Aims and Scope

Primary Health Care Research & Development is the first peer-reviewed journal aimed specifically at both researchers and practitioners in primary health care, bridging the gap between the two areas. It provides a forum for the publication of international, interdisciplinary research and development in primary health care. It is essential reading for all involved in primary care: nurse practitioners, GPs and Health Service managers; professional and local groups in community health; researchers and academics; purchasers of primary health care services; allied health practitioners in secondary services and health-related consumer groups.

Primary Health Care Research & Development (ISSN 1463-4236 print; ISSN 1477-1128 online) is published four times a year in January, April, July and October.

2010 annual subscription rates
