THE JOURNAL OF HYGIENE

EDITED BY

GEORGE H. F. NUTTALL, M.D., PH.D., Sc.D., F.R.S.

QUICK PROFESSOR OF BIOLOGY IN THE UNIVERSITY OF CAMBRIDGE

IN CONJUNCTION WITH

JOHN S. HALDANE, M.D., LL.D., F.R.S.,
Late Reader in Physiology in the University of Oxford.

CHARLES J. MARTIN, M.B., D.Sc., F.R.S.,
Director of the Lister Institute, London.

J. C. G. LEDINGHAM, M.B., D.Sc.,
Bacteriologist-in-Chief, Lister Institute, London.

G. S. GRAHAM-SMITH, M.D.,
University Lecturer in Hygiene, Cambridge.

M. GREENWOOD, JUNR., M.R.C.S.,
Statistician, Lister Institute, London.

THE UNIVERSITY OF CHICAGO SCIENCE SERIES

THE ORIGIN OF THE EARTH. By THOMAS CHROWDER
CHAMBERLIN, Head of the Department of Geology in the University of
Chicago.

This book, by one of the leading geologists of the world, sets forth the disclosures that led to the rejection, one after another, of the older views of the origin of our planet, the futile attempts then made to emend these or to build others upon the same foundations, the final rejection of all these, and the construction of a radically new view based on a new dynamic foundation. The later chapters of the book treat of the early stages of the earth and of the way in which its leading processes took their start from their cosmogonic antecedents, these being held to be essential factors in the genesis of the planet. The beginning of the inquiry is set forth in the Introduction; the successive chapters are entitled: "The Gaseous Theory of Earth-Genesis in the Light of the Kinetic Theory of Gases"; "Vestiges of Cosmogonic States and Their Significance"; "The Decisive Testimony of Certain Vestiges of the Solar System"; "Futile Efforts"; "The Forbidden Field"; "Dynamic Encounter by Close Approach"; "The Evolution of the Solar Nebula into the Planetary System"; "The Juvenile Shaping of the Earth"; "Inner Reorganization of the Juvenile Earth"; "Higher Organization in the Great Contact Horizons."

THE CAMBRIDGE PUBLIC HEALTH SERIES

Under the Editorship of

G. S. GRAHAM-SMITH, M.D., AND J. E. PURVIS, M.A.

The Causes of Tuberculosis. By L. COBBETT, M.D., F.R.C.S., University Lecturer in Pathology, Cambridge. Demy 8vo. With 23 plates and 8 diagrams. 21s. *net.* (See also next page.)

Occupations from the Social, Hygienic, and Medical Points of View. By Sir THOMAS OLIVER, M.A., M.D., LL.D., D.Sc., F.R.C.P., Professor of the Principles and Practice of Medicine, University of Durham. Demy 8vo. 6s. *net.*

The Chemical Examination of Water, Sewage, Foods and other Substances. By J. E. PURVIS, M.A., University Lecturer in Chemistry and Physics as applied to Hygiene and Public Health, Cambridge, and T. R. HODGSON, M.A., Public Analyst for the County Boroughs of Blackpool and Wallasey. Demy 8vo. 9s. *net.*

The Bacteriological Examination of Food and Water. By WILLIAM G. SAVAGE, B.Sc., M.D., D.P.H., County Medical Officer of Health, Somerset. Second edition. Demy 8vo. With 16 illustrations. 8s. *net.*

Sewage Purification and Disposal. By G. BERTRAM KERSHAW, M.Inst.C.E., Consulting Engineer, Engineer to the Royal Commission on Sewage Disposal. Demy 8vo. With 4 tables and 56 text-figures and plans. 12s. *net.*

Post-mortem Methods. By J. MARTIN BEATTIE, M.A., M.D., Professor of Bacteriology, University of Liverpool. Demy 8vo. With 8 plates and 3 text-figures. 10s. 6d. *net.*

Isolation Hospitals. By H. FRANKLIN PARSONS, M.D., D.P.H., formerly First Assistant Medical Officer of the Local Government Board. Demy 8vo. With 55 text-figures. 12s. 6d. *net.*

Infant Mortality. By HUGH T. ASHBY, B.A., M.D., B.Ch. (Camb.), M.R.C.P. (London). Demy 8vo. With 9 illustrations. 10s. 6d. *net.*

