

## CONTENTS OF No. 407, AUGUST 1997

page

### *Intraplate Alkaline Magmatism*

- M. HODSON: Post-crystallisation modification of the igneous layering in the Nunarssuit and West K ngn t syenites, South Greenland 467
- H. S RENSEN: The agpaitic rocks – an overview 485
- T. ANDERSEN: Age and petrogenesis of the Qassiarsuk carbonatite-alkaline silicate volcanic complex in the Gardar rift, South Greenland 499
- N. J. G. PEARCE, M. J. LENG, C. H. EMELEUS and C. M. BEDFORD: The origins of carbonatites and related rocks from the Gr nnedal- ka Nepheline Syenite complex, South Greenland: C-O-Sr isotope evidence 515
- M. J. LE BAS, B. SPIRO and YANG XUEMING: Oxygen, carbon and strontium isotope study of the carbonatitic dolomite host of the Bayan Obo Fe-Nb-REE deposit, Inner Mongolia, N China 531
- J. B. DAWSON: Neogene–Recent rifting and volcanism in northern Tanzania: relevance for comparisons between the Gardar province and the East African Rift valley 543
- L. N. KOGARKO: Role of CO<sub>2</sub> on differentiation of ultramafic alkaline series: liquid immiscibility in carbonate-bearing phonolitic dykes (Polar Siberia) 549

### *Petrology*

- R. N. THOMPSON, D. VELDE, P. T. LEAT, M. A. MORRISON, J. G. MITCHELL, A. P. DICKIN and S. A. GIBSON: Oligocene lamproite containing an Al-poor, Ti-rich biotite, Middle Park, northwest Colorado, USA 557

### *Mineralogy*

- T. WAGNER and N. J. COOK: Mineral reactions in sulphide systems as indicators of evolving fluid geochemistry – a case study from the Apollo mine, Siegerland, FRG 573
- C. L. LENGAUER, G. GIESTER and E. TILLMANN: Mineralogical characterization of paulingite from Vinarick  Hora, Czech Republic 591

### *Short Communication*

- D. VISSER, R. O. FELIUS and M. MOREE: Augelite and cerian crandallite in dumortierite quartzites, Vaca Morta quarry, Vereda range, Maca bas, Bahia, Brazil 607
