VERIFY WITH CONFIDENCE

HEALTHMARK'S CLEARLY
VISIBLE, OBJECTIVE TESTS OF
CLEANING METHODS

SCREEN WITH THE **NOW! TEST**

Rapid Indicator of Gram-Negative bacteria

Simply flush the lumen or swab the elevator mechanism of a flexible endoscope, such as a duodenoscope, and follow the procedure for gram-negative bacteria detection in less than 12 hours.

AUDIT WITH THE **FLEXIBLE ENDOSCOPE SAMPLING KIT**

For testing of duodenoscopes in compliance with FDA guidelines

After flushing and brushing the lumen and elevator mechanism of a duodenoscope, simply follow the procedure to have the sample solution & brush heads quickly sent to Nelson Laboratories, the leader in independent testing of flexible endoscopes.

MONITOR WITH **PROFORMANCE™ CLEANING VERIFICATION TOOLS**

Perform weekly testing of all assets of the cleaning process

Challenge the cleaning efficacy of the ultrasonic bath with SonoCheck™, the automated washer with TOSI®, pulse-flow lumen washers with LumCheck™, endoscope washers with FlexiCheck™ and more!

CONTENTS

Commentary

- 135** Whole-genome sequencing surveillance: Growing evidence for a future potential practice standard of infection prevention
Alexander J. Sundermann and Waleed Javaid

Original Articles

- 137** Active surveillance of carbapenemase-producing Enterobacterales using genomic sequencing for hospital-based infection control interventions
Andie S. Lee, Leanne Dolan, Frances Jenkins, Bernadette Crawford and Sebastiaan J. van Hal
- 144** The utility of whole-genome sequencing to inform epidemiologic investigations of SARS-CoV-2 clusters in acute-care hospitals
Theodore S. Rader, Vatsala R. Srinivasa, Marissa P. Griffith, Kady Waggle, Lora Pless, Ashley Chung, Suzanne Wagester, Lee H. Harrison and Graham M. Snyder
- 150** *Staphylococcus epidermidis* joint isolates: Whole-genome sequencing demonstrates evidence of hospital transmission and common antimicrobial resistance
Samantha J. Simon, Mohamad Sater, Ian Herriott, Miriam Huntley, Emma Briars and Brian L. Hollenbeck
- 157** Epidemiology and preventability of hospital-onset bacteremia and fungemia in 2 hospitals in India
Sumanth Gandra, Sanjeev K. Singh, Murali Chakravarthy, Merlin Moni, Pruthu Dhekane, Zubair Mohamed, Fathima Shameen, Anil K. Vasudevan, Priyadarshini Senthil, Tejaswini Saravanan, Anu George, Dorothy Sinclair, Dustin Stwalley, Jacaranda van Rheenen, Matthew Westercamp, Rachel M. Smith, Surbhi Leekha and David K. Warren
- 167** National validation of the Centers for Medicare & Medicaid Services strategy for identifying potential surgical-site infections following colon surgery and abdominal hysterectomy
Michael S. Calderwood, Ken Kleinman, Christina B. Bruce, Lauren Shimelman, Rebecca E. Kaganov, Richard Platt and Susan S. Huang
- 174** Diagnostic prediction models to identify patients at risk for healthcare-facility-onset *Clostridioides difficile*: A systematic review of methodology and reporting
William M. Patterson, Jesse Fajnzylber, Neil Nero, Adrian V. Hernandez and Abhishek Deshpande
- 182** Incidence and risk factors for recurrent *Clostridioides difficile* infection in pediatric at-risk groups in selected Pediatric Investigators Collaborative Network on Infections in Canada (PICNIC) hospitals
Lucila Baldassarre, Caroline Quach-Thanh, Verinsa Mouajou Feujio, Fazia Tadount, Claudia Deyirmendjian, Marie-Astrid Lefebvre, Nisha Thampi, Oliver Schneider, Isabela Fabri-Karam, Shauna O'Donnell, James Okeny-Owere, N. Audy and Nadia Desmarais
- 188** Contribution of active surveillance cultures to the control of hospital-acquired carbapenem-resistant *Acinetobacter baumannii* in an endemic hospital setting
Debby Ben-David, Yael Cohen, Gabrielle Levi, Alona Keren-Paz, Diana Tasher, Gisele Zandman-Goddard, Orna Schwartz and Yasmin Maor

