The Industrious Revolution

Consumer Behavior and the Household Economy, 1650 to the Present

Jan de Vries

University of California, Berkeley

\$80.00: Hardback: 978-0521-89502-6: 344 pp.

\$22.99: Paperback: 978-0521-71925-4

"The Industrious Revolution is by turns fascinating, provocative, and illuminating"

– John Brewer, California Institute of Technology

"One of the most accomplished and influential economic historians of our age has produced a magisterial work that will force the entire profession to rethink the history of the household, work, leisure, and consumption in Europe over three centuries...The "Industrious Revolution" will be discussed and taught for many years."

– Joel Mokyr, Northwestern University

"De Vries is a masterly and imaginative historian, who demonstrates enduring regularities behind the craving for goods over the last three centuries"

– Avner Offer, All Souls College, University of Oxford

In the long eighteenth century, new consumer aspirations combined with a new industrious behavior to fundamentally alter the material cultures of northwest Europe and North America. This "industrious revolution" is the context in which the economic acceleration associated with the Industrial Revolution took shape. This study explores the intellectual understanding of the new importance of consumer goods as well as the actual consumer behavior of households of all income levels. De Vries examines how the activation and evolution of consumer demand shaped the course of economic development, situating consumer behavior in the context of the household economy. He considers the changing consumption goals of households from the seventeenth century to the present and analyzes how household decisions have mediated between macro-level economic growth and actual human betterment. Ultimately, de Vries' research reveals key strengths and weaknesses of existing consumer theory, suggesting revisions that add historical realism to economic abstractions.

CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

In the spirit of Cambridge University Press's continued commitment to innovation and enterprise, the Cambridge Library Collection will launch in July 2009, making an initial group of 475 out-of-print books available again. Another 1,000 will follow by the end of 2009 and 3,000 titles a year will be added as the program continues.

Drawing from the world-renowned collections in the Cambridge University Library, these books are carefully selected by experts in each subject area because of their scholarly importance or as landmarks in the history of their academic discipline.

Cambridge University Press is using state-of-the-art scanning machines to capture the contents of each book. The files are processed to give a consistently clear, crisp image, and the books finished to the high-quality standard for which the press is recognized around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely.

The Cambridge Library Collection will revive books of enduring scholarly value across a wide range of disciplines in the humanities, social sciences, science and technology.
