

NOTES FOR AUTHORS

Submitting a paper

Full details on submitting a paper, including the style guide and L^AT_EX class file and macro package, can be found at <https://www.cambridge.org/core/journals/proceedings-of-the-royal-society-of-edinburgh-section-a-mathematics/information/instructions-contributors>

Proceedings of the Royal Society of Edinburgh: Section A considers for publication papers in all areas of mathematics. Please note that this journal does not consider simultaneous submissions from the same author.

- Authors will be asked to state the primary AMS 2010 Classification Number and between three and six keywords.
- Authors should nominate the most appropriate Editor for their paper.
- It is assumed that the author uploading the paper will be responsible for correspondence. A paper by more than one author should be approved in its entirety by the joint authors. An acknowledgement e-mail will be sent to all authors.
- Proceedings A has a page limit of 25pp but may consider papers up to five pages longer to allow for variation in final typeset length. Authors must prepare their papers as concisely as possible. Longer papers can be difficult to review in a reasonable time and can be judged more harshly.
- Each paper must be accompanied by an abstract, in general not exceeding 200 words, which will be printed.
- References should be listed at the end of the paper in alphabetical order, numbered sequentially. References within the text should be indicated by numbers in square brackets.

To submit your paper visit https://rse.msp.org/submit_new.php?jpath=rse_proc_a_math and follow the instructions for uploading.

Once a paper has been accepted for publication, authors will be asked to supply the appropriate file. This should be a single file, with any relevant macros included in the preamble, and named after the article reference number (e.g. 150421-authorname.tex). Figures should be submitted as eps or pdf files at the same time as the code for the paper. Detailed instructions will be given on acceptance.

Language

We recommend that non-English-speaking authors have their manuscripts checked by an English language native speaker before submission, to ensure that submissions are judged exclusively on academic merit. Third-party services specialising in language editing and/or translation can be found here: <https://www.cambridge.org/core/services/authors/language-services>. Use of any of these services is voluntary, and at the authors' own expense.

Proofs and offprints

Authors will be sent proofs of their paper by e-mail in pdf format for checking. A pdf of the final 'publisher's version' of the paper will be sent to the corresponding author shortly after print publication in lieu of hard copy offprints.

Copyright/Open Access

The RSE now operates a 'hybrid' Open Access model for its journals, for accepted papers submitted on or after 1 April 2013. On acceptance, authors will be given the option of having their paper published **either** under a regular publication agreement **or** under a fully Open Access agreement. Under the regular publication option, authors will be asked to sign the Journal's standard transfer of copyright form.

If authors choose the Open Access option, they will be asked to sign the alternative Open Access form and, upon payment of a one-off Article Processing Charge of UK£2320/US\$3450 (in 2024) the final published Version of Record shall be made freely available to all in perpetuity, and will be published under a creative commons licence, enabling its free re-use and re-distribution.

Please note that publication under a fully Open Access agreement is part of the Cambridge Open option. (For more details, please see: <https://www.cambridge.org/core/services/open-access-policies>)

Authors are also asked to ensure that any electronic versions of their paper clearly state the official place of publication.

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, papers published in *Proceedings A* may only be reproduced, stored or transmitted with the prior permission of the copyright holder, or, in the case of reprographic reproduction, in accordance with the terms of a licence issued by the Copyright Licensing Agency. The Society permits the making of a single photocopy of an article from an issue (under Sections 29 & 38 of the Act) for an individual for the purposes of research or private study.

Part 2

CONTENTS

MENGDA WU AND YONGHUI XIA	
Is the Sacker–Sell type spectrum equal to the contractible set?	353–380
CLAUDIO A. GALLEGOS AND GONZALO ROBLEDO	
On stability for generalized linear differential equations and applications to impulsive systems	381–407
MILTADIS PASCHALIS	
Shape sensitivity of the Hardy constant involving the distance from a boundary submanifold	408–423
HAMID EL BAHJA	
Existence of weak solutions to an anisotropic parabolic–parabolic chemotaxis system	424–444
CHUNHUA JIN	
Global classical solution to the chemotaxis–Navier–Stokes system with some realistic boundary conditions	445–482
MUNAYIM DILXAT, LIANGYUN CHEN AND DONG LIU	
Classification of simple Harish–Chandra modules over the Ovsienko–Roger superalgebra	483–493
LILIANE MAIA, EDERSON MOREIRA DOS SANTOS AND GABRIELLE NORNBORG	
Radial solvability for Pucci–Lane–Emden systems in annuli	494–507
SILVANO DELLADIO	
Involutivity of distributions at points of superdense tangency with respect to normal currents	508–524
HAILONG ZHU	
Robustness of nonuniform mean-square exponential dichotomies	525–567
SYLVIA NOVO, RAFAEL OBAYA, ANA M. SANZ AND VÍCTOR M. VILLARRAGUT	
The exponential ordering for nonautonomous delay systems with applications to compartmental Nicholson systems	568–599
ÁLVARO CASTAÑEDA AND NÉSTOR JARA	
A note on the differentiability of discrete Palmer’s linearization	600–628
LEI LI, XUEPING LI AND MINGXIN WANG	
The monostable cooperative system with nonlocal diffusion and free boundaries	629–659
ZHIWEN ZHAO	
Convergence for the fractional p -Laplacian and its application to the extended Nirenberg problem	660–672