- 196** Impact of the sequential implementation of a pharmacy-driven methicillin-resistant *Staphylococcus aureus* (MRSA) nasal-swab ordering policy and vancomycin 72-hour restriction protocol on standardized antibiotic administration ratio (SAAR) data for antibiotics used for resistant gram-positive infections
Natasha N. Pettit, Cynthia T. Nguyen, Alison K. Lew and Jennifer Pisano
- 201** Analysis of microbiological tests in patients withholding or withdrawing life-sustaining treatment at the end stage of life in 2 Korean hospitals
Sohyun Bae, Ki Tae Kwon, Soyeon Hwang, Yoonjung Kim, Hyun-Ha Chang, Shin-Woo Kim, Nan Young Lee, Yu Kyoung Kim and Je Chul Lee
- 207** The effect of a prospective intervention program with automated monitoring of hand hygiene performance in long-term and acute-care units at a Veterans Affairs medical center
W. Grant Starrett, James W. Arbogast, Albert E. Parker, Pamela T. Wagner, Susan E. Mahrer, Vanessa Christian, Barbara L. Lane, V. Lorraine Cheek, Gregory A. Robbins, John M. Boyce and Hari Polenakovic
- 215** Gender differences in psychosocial determinants of hand hygiene among physicians
Se Yoon Park, Jaewoong Kim, Eunjung Lee, Sunghye Park, Jung-Wan Park, Shi Nae Yu, Tark Kim, Min Hyok Jeon, Eun Ju Choo and Tae Hyong Kim
- 221** Comparison of virus aerosol concentrations across a face shield worn on a healthcare personnel during a simulated patient cough
Alessandra A. Pratt, Grant D. Brown, Eli N. Perencevich, Daniel J. Diekema and Matthew W. Nonnenmann

Concise Communication

- 227** Hygiene with wet wipes in bedridden patients to prevent catheter-associated urinary tract infection in cardiac surgery: A randomized controlled trial
Laia Castellà, Irma Casas, Montse Giménez, Dina Reina, Nieves Sopena, Maria-José García-Quesada and the Clinical Working Group
- 231** Antibiotic waste in a pediatric healthcare system: Wasting drugs that are in limited supply
Lucie K. Fan, Lydia Lu, Alfred J. Fernandez and Preeti Jaggi
- 234** How does the antimicrobial stewardship provider role affect prospective audit and feedback acceptance for restricted antibiotics in a Canadian tertiary-care center?
Keely M. Hammond, Dima Kabbani, Karen E. Doucette, Stephanie W. Smith, Cecilia Lau, Serena Bains, Karen Fong, Jackson Stewart and Justin Z. Chen
- 237** Assessing past versus present severe acute respiratory coronavirus virus 2 (SARS-CoV-2) infection: A survey of criteria for discontinuing precautions in asymptomatic patients testing positive on admission
Shruti K. Gohil, Annabelle De St. Maurice, Deborah S. Yokoe, Stuart H. Cohen, Francesca J. Torriani, Jonathan D. Grein, Philip A. Robinson, Shannon Mabalot, Jessica Park, Paula Pedrani, Richard Platt and Susan S. Huang
- 241** Low infectivity among asymptomatic patients with a positive severe acute respiratory coronavirus virus 2 (SARS-CoV-2) admission test at a tertiary care center, 2020–2022
Ralph Tayyar, Melanie A. Kiener, Jane W. Liang, Gustavo Contreras, Guillermo Rodriguez-Nava, Alex N. Zimmet, Caitlin A. Contag, Krithika Srinivasan, Karen McIntyre, Aruna Subramanian, John Shepard, Lucy S. Tompkins, Benjamin A. Pinsky and Jorge L. Salinas
- 244** Severe acute respiratory coronavirus virus 2 (SARS-CoV-2) RNA and viable virus contamination of hospital emergency department surfaces and association with patient coronavirus disease 2019 (COVID-19) status and aerosol-generating procedures
Scott C. Roberts, Elliana S. Barbell, Douglas Barber, Suzanne E. Dahlberg, Robert Heimer, Karen Jubanyik, Vivek Parwani, Melinda M. Pettigrew, Jason M. Tanner, Andrew Ulrich, Martina Wade, Anne L. Wyllie, Devyn Yolda-Carr, Richard A. Martinello and Windy D. Tanner

- 247** Healthcare-associated respiratory viral infections after discontinuing universal masking
Zachary M. Most, Bethany Phillips and Michael E. Sebert
- 250** Annual N95 respirator fit-testing: an unnecessary burden on healthcare
Thomas C. S. Martin, Genevieve Curtin, Natasha K. Martin and Francesca J. Torriani
- 253** Hand hygiene knowledge and practices of family caregivers in inpatient pediatrics
Stephanie Zahradnik, Anne Tsampalieros, James Okeny-Owere, Richard J. Webster, Pat Bedard, Gillian Seidman and Nisha Thampi
- 257** Evaluation of a mobile disinfection cabinet using ultraviolet-C light and aerosolized hydrogen peroxide for disinfection of medical equipment
Austin C. Bolomey, Jennifer L. Cadnum, Annette L. Jencson and Curtis J. Donskey
- 260** Validation of the STERIS Amsco 630LS steam sterilizer autoclave for inactivation of category a medical waste from patients with high-consequence infectious diseases
Jessica A. Tarabay, Jill S. Morgan, Colleen S. Kraft and Mary Elizabeth Sexton

