

NEW SERIES ANNOUNCEMENT

THE CORRESPONDENCE OF *John Tyndall*

GENERAL EDITORS

James Elwick, York University | Roland Jackson, The Royal Institution
Bernard Lightman, York University | Michael S. Reidy, Montana State University

The University of Pittsburgh Press is pleased to announce its new role as publisher of *The Correspondence of John Tyndall*, a 19-volume series that will make available for the first time in print some 7,700 letters to and from Tyndall, one of the most influential scientists and premier physicists of the Victorian era.

Tyndall's correspondents read like a who's who of international science, including Michael Faraday, Charles Darwin, Thomas Huxley, Joseph Henry, Rudolf Clausius, and Louis Pasteur. An intense study of his correspondence illuminates themes that individually and collectively played fundamental roles in the development of modern science: the relationship between science and religion, the popularization and professionalization of science, and advances in physics, glaciology, climatology, and the germ theory.

"Correspondence projects like this one undoubtedly provide rich materials for future historians—and raise a host of new questions that we might not previously have even thought to ask."

New Launch in 2016

BJHS Themes

Published for the British Society for the History of Science

A new peer-reviewed, open access, thematic journal for the history of science

Editor

Jon Agar, *University College London, UK*

BJHS Themes is a collaborative venture between the British Society for the History of Science and Cambridge University Press aimed at establishing the first fully open access journal for the history of science community. It aims to publish open access, high-quality, scholarly, engaging collections of history of science papers, which address provocative themes, and which will be free for readers and offer no financial barrier to publication for authors. Like its sister publication, *British Journal for the History of Science*, *BJHS Themes* is a journal of the British Society for the History of Science, a major learned society for its subject.

The 1st volume will be '*Intersections: Science and Technology in Twentieth Century China and India*', a focus on a history of science and technology in China and India, which will be convened by historians Jahnvi Phalkey and Tong Lam. It will be published in early 2016.