Flies in Relation to Disease. Bloodsucking Flies. By EDWARD HINDLE, B.A., Ph.D., Assistant to the Professor of Biology, Cambridge. Demy 8vo. With 88 text-figures. 12s. 6d. *net.*

Flies in Relation to Disease. Non-Bloodsucking Flies. By G. S. GRAHAM-SMITH, M.D., Lecturer in Hygiene in the University of Cambridge. Demy 8vo. Second edition, revised and enlarged. With 27 plates, 32 text-figures and 20 charts. 12s. 6d. *net.*

A list of volumes in preparation will be sent on application

THE CAUSES OF TUBERCULOSIS

TOGETHER WITH SOME ACCOUNT OF THE PREVALENCE
AND DISTRIBUTION OF THE DISEASE

By

LOUIS COBBETT, M.D., F.R.C.S.

University Lecturer in Pathology, Cambridge

Cambridge Public Health Series. Demy 8vo. Pp. xvi + 708

With 23 plates and 8 diagrams. Price 21s net

"Such a work as Dr Cobbett's supplies a want, containing as it does the cream of modern knowledge on the subject of tuberculosis, presented in a form which is at once interesting and convincing. A full index and a concise summary of each section of the subject under discussion, renders it easy of reference. The photographic illustrations of the disease in various types of animals are excellent, and add considerably to the practical usefulness of the whole treatise."—*British Medical Journal*.

"A volume which is rich in material, and one which every physician and surgeon cannot fail to profit by. It is seldom, indeed, that we have so much of real practical, everyday value from the pen of a pathologist....The book is one which will be found of very special assistance to every medical practitioner....A book which we can warmly recommend to the profession."—*Medical World*

The National Food Supply in Peace and War. By

T. B. WOOD, M.A., Drapers' Professor of Agriculture in the University of Cambridge. Second impression. Demy 8vo. Paper covers. 6d net. By post, 7d.

Lord Rhondda, in his statement to the deputation from the Central Chamber of Agriculture on September 6, said:—"I would also call your attention to the very interesting pamphlet which has recently been issued by Professor T. B. Wood, of the Board of Agriculture."

"Professor Wood is a teacher in whom farmers have confidence....The pamphlet is of interest to the general public as well as to farmers, for it has been prepared with a view to enabling the community at large to form a true estimate of the situation."—*Times*

"Professor Wood offers suggestions as to the means by which the food supplies might be conserved and equitable distribution secured, and his pamphlet constitutes a contribution of importance on questions both urgent and far reaching in their relation to the welfare of the nation."—*Field*

Food Economy in War Time. By T. B. WOOD, M.A., and

F. G. HOPKINS, M.A., F.R.S. Second edition. Demy 8vo. Paper covers. 6d net. By post, 7d.

"It is written by Profs. T. B. Wood and F. G. Hopkins, both of whom can speak with authority, one from the agricultural, the other from the physiological, point of view. It is written in a clear style, such as the man in the street, or, what is more important, the woman in the kitchen, can understand."—*Nature*

Composition and Nutritive Value of Feeding Stuffs.

By T. B. WOOD, M.A. Demy 8vo. Paper covers. 6d net. By post, 7d.

This pamphlet shows the result of an attempt to collect analyses of all materials used for feeding live-stock. Wherever possible, analyses of the materials actually used by British farmers have been obtained.

CEREBRO-SPINAL FEVER

by MICHAEL FOSTER, M.A., M.D.

Captain Royal Army Medical Corps, Territorial Force

and J. F. GASKELL, M.A., M.D.

Captain Royal Army Medical Corps, Territorial Force

Large royal 8vo. pp. x + 222. With 11 plates, 5 charts,
and 3 text-figures. Price 12s 6d net

"As a result of their experience with cerebro-spinal fever during 1915 at the 1st Eastern General Hospital, Captains Michael Foster and J. F. Gaskell have written an excellent practical account of the disease, its pathology, bacteriology, and management....

The book is excellently arranged, well written, and full of practical details that make it invaluable for the medical man and laboratory workers who have to deal with cases of cerebro-spinal fever. It may be most warmly recommended to their attention."—*British Medical Journal*

"The book is far from being a mere compilation; it contains the record of much original and valuable work and thought, and must be referred to by other investigators upon cerebro-spinal fever.

The illustrations are excellent, and, what is more, fill a distinct want. To our knowledge no such full series of reproductions of the rashes of 'spotted fever' has hitherto been published."—*The Cambridge Review*
