## David Lloyd George and the British Labour Movement

C. J. WRIGLEY

This is the first full-length study of the crucial bond between organized labor and the man who, more than any other, won World War I by mobilizing the working classes to the war effort. Dr. Wrigley details Lloyd George's twenty-year career as President of the Board of Trade, Minister of Munitions, War Minister, and finally in 1916, as a Prime Minister who prosecuted the war vigorously, involving labor leaders at every level.

## Freedom and Stability in the World Economy

DOUGLAS EVANS and RICHARD BODY, editors

The swing to corporatism has left the industrial sectors of almost all western industrial societies in general disarray, according to this penetrating collection of articles. Producing evidence that the very feasibility of free market economies is threatened by a global pattern of interventionism by national and supranational governments, the editors go on to show that it is as essential to plan for a free market as it is for collectivist systems.

## Oil and Empire

*British Policy and Mesopotamian Oil 1900-1920*

MARIAN KENT

This important monograph focuses on the British government's machinations involving the Mesopotamian oil concession over a twenty-year period. The author demonstrates the catalyzing effect that concession had upon the evolution of a future British oil policy emphasizing the need to control both the sources of supply, and the suppliers of British oil.

## Black Death to the Industrial Revolution

*A Social and Economic History of England*

PAULINE GREGG

The long-awaited companion volume to *Social and Economic History of Britain from 1760-1972*, focuses on the transition from medieval to modern society, and on the economic developments which affected society during this period: the Black Death, the open field (or common field) village; the spectacular rise of the woollen cloth industry; iron smelting, mining and the manufacture of leather. Other chapters deal with the development of trade in both the Middle Ages and in the centuries of expansion, and with the inflation of Tudor and Stuart times—as baffling then as it is now.

# European Peasants and Their Markets

*Essays in Agrarian Economic History*

**Edited by William N. Parker and Eric L. Jones**

These essays discuss principal and much-debated issues in European agrarian history within the context of the general economic history of northwestern Europe. The authors endeavor to explain the phenomena with explicit use of economic reasoning, and several of the papers draw on fresh historical source materials. The use of economics provides a relevance beyond the specific historical context, at the same time making possible a broader understanding of the reasons for the persistence, spread, and variation of certain peasant practices and forms of organization. \$16.50

## **Fascism: A Reader's Guide**

Analysis, Interpretations,  
and Bibliography

**Edited by Walter Laqueur**

Despite the three decades that have passed since the end of the second world war, fascism remains a subject of heated controversy. Here, in what is undoubtedly the definitive treatment of fascism, thirteen authorities provide both a much-needed reference handbook and an original work of synthesis and new interpretation.

## **Partner in Empire**

Dwarkanath Tagore and  
the Age of Enterprise  
in Eastern India  
**Blair B. Kling**

Dwarkanath Tagore was the leading entrepreneur of eastern India in the first half of the nineteenth century. Kling illuminates the "age of enterprise" by examining it on all levels. His book is the first full-length biography of Tagore in English and the first study of the economic foundations of the cultural renaissance in Bengal that started India on her long road toward nationhood.

# Perspectives on Technology

Here is a volume that everyone interested in economic history will want for his personal library—a fine collection of papers by the former editor of *The Journal of Economic History* and leading historian of American technological development.

The collection is selected from Professor Rosenberg's writings since the early 1960's, some of them never before published and all of them in his lively, challenging style.

A unique study of the role of technological change in generating economic growth, the fifteen papers are grouped under four main topics: "Early Stages of Technology," "Social Factors," "Diffusion and Adaptation of Technology," and "Natural Resources—Environment and Technology."