Research Brief

- 263** Training opportunities in sterilization and disinfection of patient care items and devices in dental settings
Nabilaa Azimi, Mounica Soma, Sarah E. Stream, Muhammad Salman Ashraf, Charles F. Craft, Margaret A. Drake, Dan K. German, Nicolás Cortés-Penfield, Lacey L. Pavlovsky, L. Kate Tyner and Richard J. Hankins

Full details may be found at: www.cambridge.org/about-us/rights-permissions.

Subscriptions

The individual subscription prices for 2024 are: Print & Online: \$353; Online Only: \$284. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's homepage on Cambridge Core: cambridge.org/ICHE.

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: subscriptions_newyork@cambridge.org (USA, Canada, and Mexico) or journals@cambridge.org (outside of USA, Canada, and Mexico).

Postmaster: Send address changes to *Infection Control & Hospital Epidemiology*, Cambridge University Press, One Liberty Plaza, New York, NY 10006 USA.

About the cover:

Title: *In Our Hands*, 2023

Beginning with volume 43 (January 2022), the cover of *Infection Control & Hospital Epidemiology* (ICHE) will feature art inspired by or reflective of topics within the scope of the journal and their impact on patients, healthcare personnel and our society. These topics include healthcare-associated infections, antimicrobial resistance, and healthcare epidemiology. The intent is to feature original artwork that has been created by individuals who have a personal connection to one or more of these topics through their clinical work, research, or experience as a patient or an affected patient's family member, friend or advocate. The goal is to provide readers with a visual reminder of the human impact of the topics addressed in the journal and the importance of the work being done by those who read or contribute to ICHE and by all who are trying to make healthcare safer through the elimination of healthcare-associated infections.

For more information about the ICHE cover and how to submit artwork for consideration for a future cover, please visit the ICHE website: <https://www.cambridge.org/core/journals/infection-control-and-hospital-epidemiology/front-covers>

Artist: Michael Calderwood, MD, MPH

Medium: Acrylic paints on canvas

Dr. Calderwood spoke to ICHE about his artwork.

What was the inspiration for this artwork? Over the years, there have been many campaigns to improve hand hygiene in health care facilities (e.g., “Clean Hands Save Lives,” “My Health is in Your Hands,” “Speak up for Clean Hands”). During the past few years, though, the concept of the hand has taken on other meanings, as those in the healthcare community have lent a hand across a myriad of settings, have held the hand of patients, family, friends, and fellow healthcare workers who were suffering, and have stood hand-in-hand in facing the unknown, overcoming obstacles, and navigating the path forward. A hand held in an upward position, as shown in the painting, is also a means of saying “stop” or more specifically “prevent” as written on the palm. Whether it be in areas of HAI prevention, antimicrobial stewardship, outbreak investigation, diagnostic stewardship, or one of the many other topics covered within the pages of ICHE, the idea of prevention is one where safe and effective patient care is front and center in everything that we do. We are strongest when we work together toward a better future, recognizing that we each have something to teach, and we each have something to learn. As for the colors chosen in my art, many of our infection prevention strategies are targeted at infections involving blood, urine, wounds, stool, and water. You will see these each depicted, melding into a singular patina reminding us once again to wash our hands, as clean hands really do save lives.

What is your personnel connection to the content of ICHE? I am an active member of the Society for Healthcare Epidemiology of America (SHEA), having served on multiple committees, including the Publications Committee. I am both an author and a reviewer for ICHE. Recently, I was lead author on the 2022 update of the surgical site infection prevention section of the Compendium of Strategies to Prevent Healthcare-Associated Infections in Acute Care Hospitals. I have served in leadership roles in hospital epidemiology and antimicrobial stewardship, and I currently oversee both disciplines in my role as Chief Quality Officer at Dartmouth Hitchcock Medical Center.

Dr. Calderwood is the Chief Quality Officer for Dartmouth Hitchcock Medical Center in Lebanon, New Hampshire, USA. He is an Associate Professor of Medicine at the Geisel School of Medicine at Dartmouth and a staff physician in Infectious Disease & International Health.
