#### SERENGETI SURVEY FAO WILD LIFE RESEARCH PROJECT IN TANGANYIKA

Serengeti National Park, February, 1962. The Food and Agriculture Organization of the United Nations (FAO) recently launched a research project aimed at assessing the wild life resources of this region. The conservation of wild life for tourism and the production of animal protein through game management are the ultimate objects of the FAO project. Dr. Jacques Verschuren (Belgium), leader of the FAO team in Serengeti, is seen here (left) with two Tanganyikan assistants looking over Olduvai Gorge, where many prehistoric fossils have been found.

*Photo by M. H. Woodford.*

“TOMATUM”

*Frontispiece*

One of the three Arabian Oryx brought from Arabia by “Operation Oryx” in order to save the species from extermination. This picture in full colour is the Society’s Christmas Card for 1962.
