ELIXIR GABAIL

(BROMO-VALERIANATE)

The Ideal Sedative in all Nervous Affections

Elixir Gabail combines the sedative action of Strontium Bromide and Chloral Hydrate with the nervine and anti-spasmodic deodorised Valerianate. Pharmaceutically it is as pleasant and palatable as it is efficacious from the therapeutic standpoint, the disagreeable odour and flavour of the Valerian having been completely removed without in any way impairing its therapeutic value.

In Hysteria and Psychasthenia it relieves nervous excitement and produces a calm state of mind that is conducive to rapid recovery. It is also of value in states of temporary emotional excitement,
in Hypochondriasis and Melancholia.

Dosage: One tablespoonful in water twice or thrice daily. As a hypnotic: two tablespoonfuls in water at bedtime.

Supplied in bottles of 187 c.c. and in bulk for Hospital use.

Literature and Samples on request.

The proposal to award Divisional Prizes under the conditions set out below emanated from the Irish Division and was adopted at the Annual Meeting held on July 13, 1911.

(1) Two prizes of £10 and £5 respectively will be awarded annually by the Association (provided sufficient merit be shown) for the best paper read during the preceding calendar year at a Divisional Meeting by an Assistant Medical Officer or Assistant Physician in a Psychiatric or Neurological Institution or Service. (7) Papers by more than one author can be entered and any prize awarded will be divided among the authors.

(8) If in any competitive year, one or two papers only are submitted for competition the Council may withhold either or both prizes; or it may, after considering the report of the Adjudicator, and if in its opinion the paper or papers are of outstanding merit, award a first or second or both prizes, at its discretion.
