

# THE JOURNAL OF ANIMAL ECOLOGY

(World-list abbreviation: *J. Anim. Ecol.*)

EDITORS: L. R. Taylor and J. M. Elliott

## CONTENTS

Volume 49 Number 2 June 1980

- N. Gilbert.** Comparative dynamics of a single-host aphid. I. The evidence  
**N. Gilbert.** Comparative dynamics of a single-host aphid. II. Theoretical consequences  
**G. J. Skinner.** Territory, trail structure and activity patterns in the wood-ant, *Formica rufa* (Hymenoptera: Formicidae), in limestone woodland in north-west England  
**N. Waloff and P. Thompson.** Census data of populations of some leafhoppers (Auchenorrhyncha, Homoptera) of acidic grassland  
**G. J. Skinner.** The feeding habits of the wood-ant, *Formica rufa* (Hymenoptera: Formicidae) in limestone woodland in north-west England  
**Y. H. Wang and A. P. Gutierrez.** An assessment of the use of stability analyses in population ecology  
**Terry D. Beacham.** Demography of declining populations of the vole, *Microtus townsendii*  
**G. R. Potts, J. C. Coulson and I. R. Deans.** Population dynamics and breeding success of the shag, *Phalacrocorax aristotelis*, on the Farne Islands, Northumberland  
**R. I. M. Dunbar.** Demographic and life history variables of a population of Gelada baboons (*Theropithecus gelada*)  
**C. J. Bibby and R. E. Green.** Foraging behaviour of migrant pied flycatchers, *Ficedula hypoleuca*, on temporary territories  
**Tore Slagsvold.** Habitat selection in birds: on the presence of other bird species with special regard to *Turdys pilaris*  
**R. W. Smith and J. B. Whittaker.** Factors affecting *Gastrophysa viridula* populations (Coleoptera: Chrysomelidae) in different habitats  
**Deborah A. Clark.** Age- and sex-dependent foraging strategies of a small mammalian omnivore  
**Jonathan Adams.** The role of competition in the population dynamics of a freshwater flatworm, *Bdellocephala punctata* (Turbellaria, Tricladida)  
**J. S. Welton and R. T. Clarke.** Laboratory studies on the reproduction and growth of the amphipod, *Gammarus pulex*  
**Paul D. N. Hebert.** Moth communities in montane Papua New Guinea  
**Michael P. Hassell.** Foraging strategies, population models and biological control: a case study  
**R. E. Jones, N. Gilbert, M. Guppy and V. Nealis.** Long distance movement of *Pieris rapae*  
**U. H. Humpesch and J. M. Elliott.** Effect of temperature on the hatching time of eggs of three *Rhithrogena* spp. (Ephemeroptera) from Austrian streams and an English stream and river  
Reviews

The Journal is published three times a year. The subscription price to non-members of the British Ecological Society is £42.00 (overseas, £51.00; U.S.A. and Canada \$127.50, including cost of airfreight) per volume. All back numbers are available. Enquiries and orders should be sent to the publishers.

# THE MARINE BIOLOGICAL ASSOCIATION OF THE UNITED KINGDOM

THE ASSOCIATION was founded in 1884 to promote accurate researches leading to the advancement of zoological and botanical science and to an increase in our knowledge of the food, life, conditions and habits of British fishes. The work of the Association is controlled by a Council elected annually by its subscribing members.

Professor T. H. Huxley took the chair at the initial meeting held in the rooms of the Royal Society and was elected the first President. Among those present were Sir John Lubbock (afterwards Lord Avebury), Sir Joseph Hooker, Professor H. N. Moseley, Mr G. J. Romanes, and Sir E. Ray Lankester who, after Professor Huxley, was for many years president of the Association. It was decided to build a laboratory at Plymouth, where a rich and varied fauna is found.

The Plymouth Laboratory was opened in June 1888, and, since that date, considerable additions have been made to the buildings, including a library, lecture-hall, and extensive laboratory accommodation with up-to-date equipment. Additional sea-water reservoirs have also been built, and an aquarium, modernized in 1959, opened to the public.

Since its foundation the Association has been supported by subscriptions and donations from private members, universities, learned societies, the Fishmongers' Company and other public bodies. For some time past, however, the main financial support for the work of the Plymouth Laboratory has come from Government funds, and since 1965 the Laboratory has been grant-aided through the Natural Environment Research Council.

The Marine Biological Association, under the direction of its Council, undertakes research in all branches of marine science and the main results are published in this journal. Accounts of the laboratory and aquarium are to be found in Vol. 27 (p. 761), Vol. 39 (p. 391) and Vol. 43 (p. 281), and summaries of the activities and research of the Association are given annually in the Report of the Council in the November issue of the Journal.

