

Take the classroom to sea - with Simrad Simulators

All currently used navigation systems can now be simulated with Simrad's range of navigation instrument simulators.

Safe, Convenient and Realistic training without using valuable time at sea.

By using Simrad simulators, practical experience can be gained in all types of operational conditions, in the classroom. Each navigation simulator is programmed to reproduce actual antenna signals with all the most common sources of error affecting the particular system built in!

Each operator can receive personal 'hands-on' training in realistic situations. Particularly difficult and dangerous navigation conditions can be repeated as necessary until the operator is completely able to handle them, and theoretical instruction can be practised until it is fully understood.

Simrad simulators are provided in modular units in order that complete training programmes can be built up according to requirements and budgets.

With Simrad simulators, both beginners and experienced operators can gain the widest possible experience and learn to get the best from their electronic equipment in a fraction of the time it would take at sea.

SIMRAD Simulators are available for:
LORAN C - DECCA NAVIGATOR - OMEGA - RADIO DIRECTION FINDING -
TRANSIT SATELLITE NAVIGATION - RADAR.

THE INTERNATIONAL HYDROGRAPHIC REVIEW

Half-yearly, 160 pages (approx.) 18 × 27 cm. Price 90 French francs*
Yearly subscription 160 French francs*

Among the papers of interest in the January 1983 issue are:

- The first decade of GLORIA (A. S. LAUGHTON)
- The role of the sea and the seafarers in early geodesy (I. K. FISCHER)
- On the predictability of currents (G. GODIN)

PUBLISHED BY THE
INTERNATIONAL HYDROGRAPHIC BUREAU
7, av. President J. F. Kennedy,
B.P. 345 - MC 98000 MONACO

The Bureau also publishes monthly

THE INTERNATIONAL HYDROGRAPHIC BULLETIN

A bilingual journal - English and French - giving news of hydrographic activities worldwide. Lists in detail charts published by Member States of the International Hydrographic Organization, and contains a selective bibliography of recent works in the fields of hydrography, descriptive oceanography, navigation, cartography, etc.

Approx. 30 pages, 21 × 30 cm, 10.50 French francs per copy*
Yearly subscription: 105 French francs*

* *Postage extra*

Deep thinking, wide choice.

Marconi Marine's new Seachart 2 presents the navigator with a recording echosounder precisely tailored to his needs – at a very competitive price.

Deep and shallow range versions and a choice of 24kHz or 50kHz ceramic transducers provide eight alternative combinations to suit any type of ship and operational requirement. A changeover unit can be fitted if transducer selection is required, and the new recorders will also operate with most existing transducers.

Seachart 2 meets IMO Performance

Standards for Echosounding Equipment and the UK Echosounder Performance Specification.

Please ask for full technical details.

- * Choose from 8 different recorder/transducer combinations to suit your needs.
- * Excellent shallow-water discrimination using digital memory store and constant-speed stylus – inherently more reliable than variable speed or multiple stylus systems.
- * Scale in use is indicated digitally and recorded on chart.
- * Large remote digital display available.

THE ROYAL INSTITUTE OF NAVIGATION

THE OBJECT of the Institute is to unite in one body those who are concerned with or who are interested in the science and art of navigation. Membership is not restricted to those who hold professional qualifications, but is open to others who wish to further the aims of the Institute.

By coordinating the knowledge and achievements of marine and air navigators, scientists and those associated with the development and production of navigational equipment, the work of the Institute is directed towards raising the standard of navigation. In the field of education it is the aim of the Institute to bring practical navigators into contact with teachers and research workers to increase a common appreciation of the issues involved. It is an object of the Institute to encourage research in equipment and methods; through its publications it gives a wide circulation to original work on navigation so that new developments and suggestions can be appreciated by those most directly concerned with them.

The activities of the Institute include the holding of monthly meetings to discuss specific problems, the publication of a Journal and of other works concerned with different aspects of navigation, and such other activities as the Council may deem necessary to promote knowledge in navigation and its associated sciences.

The *Journal of Navigation* is issued free to all Members and contains a full account of the Institute's proceedings. It prints the papers which are presented at meetings, together with their ensuing discussion, and other original papers contributing to the science of navigation. It also contains a record of current navigational work, reviews of important books, and general papers of interest to navigators and those with similar interests.

The work of the Institute is coordinated with that of similar societies abroad, whose proceedings are available to members.

Membership. There are five classes of membership of the Institute:

(1) HONORARY MEMBERS, who shall be distinguished persons upon whom the Council may see fit to confer an honorary distinction.

(2) FELLOWS, who shall be members, of at least three years' standing who, in the opinion of the Council, have made a contribution of value to navigation.

(3) MEMBERS, who shall be persons over twenty-one years of age who can satisfy the Council of their interest in navigation.

(4) STUDENT MEMBERS, who shall be persons under twenty-five years of age studying with a view to making navigation, or an allied interest, their career.

(5) CORPORATE MEMBERS, who shall be companies, universities, navigation schools, government departments and other organizations, here and abroad, who are directly or indirectly interested in the science of navigation. Corporate Members are entitled to send representative to all Institute meetings and to receive six copies of the *Journal*, and other publications. They are encouraged to take an active part in the Institute's work. Applications should be sent by letter addressed to the Director.

Subscriptions. Annual subscriptions to the Institute are payable in advance as follows:

| | |
|-------------------------------|---------|
| Members and Fellows | £21.00 |
| Student Members | £7.00 |
| Corporate Members | £140.00 |

The Institute's financial year begins on 1 July. Members in any category who are elected after 1 January in any year are only due for one half of their subscription until 1 July, when the full subscription for the next year becomes due.
