

INDEX OF SUBJECTS.

	PAGE
Abrin, action of acids and alkalies on	139
Ague, geographical distribution of in England	4
„ see also Malaria	
Air, method of determining carbonic acid in	109
<i>Anopheles</i> , geographical distribution of in England	4
„ mode of dissemination	5
„ seasonal prevalence of in relation to malaria in Bengal ...	407
„ <i>maculipennis</i> , structure and biology of	45, 269, 451
Anti-bodies in serum	367
Anti-toxin, in checking outbreak of diphtheria	228, 485
<i>Bacillus coli</i> , detection of by neutral-red in water	430, 437
„ „ in river water	295
„ „ varieties of in typhoid and normal dejecta	202
<i>Bacillus diphtheriae</i>	85, 228, 235, 485
„ „ distribution of in healthy and affected throats	242, 495
„ „ in milk	85
„ „ morphology of	239
„ „ relation to pseudo-diphtheria bacillus	244, 494
<i>Bacillus pestis</i> , see Plague	
Bacillus, pseudo-diphtheria, distribution in healthy and affected throats ...	242
„ „ morphology	239
„ „ relation to diphtheria bacillus	244, 494
<i>Bacillus, pseudo-tuberculosis</i> , in milk	83
<i>Bacillus tuberculosis</i> , in milk	80
<i>Bacillus typhosus</i> , see Enteric Fever	
Bacteria, in milk	78, 391
„ in normal organs	277
<i>Bacterium diphtheroides</i> , in milk	87
Blood, specific serum tests for	367
Borax and Boric Acid, influence on metabolism in children	168
Carbonic Acid, determination of in air	109
Coal-gas, effects of ethylene in	123

	PAGE
Diphtheria, bacillus of in milk	85
" bacteriological investigation of outbreak at Cambridge	235, 485
" outbreak checked by anti-toxine and isolation	228, 485
" toxine, action of acids and alkalies on	139
" see also Bacillus	
Enteric Fever, milk-carried	422
" " varieties of <i>Bacillus coli</i> in dejecta of	202
Epidemic cerebro-spinal meningitis in India, etiology of	214
Ethylene, effects of inhalation	123
Fleas, influence of in spread of plague	162
Formaline, see Formic Aldehyde	
Formic Aldehyde, influence on metabolism in children	321
Graphic method, use of in tracing milk-carried scarlet fever	388
Haemoglobin, derivatives of in salted meat	115
Hospitals, isolation in scarlet fever	145
Hydrophobia, see Rabies	
Immunity in relation to modified toxines	125
Isolation hospitals in scarlet fever	145
Isolation in diphtheria	228, 490, 498
Lead-poisoning, industrial	96
Malaria, prophylaxis of	415
" seasonal prevalence in relation to <i>Anopheles</i> in Bengal	407
" studies in relation to	4, 45, 269, 451
" see also Ague, <i>Anopheles</i>	
Meat, red colour when salted	115
Meningitis, epidemic cerebro-spinal	214
Milk, <i>Bacillus tuberculosis</i> in	80
" bacterial contamination of	391
" enteric fever carried by	422
" pathogenic microbes in	78
" scarlet fever carried by	388
" see also Bacillus, Bacterium, Yeast	
Mosquito, see <i>Anopheles</i>	
Myers, Walter, memoir of (and portrait)	285
Neutral-red, use of for detecting <i>Bacillus coli</i> in water	430, 437
Pasteur Institute at Shanghai	260
Pettenkofer, Max von, the work of (and portrait)	289
Plague, etiology of	153

Index of Subjects

505

	PAGE
Pseudo-diphtheria bacillus, see Bacillus	
Pseudo-tuberculosis bacillus, see Bacillus	
<i>Pulex</i> , see Fleas	
Rabies, methods of treatment at Shanghai	263
Rats, influence of in spread of plague	162
Rhinitis, chronic membranous, in diphtheria	232
Ricin, action of hydrochloric acid on	138
Rivers, self-purification of	295
,, <i>Bacillus coli</i> in	295
Salted meat, red colour of	115
Scarlet Fever, carried by milk	385
" " isolation hospitals in	145
Serum, production of specific anti-bodies by injection of	367
Shanghai, Pasteur Institute	260
Streams, see Rivers	
<i>Streptococcus radiatus</i> (<i>pyogenes</i>) in milk	88
Tetanus toxine, action of acids and alkalies on	128
Toxines, artificial modifications of	125
Tuberculosis, bacillus of in milk	80
Typhoid Fever, see Enteric Fever	
Water, detection of <i>Bacillus coli</i> by neutral-red	430, 437
Water, see also Rivers	
Yeast (pathogenic), in milk	90