The laboratory is open throughout the year and its work is carried out by a fully qualified research staff under the supervision of the Director. The names of the members of the staff will be found on the inner page of the front cover. Accommodation is available for British and foreign scientific workers who wish to carry out independent research in all branches of marine science. Arrangements are made for courses for advanced students, and marine animals and plants are supplied to educational institutions.

Work at sea is undertaken by three research vessels and by a motor boat, and these also collect the specimens required in the laboratory.

## TERMS OF MEMBERSHIP

	£
Annual Members, receiving the Journal . . . per annum	10.00
Annual Members, without the Journal . . . per annum	2.00
Founders . . . . .	100.00
Governors . . . . .	500.00

Annual subscriptions become due on 1 January.

Members of the Association have the following rights and privileges: they elect annually the Officers and Council; they are entitled to receive the Journal of the Association at a reduced rate; they are admitted to view the laboratory at Plymouth; they have the first claim to rent a place in the laboratory for research, with use of tanks, boats, etc.; they have the privilege of occupying a table for one week in each year free of charge; and they have access to the books in the library at Plymouth during working hours.

The Commissioners of Inland Revenue have approved the Association for the purposes of Section 16, Finance Act, 1958, and that the whole of the annual subscription paid by a member who qualifies for relief under the section will be allowable as a deduction from his emoluments assessable to income tax under Schedule E.

All correspondence should be addressed to the Director, The Laboratory, Citadel Hill, Plymouth, PL1 2PB.

## CONTENTS

	PAGE
CRAGG, S. M. Swimming behaviour of the larvae of <i>Pecten maximus</i> (L.) (Bivalvia)	551
GAFFNEY, P. M. On the number of <i>Patella</i> species in south-west England	565
GEORGE, S. G. and PIRIE, B. J. S. Metabolism of zinc in the mussel, <i>Mytilus edulis</i> (L.): a combined ultrastructural and biochemical study	575
HUGHES, R. N. and ROBERTS, D. J. Growth and reproductive rates of <i>Littorina neritoides</i> (L.) in North Wales	591
LE PENNEC, M. The larval and post-larval hinge of some families of bivalve molluscs	601
BONE, Q. and HOWARTH, J. V. The role of L-glutamate in neuromuscular transmission in some molluscs	619
BINYON, J. Osmotic and hydrostatic permeability of the integument of the starfish <i>Asterias rubens</i> L.	627
BUCHANAN, J. B., BROWN, B. E., COOMBS, T. L., PIRIE, B. J. S. and ALLEN, J. A. The accumulation of ferric iron in the guts of some spatangoid echinoderms	631
BRYAN, G. W. and GIBBS, P. E. Metals in nereid polychaetes: the contribution of metals in the jaws to the total body burden	641
DIXON, D. R. The energetics of tube production by <i>Mercierella enigmatica</i> (Polychaeta: Serpulidae)	655
PYBUS, C. Observations on a <i>Gyrodinium aureolum</i> (Dinophyta) bloom off the south coast of Ireland	661
ROBINSON, G. A., BUDD, T. D., JOHN, A. W. G. and REID, P. C. <i>Coscinodiscus nobilis</i> (Grunow) in continuous plankton records, 1977-78	675
SCOTT, J. M. Effect of growth rate of the food alga on the growth/ingestion efficiency of a marine herbivore	681
BEST, A. C. G. and GRAY, J. A. B. Morphology of the utricular recess in the sprat	703
DENTON, E. J. and GRAY, J. A. B. Receptor activity in the utriculus of the sprat	717
DANDO, P. R. and LING, R. Freeze-branding of flatfish: flounder, <i>Platichthys flesus</i> , and plaice, <i>Pleuronectes platessa</i>	741
FIVES, J. M. An account of the eggs and developmental stages of Montagu's blenny, <i>Coryphoblennius galerita</i> (L.), with notes on the reproductive behaviour of the adults	749
VOLKMAN, J. K., GATTEN, R. R. and SARGENT, J. R. Composition and origin of milky water in the North Sea	759
WALKER, T. A. A correction to the Poole and Atkins Secchi disc/light-attenuation formula	769
WILLIAMS, J. A. The light-response rhythm and seasonal entrainment of the endogenous circadian locomotor rhythm of <i>Talitrus saltator</i> (Crustacea: Amphipoda)	773
DANDO, P. R. and SOUTHWARD, A. J. A new species of <i>Chthamalus</i> (Crustacea: Cirripedia) characterized by enzyme electrophoresis and shell morphology: with a revision of other species of <i>Chthamalus</i> from the western shores of the Atlantic Ocean	787
SHORT NOTE	
METTAM, C. On the feeding habits of <i>Aphrodita aculeata</i> and commensal polynoids	833
ABSTRACTS OF MEMOIRS	835
BOOK NOTICES	839
