The Fabrician Types of Insects in  
the Hunterian Collection at Glasgow  
University. Coleoptera, Part I

By R. A. STAIG, M.A.

WITH 28 PLATES IN COLOUR. DEMY 8VO. 25s. NET

The collection of insects here described was made by Dr William Hunter in the eighteenth century. The particular interest of the collection is mainly due to the fact that many of the specimens are the types of insect species founded by Johann Fabricius, the great pioneer of Systematic Entomology.

A Text-Book of  
**Agricultural Entomology**

By KENNETH M. SMITH, D.Sc.

WITH A FRONTISPIECE AND 79 TEXT-FIGURES. DEMY 8VO. 12s. 6d. NET

The need for an up-to-date text-book on this subject has long been felt, for the few modern books dealing with insect pests of farm crops in Great Britain are elementary in character. This book is designed for the use of the agriculturist as well as of the agricultural entomologist.
