

BECOME A LIFE MEMBER AND YOU'LL JOIN PRESTIGIOUS COMPANY

Become a Life Member of Fauna & Flora International to show an extraordinary commitment to an organisation that has been at the forefront of conservation for over 100 years.

Since its inception in 1903 as the world's first international conservation organisation Fauna & Flora International has been working tirelessly for the preservation of plants and animals across the world. For over 100 years Life Members have provided the support and commitment that has helped us to achieve so much, not least key achievements such as:

- Reintroducing the Arabian oryx to the wild
- Establishing the International Gorilla Conservation Programme
- Establishing Vietnam's first locally managed conservation organisation

Collaboration is key to our approach, and wherever possible we work with other global conservation organisations to ensure we are effective and efficient. That's why in 2015 we moved into the David Attenborough Building of the Cambridge Conservation Initiative with several other global conservation groups. Now we are asking you to be part of our wider collaborative work by becoming a Life Member.

As a Life Member you will receive *Oryx*—The International Journal of Conservation and our annual magazine *Fauna & Flora*, and you will also be invited to special events, where you can network with some of the world's leading conservationists. You will be joining a select group of supporters who have shown an extraordinary commitment to international conservation.

By joining Fauna & Flora International as a Life Member with a one-off payment of £1,500 you will be making a genuine difference to our conservation work and will forever be part of our global conservation organisation.

Gary Morrisroe/FFI

"I have been a member of Fauna & Flora International since the 1950s... investment in the work of FFI is truly an investment in the future of our planet"

Sir David Attenborough

Cover The breadth and complexity of the skills, knowledge and resources required to achieve collective conservation goals have grown markedly. As a result, identifying, prioritizing and funding the development of conservation capacity is now one of the most pressing and significant conservation challenges. This issue of *Oryx* focuses on this theme, with 14 articles covering a range of matters, including the professionalization of conservation, leadership, and the evaluation of training. On the cover, Nino Mikadze and Tamar Mikadze, citizen inspectors, monitor poaching along the Rioni River in Georgia. As part of their training with Fauna & Flora International, Nino, Tamar and other citizen inspectors learnt how to detect, document and report illegal fishing. For the capacity for conservation theme, see pp. 654–773. (Photograph © Kakha Gogichashvili/Fauna & Flora International)
