Nomonhan *Japan Against Russia, 1939*

Alvin D. Coox. This monumental two-volume work is the first in any language to describe fully the fierce undeclared war fought by Japan and the Soviet Union on the Manchurian border in 1939. Both sides committed tens of thousands of troops and hundreds of tanks and airplanes. As an opportunity to test new kinds of military armaments and strategies, this little-known war was the Spanish Civil War of East Asia. In the end, the Soviet army under General (later Marshal) Zhukov won a decisive victory, and the repercussions were enormous: Japan turned its attention toward easier targets in Southeast Asia and the Pacific, inevitably leading to Pearl Harbor, and Russia never again had to face a serious threat of war on two fronts. Based on 30 years of research and hundreds of interviews, this work also provides the Japanese background to the war and a complete history of the Kwantung Army. Illustrated with 88 photographs, 8 maps, and endpaper maps. The set, \$95.00

The Jews of Odessa *A Cultural History, 1794-1881*

Steven J. Zipperstein. Founded in 1794 as a frontier city on the Black Sea, Odessa soon became one of Russia's busiest seaports and its Jewish community grew into one of the largest, wealthiest, and most culturally fertile in Europe. This first history of Jewish Odessa in any language traces the rise of Odessa's Jewish community from the earliest days to the pogroms of 1881 that erupted after the assassination of Alexander II. The author emphasizes the acculturation of the Jewish community, describing changes in behavior, attitude, and ideology as reflected in its schools, synagogues, newspapers, and other institutions. During the period covered, patterns were set that continued to affect the community's cultural development well into the second decade of the 20th century. This study leads to a better understanding of the great diversity of the Russian Jewish experience. \$27.50
