Articles

AUTHOR(S)	TITLE	PAGE
Jack Abramsky	Why Britain needs a national mathematics discovery centre	193
Sadi Abu-Saymeh, Mowaffaq Hajja	More variations on Nagel and Gergonne analogues of the Steiner-Lehmus theorem	292
Sadi Abu-Saymeh, Mowaffaq Hajja	A generalisation of a theorem of al-Kuhi	460
Necdet Batir, Sevda Atpinar	An extension of a curious binomial identity of Simons	270
A. F. Beardon	Singular matrices and pairwise-tangent circles	12
Peter Braza	Dependence of events, revisited	257
Jeff Brown	Sudoku strategies using graph theory	275
Nira Chamberlain	Mathematics is indisputably the greatest subject in the World	385
Tony Crilly	Narayana's integer sequence revisited	262
Subhranil De	A slowly evolving conical pendulum	105
Subhranil De	A provocative tale of unwinding	225
Nikolaos Dergiades, Quang Hung Tran	Extensions of Vittas' Theorem	53
Lorenzo Di Biagio	The first derivative test and the classification of stationary points	407
Stan Dolan	The Eureka theorem of Gauss	94
François Dubeau	Algebraic and geometric definitions of the cross product: the link	470

https://doi.org/10.1017/mag.2024.155 Published online by Cambridge University Press

AUTHOR(S)	TITLE	PAGE
David L. Farnsworth, Steven J. Kilner	Relating constructions and properties through duality	27
Russell A. Gordon	Inverse tangent series via telescoping sums	419
Adam Graham-Squire, David McCune	Paradoxical oddities in two multiwinner elections from Scotland	492
Jonny Griffiths	ABC-triangles	78
Robert Heffernan, Nick Lord, Des MacHale	Euler's prime-producing polynomial revisited	69
G. J. O. Jameson	Equally spaced squares and some impossible identities	201
G. J. O. Jameson	Recursive averages and the renewal theorem	437
Michael Jewess	$xy = \cos(x + y)$ and other implicit equations that are surprisingly easy to plot	1
Damjan Kobal	Reciprocally related primes	450
Panagiotis T. Krasopoulos	Another generalisation of Stewart's Theorem	478
Nick Lord, Des MacHale	Infinitely many composites	20
Martin Lukarevski	Three discs for the Mittenpunkt	209
John D. Mahony	Viva 'Vis-viva'	248
John D. Mahony	The next number in the sequence	399
František Marko, Semyon Litvinov	A geometric proof of the binomial identity	430
Toshio Nakata	Large deviations and fairness for a betting game with a constant ratio of capital	237
Chris Ottewill	The role of convexity in defining regular polyhedra	61
Silvano Rossetto, Giovanni Vincenzi	A characterisation of regular n-gons via (in)commensurability	43
David Seppala-Holtzman	The optimal tennis serve: a mathematical model	393
Manija Shahali, H. A. Shahali	Walk on a grid	111
Howard Sporn	Patterns among square roots of the 2×2 identity matrix	84
Howard Sporn	Pythagorean triples using the relativistic velocity addition formula	219
Ian Stewart	Sums of distinct fifth roots of unity and the regular dodecahedron	484
Quang Hung Tran	Some generalisations and extensions of a remarkable geometry puzzle	36
Quang Hung Tran	An asymmetric propellor with squares, and some extensions	283

Matter for Debate

Paul Belcher	Definitions for outliers in two-dimensional and higher-dimensional data	507

https://doi.org/10.1017/mag.2024.155 Published online by Cambridge University Press

