a comprehensive account of the experience of embarrassment.

Instructions to Authors

1. **Submission.** Articles, written in English and not submitted for publication elsewhere, should be sent to Dr A. Desmond Poole, Department of Mental Health, The Queen's University of Belfast, Windsor House, Belfast City Hospital, Belfast BT9 7AB, Northern Ireland.

2. **Manuscript preparation.** Four complete copies of the manuscript must be submitted. Original figures should be supplied at the time of submission. Articles must be typed double-spaced throughout on standard sized paper (preferably A4) allowing wide margins all round. Where unpublished material, e.g. behaviour rating scales, therapy manuals, etc is referred to in an article, copies should be submitted to facilitate review.

Manuscripts will be sent out for review exactly as submitted. Authors who want a blind review should mark two copies of their article "review copy" omitting from these copies details of authorship.

Abbreviations where used must be standard. The Système Internationale (SI) should be used for all units; where metric units are used the SI equivalent must also be given. Probability values and power statistics should be given with statistic values and degrees of freedom [e.g. $F(1,34) = 123.07, P < 0.001$], but such information should preferably be included in tables rather than the main text.

Spelling must be consistent within an article, either using British usage (*The Shorter Oxford English Dictionary*), or American usage (*Webster's New Collegiate Dictionary*). However, spelling in the list of references must be literal to each original publication.

Details of style not specified here may be determined by reference to the *Publication Manual of the American Psychological Association* or the *Style Manual for Biological Journals*.

Articles should conform to the following scheme:

(a) *Title page.* The title should phrase concisely the major issues. Author(s) to be given with departmental affiliations and addresses, grouped appropriately. A running head of no more than 40 characters should be indicated.

(b) *Summary.* This should summarize the article in no more than 200 words.

(c) *Text.* This should begin with an introduction, succinctly introducing the point of the paper to those interested in the general area of the journal. References within the text should be given in the form Jones and Smith (1973). Three or more authors should be given as Williams *et al.* (1973). Authors of the same surname should be distinguished by their initials. The approximate positions of tables and figures should be indicated in the text. Footnotes should be avoided where possible.

(d) *Reference note(s).* A list of all cited unpublished or limited circulation material, numbered in order of appearance in the text, giving as much information as possible about extant manuscripts.

(e) *References.* All citations in the text should be listed in strict alphabetical order according to surnames. Multiple references to the same author should be listed chronologically, using a, b, etc., for entries within the same year. Formats for journal articles, books and chapters should follow these examples:

BECKER, M. R. and GREEN, L. W. (1975). A family approach to compliance with medical treatment: A selective review of the literature. *International Journal of Health Education* 18, 173—182.

THORP, R. G. and WETZEL, R. J. (1969). *Behaviour Modification in the Natural Environment*. New York: Academic Press.

ROSKIES, E. and LAZARUS, R. S. (1980). Coping theory and the teaching of coping skills. In *Behavioural Medicine: Changing Health Lifestyles*. P. O. Davidson and S. M. Davidson (Eds), New York: Brunner/Mazel.

(f) *Footnotes.* The first, and preferably only, footnote will appear at the foot of the first page of each article, and subsequently may acknowledge previous unpublished presentation (e.g. dissertation, meeting paper), financial support, scholarly or technical assistance, or a change in affiliation. Its concluding (or only) paragraph must be the name and full mailing address of the author to whom reprint requests or other inquiries should be sent.

(g) *Tables.* Tables should be numbered and given explanatory titles.

(h) *Figure captions.* Numbered captions should be typed on a separate page.

(i) *Figures.* Original drawings or prints must be submitted for each line or half-tone illustration. Figures should be clearly labelled.

3. **Proofs, Reprints and Copyright.** Proofs of accepted articles will be sent to authors for the correction of printers' errors; author's alterations may be charged. Authors submitting a manuscript do so on the understanding that if it is accepted for publication exclusive copyright in the paper shall be assigned to the Society. In consideration of the assignment of copyright, 25 copies of each paper will be supplied. Further reprints may be ordered at extra cost; the copyright assignment form and the reprint order form will be sent with the proofs. The publishers will not put any limitation on the personal freedom of the author to use material contained in the paper in other works.
