THE JOURNAL OF PHYSIOLOGY

Published for the Physiological Society

Chairman of the Editorial Board:

A. V. Edwards, University of Cambridge

This internationally respected journal publishes high quality papers representing original experimental work in three areas: general physiology, mammalian physiology, and human physiology. Each hardbound monthly volume of *The Journal of Physiology* is concerned with respiration, circulation, excretion, reproduction, digestion, homeostasis, and particularly neurophysiology and muscular contraction. Abstracts of scientific meetings of the Physiological Society, which are accepted by the members present at those meetings, are also published. A Cumulative Subject and Author Index is produced triennially and an Annual Index is produced in the intervening years.

Selected papers:

Inhibitory interactions in the human vision system revealed in pattern-evoked potentials, *David C. Burr & M. Concetta Morrone*

Maturation of the respiratory response to acute hypoxia in the newborn rat, *G. J. Eden & M. A. Hanson*

Effects of cell volume changes on membrane ionic permeabilities and sodium transport in frog skin, *P. M. F. Costa, P. L. Fernandes, H. G. Ferreira, Karin T. G. Ferreira & F. Giraldez*

The nutritional regulation of plasma prostaglandin E concentrations in the fetus and pregnant ewe during late gestation, *A. L. Fowden, R. Harding, M. M. Ralph & G. D. Thorburn*

The Journal of Physiology (ISSN 0022-3751) is published 13 times in 1988. Subscription (US and Canada only) to Volumes 395-407: \$1200.00 per year; \$106.00 per volume.

Back Volumes: 254-394 (1976-1987) \$115.00 each.

CONTENTS

- KATHERINE V. FITE 1 Editorial: Visual neuroscience
- Research Articles*
- LEONARD KASS AND GEORGE H. RENNIGER 3 Circadian change in function of *Limulus* ventral photoreceptors
- STEPHEN YAZULLA AND CHARLES L. ZUCKER 13 Synaptic organization of dopoaminergic interplexiform cells in the goldfish retina
- MICHAEL W. LEVINE, EDWARD J. SALEH, AND PAUL R. YARNOLD 31 Statistical properties of the maintained discharge of chemically isolated ganglion cells in goldfish retina
- HELGA KOLB, IDO PERLMAN, AND RICHARD A. NORMANN 47 Neural organization of the retina of the turtle *Mauremys caspica*: a light microscope and Golgi study
- RODRIGO O. KULJIS AND HARVEY J. KARTEN 73 Neuroactive peptides as markers of retinal ganglion cell populations that differ in anatomical organization and function
- CAROLINE KERTZMAN AND WILLIAM HODOS 83 Size-difference thresholds after lesions of thalamic visual nuclei in pigeons
- PRESTON E. GARRAGHTY, CARLA J. SHATZ, AND MRIGANKA SUR 93 Prenatal disruption of binocular interactions creates novel lamination in the cat's lateral geniculate nucleus
- EDWARD A. LACHICA AND VIVIEN A. CASAGRANDE 103 Development of primate retinogeniculate axon arbors
- JAMES R. WILSON AND ANITA E. HENDRICKSON 125 Serotonergic axons in the monkey's lateral geniculate nucleus
- JAMES T. MCILWAIN 135 Saccadic eye movements evoked by electrical stimulation of the cat's visual cortex
- Short Communication*
- VANCE ZEMON, JAMES GORDON, AND JANET WELCH 145 Asymmetries in ON and OFF visual pathways of humans revealed using *contrast-evoked* cortical potentials
- 151 Detailed Information for Contributors
- 152 The Humane Care and Use of Animals