Obituary

Adam McBride Tony Gardiner 303

An Appreciation

The Editor Nick Lord 362

Notes

March 108.01 – 108.18
July 108.19 – 108.35
November 108.36– 108.47

AUTHOR	NO.	TITLE	PAGE
Amrit Awasthi	108.15	The Madhava-Leibniz theorem	149
Hazar Aydin	108.06	Simple bounds on a sum pertinent to primes	135
A. F. Beardon	108.32	Point masses and polygons	342
Alan Beardon	108.47	Thoughts on the Fermat point of a triangle	536
Árpád Bényi	108.41	Diophantine approximations for a class of recursive sequences	518
Karl Bushnell	108.44	Expressing the area of a circle in terms of line segments of perpendicular chords	528
Günhan Caglayan	108.24	Covering a triangular number with heptagonal numbers	325
Bikash Chakraborty	108.09	A visual proof that $b^e < e^b$ when $b > e$	143
Bikash Chakraborty, Sagar Chakraborty	108.11	Euler's limit—revisited	144
Bikash Chakraborty	108.36	Visualising the sums of cubes by cutting and pasting	512
Bikash Chakraborty, Ritam Sinha	108.39	A quick proof that π is less than 2ϕ	514
Reza Farhadian, Vadim Ponomarenko	108.13	Indeterminate exponentials without tears	146
Reza Farhadian, Vadim Ponomarenko	108.27	More on the Euler limit for e	329
Reza Farhadian, Vadim Ponomarenko	108.29	A geometric mean–arithmetic mean ratio limit,	334
Terry S. Griggs	108.30	Nearly isosceles right-angled triangles and square triangular numbers	336
Shyam Sunder Gupta	108.04	Digital root analysis of Smith numbers	124
Mehdi Hassani	108.12	Proof without words: a lower bound for $n!$	146
Hans Humenberger, Franz Embacher	108.17	On a generalisation of the Lemoine axis	154
Tran Quang Hung, Michel Bataille	108.45	The golden section from three congruent semicircles	530
Tran Quang Hung	108.46	A generalisation of Fuss' theorem	532
G. J. O. Jameson	108.43	An alternating recursion: proof of a conjecture by Erik Vigren	524
O.A.S. Karamzadeh	108.20	Euler's totient theorem and Fermat's little theorem are generalisations of one another!	313
Richard Kaufman	108.19	Countable lists of rational numbers by removing digits	311
Rasul A. Khan	108.25	A pair of interesting inequalities for e^x	326
Alexander Kronberg	108.01	A use of Pythagorean triples in a problem in elementary geometry	118
Allan J. Kroopnick	108.40	A surprising coincidence between Pythagorean triples and an Euler-Cauchy differential equation	516
Francesco Laudano	108.31	Generalised Thales intercept theorem	338

https://doi.org/10.1017/mag.2024.155 Published online by Cambridge University Press

AUTHOR	NO.	TITLE	PAGE
Paul Levrie	108.21	An amazing quartet of integrals	316
Nick Lord	108.18	A one-line proof of the Finsler-Hadwiger inequality	158
Nick Lord	108.35	Analogues of the 12 pentagons theorem for other families of polyhedra	351
T. N. Lucas	108.07	De Moivre's theorem via difference equations	136
Martin Lukarevski	108.10	Proof without words: $\tan\frac{\pi}{12} = 2 - \sqrt{3}$, $\tan\frac{5\pi}{12} = 2 + \sqrt{3}$	143
Martin Lukarevski	108.34	One sharpening of the Garfunkel-Bankoff inequality and some applications	348
Des MacHale	108.33	Some inequalities for a triangle	345
Hossein Moshtagh	108.42	On matrices whose elements are integers with given determinant	521
Robin V. W. Murphy	108.22	The n days of Christmas and other series	321
Victor Oxman, Moshe Stupel	108.38	A number whose square root is the sum of its digits	513
Aldo Scimone	108.16	Golden triangles founded on Kepler's triangle	152
H. A. Shahali	108.03	Remarks on perfect powers	122
Allan J. Silberger	108.05	Ramanujan's proof of Bertrand's postulate	130
Angad Singh	108.08	Cone and Integral	140
Paul Stephenson	108.14	A triangle number identity	148
Paul Stephenson	108.23	A recurrence relation derived graphically	324
Paul Stephenson	108.37	A parent figure for a family of triangle number identities	512
K. B. Subramaniam, Amarnath Murthy	108.26	PWW: A property of triangular numbers	329
Nguyen Xuan Tho, Nguyen Quynh Tram	108.02	Fermat-like equations for fractional parts	120
Erik Vigren	108.28	π is a mean of 2 and 4	331

Teaching Notes

Nick Lord	The Devil's Advocate and the binomial expansion	161
Nick Lord	A cautionary tale about the pole of polar coordinates	162
Nick Lord	Another appearance of the golden ratio	163
Eduardo V. Teixeira, Katiuscia C. B. Teixeira	Betting games: higher-order thinking projects for calculus students	353
Nick Lord	Two quick direct proofs of the irrationality of tan 15°	356
Nick Lord	Infinite sums of reciprocal quadratics	358
Colin Foster	$\int_0^{\pi} \sin^2\theta\, d\theta$ from a shear-like transformation of a circle	541

Correspondence

March	Bill Richardson	Sir Michael Atiyah	166
	Chris Sangwin	A biography of Frank Budden	166

Feedback

Erik Vigren	On Note 108.28	542
