

# QUARTERLY REVIEWS OF BIOPHYSICS

---

---

VOLUME 18 1985

## Editors

A. Ehrenberg [*Sweden*]  
R. D. Keynes [*United Kingdom*]  
G. Felsenfeld [*USA*]  
K. Wüthrich [*Switzerland*]  
T. A. Steitz [*USA*]

## Council of IUPAB

|   |                             |
|---|-----------------------------|
| B. Pullman (France) <i>President</i>            | S. Estrada-O (Mexico)       |
| L. D. Peachey (USA) <i>Vice-President</i>       | W. Fuller (UK)              |
| K. Wüthrich (Switzerland) <i>Vice-President</i> | C. Hélène (France)          |
| R. D. Keynes (UK) <i>Hon. Vice-President</i>    | G. R. Ivanitsky (USSR)      |
| J. Tigyí (Hungary) <i>Secretary General</i>     | K. C. Lin (Beijing, China)  |
| S. Asakura (Japan)                              | W. Reichardt (FRG)          |
| M. Baltscheffsky (Sweden)                       | R. Villegas (Venezuela)     |
| M. Brunori (Italy)                              | K. L. Wierzchowski (Poland) |
| L. C. M. De Maeyer (Belgium)                    |                             |

Published for the International Union for  
Pure and Applied Biophysics

Cambridge University Press 1985

# Contents

---

---

## No. 1. FEBRUARY 1985

- ROBERT BAUER. Perturbed angular correlation spectroscopy and its application to metal sites in proteins: possibilities and limitations 1
- ROXANNE DESLAURIERS, YVES GEOFFRION, KEITH W. BUTLER and IAN C. P. SMITH. Magnetic resonance studies of the pathophysiology of murine malaria 65

## No. 2. MAY 1985

- HANS SENN and KURT WÜTHRICH. Amino acid sequence, haem-iron coordination geometry and functional properties of mitochondrial and bacterial c-type cytochromes 111
- GÜNTHER PALM and BERTRAM PÖPEL. Volterra representation and Wiener-like identification of non-linear systems: scope and limitations 135
- LARS FOLKE OLSEN and HANS DEGN. Chaos in biological systems 165

## No. 3. AUGUST 1985

- IRVING M. KLOTZ. Ligand-receptor interactions: facts and fantasies 227
- FRASER A. ARMSTRONG, H. ALLEN O. HILL and NICHOLAS J. WALTON. Reactions of electron-transfer proteins at electrodes 261

## No. 4. NOVEMBER 1985

- KIM D. COLLINS and MICHAEL W. WASHABAUGH. The Hofmeister effect and the behaviour of water at interfaces 323
- C. G. KURLAND and MÅNS EHRENBERG. Constraints on the accuracy of messenger RNA movement 423
- J. M. RITCHIE and R. D. KEYNES. The production and absorption of heat associated with electrical activity in nerve and electric organ 451

## INFORMATION FOR CONTRIBUTORS TO QUARTERLY REVIEWS OF BIOPHYSICS

1. *Quarterly Reviews of Biophysics* is the official journal of the International Union for Pure and Applied Biophysics. As such, its primary aim is to provide a forum for general and specialized communication between biophysicists working in different areas. This will normally be achieved by inviting authors who have made significant contributions to give a critical and readable account of recent progress in their special fields. Shorter and even controversial articles discussing topics of particular current interest will also be published.

2. Reviews should preferably be written in English. The style of presentation must be concise, with only key references.

3. Three copies of manuscripts are required. They should be typed in double spacing with a margin of 4 cm all round. The position of tables and illustrations should be indicated in the text. Tables and legends for illustrations should be typed on separate pages. A table of contents should be provided for printing at the head of the article.

4. In the text, the references should be to authors and year. When a paper cited has three or more authors the style Smith *et al.* (1973) should be used on all occasions. At the end of the paper, references should be listed alphabetically, with the full title of each paper, and the first and last pages. Abbreviations of journal titles should follow the latest edition of the *World List of Scientific Periodicals*. For example

BERNAL, J. D. (1967). *Origins of Life*. London: Weidenfeld and Nicolson.

EIGEN, M. (1968). New looks and outlooks on physical enzymology. *Q. Rev. Biophys.* **1**, 3-33.

5. Drawings should be in Indian ink on tracing paper. They should be drawn roughly twice the size of the finished block. Explanations should as far as possible be placed in the legends. Lettering for photographs should either be on a duplicate print or on an accurately registered overlay.

6. The author will receive only one set of page proofs for correction. Fifty reprints of each review will be provided free of charge. Additional copies may be purchased.
