NOTICE

The International Commission on Zoological Nomenclature has received the following application, which was published in the *Bulletin of Zoological Nomenclature*, Volume 45, Part 4, 16 December 1988. Comment or advice on it would be welcomed, and comments would be published in the *Bulletin of Zoological Nomenclature*.

Case no. 2663, *Orbitolina* d'Orbigny, 1850 (Foraminiferida): proposed confirmation of *Orbulites concava* Lamarck, 1816 as the type species.

Abstract. The purpose of this application is the confirmation of the nominal species *Orbulites concava* Lamarck, 1816 as type species of *Orbitolina* d'Orbigny, 1850. The first type species designated is now known to be a coral, but the designation supported here maintains the Tethyan, Cretaceous foraminiferal genus *Orbitolina* in its established meaning.
