

A Geology for Engineers

By F. G. H. BLYTH, M.Sc., A.C.G.I., D.I.C., F.G.S., Lecturer in Engineering Geology at the Imperial College of Science and Technology, London. viii + 330 pages, 141 diagrams. 16 plates. Published 18th October, 1945.

This book first appeared in 1943 and was immediately successful. In this new edition fresh material has been inserted, mainly in the first chapter, on rivers and alluvium, marine action and coastal works, and glacial deposits. Of the first edition *The Surveyor* said: "Apart from its suitability for the instruction of students, no book of like size could be expected to provide for engineers a better or more comprehensive exposition of geology and its application to engineering."
