

# 2008 CAEP / ACMU Scientific Abstracts

## Keyword Index

<b>KEYWORD</b>	<b>ABSTRACT No.</b>				
		central venous catheter	62	electronic patient record (EPR)	5
		cerebral infarct volumes	66	EM curriculum	89, 94
		chart review	103, 106, 111, 120, 121, 128	emergency department information systems (EDIS)	5
	<b>A</b>	chest pain	128, 129	emergency medical services (EMS)	18, 107
access block	9	chest radiograph	27	environmental emergencies	81
access to care	99	chief complaint list	71	error reporting	102
acute coronary syndromes	27, 56	clerkships	35	extracorporeal assist device	107
acute decompensated heart failure	130	clinical competence	97		
acute exacerbations of chronic bronchitis	82	clinical decision rule	3		
acute ischemic stroke	66, 84, 124	clinical decision support system	122		
acute otitis media	110	clinical practice guideline	30, 92, 95, 110, 130	<b>F–G</b>	
acute respiratory disorder	52	clinical prediction guide	22, 25, 27, 31, 38, 43, 47, 52, 56, 79, 88, 108	fast track	65
administrative database	17, 71	clinical severity scores	22	fever	75
admission criteria	104	CME	73	first trimester emergencies	93
admission rates	78	colonization rates	60	focus group	37
admission thresholds	115	community-acquired MRSA	13, 60	functional outcome	50
advanced cardiac life support (ACLS)	112	competency assessment	72	gastrointestinal decontamination	121
advanced life support	29, 31	compliance	62	gender imbalances	84
alcohol ingestion	106	computerized tomography (CT)	123	geriatrics	14, 127
American Board of Emergency Medicine	36	computerized triage	11, 12, 57, 80	graduate medical education	94
American College of Emergency Physicians (ACEP)	92	continuing professional development	73, 97	graphical interface	122
angiography negative SAH	24	continuity of care	33, 126	guideline adherence	130
ankle radiography	43	COPD	82	gunshot wound	114
antibiotic resistance	13	COPD exacerbations	76		
appendicitis	125	crisis resource management	46	<b>H</b>	
Appraisal of Guidelines for Research and Evaluation (AGREE)	92	critical appraisal	36	head injury	95
asthma	20, 21, 86, 126	CTAS	57, 80, 85, 119	heart failure	91
atrial fibrillation	17, 19, 105	CT scanning	3	hemodynamics	32
		curriculum	45	hemothorax	120
	<b>B</b>			homelessness	89
bacteriology	82			hyperglycemia	50
basic life support	31				
bedside ultrasound	26, 28	<b>D</b>		<b>I–J</b>	
Bill 110	114	deep vein thrombosis (DVT)	88	imaging	125
bioterrorism	87	dexamethasone	1, 4	impedance cardiography	32
bronchiolitis	1, 47	diagnosis	91	implementation	2, 39
Broselow Tape	42	disaster plan	96	implementation barriers	28, 70
		distraction	41	implemenation research	95, 98
	<b>C</b>	door-to-balloon times	58	infection control	53, 62
CAEP	30	door-to-needle times	58, 111	influenza pandemic	96
CAEP research grants	10	drowning	81	injury	55
Canadian C-Spine Rule	2	drug interactions	113	injury prevention	81
CanMEDS	37, 73			intensive care unit (ICU)	16, 96
cardiac arrest	63			Internet	109
cardiopulmonary bypass	107	<b>E</b>		inter-institution transfer	116
cardiopulmonary resuscitation	29	economic disparities	20	interobserver agreement	49, 54, 80
cardioversion	17, 105	ED crowding	8, 9, 14, 15, 16, 21, 34, 64, 69	interrater agreement	11
care pathways	86	ED follow-up	33	interrater reliability	85
case-control study	15	ED targeted ultrasound (EDTU)	93	IV catheter insertion	41
CEDIS	71	educational instruments	59	jugular venous pressure	26
ceftriaxone	110	electronic control devices	61		
				<b>K–L</b>	
				knowledge translation	39, 76, 86
				language translation	74

left against medical advice	34	pediatric emergency department	69	socioeconomic status	20, 29
left without being seen	34	pediatric emergency medicine	7	spectrophotometry	48, 118
length of stay	19, 93, 124	pediatric head trauma	3	statins	23
Lifelong Self-Assessment	36	pediatric migraine	67, 68	stone size	123
long-term outcomes	39	pediatric resuscitation	42	stroke	50
low-impact pelvic fracture	127	pediatrics	48, 49, 53, 75, 83, 90, 106, 113, 126	subarachnoid hemorrhage (SAH)	23, 24, 118
Low-Risk Exam	43	percutaneous coronary intervention	18	survey	24, 25, 28, 44, 89, 90, 97
<b>M</b>					
malaria	103	performance indicators	51, 76	survey research	52, 59, 69, 72
Malleolar Zone Algorithm	38	personal protective equipment	53	survival analysis	116
mandatory reporting	114	physician productivity	6	syncope	78
medical error	122	physician workload	7	syndromic surveillance	87
medical records review	51, 68	postgraduate training	72	systematic review	4, 18, 40, 56, 63
medical students	112	practice variation	68, 115	<b>T</b>	
Medical Wilderness Adventure Race	131	prehospital	77, 88	TASER	61
memory based triage	57	prochlorperazine	67	team training	46
metered dose inhalers	70	prognosis	78, 127	Telehealth	87, 99
migraine	4	qualitative research	70, 100	termination of resuscitation	31
migraine relapse	4	quality improvement	65	thrombolysis	111
minor thoracic injury	104, 120	quality of care	5, 21	time-series analysis	6
morbidity and mortality	16	<b>R</b>			
moulage	131	radiation exposure	125	time to antibiotics	98
multiculturalism	74	randomized trial	8, 41	trainee assessment	37
<b>N</b>					
nebulized epinephrine	1	rapid-assessment pod	8	training	115
needs assessment	73	rapid assessment zone	65	transient ischemic attack	25, 51, 84
needs assessment survey	46	rate control	105	translation aid	74
negative SAH	24	renal colic	101, 117	trauma	116
nitroglycerin	77	renal ultrasound	108, 117	treatment failure	67
nonurgent users	99	reporting forms	102	triage	85, 119, 124
NT-ProBNP	91	research productivity	10	triage nurses	2
nurse practitioners	90	resource use modelling	12	tropical diseases	103
<b>O</b>					
observerships	45	resource utilization	64	troponin	66, 128, 129
off-service residents	94	respiratory emergencies	47	<b>U-Z</b>	
online quiz	109	resuscitation skills	112	ultrasound	59, 101, 123
Ottawa Aggressive Protocol	19	rib fractures	104	undergraduate curriculum	35
Ottawa Ankle Rule	38, 40, 44, 49	risk factors	55	undergraduate medical education	35
outpatient referral	33	root cause analysis	100	urinalysis	75
overcapacity protocol	9	Ruby on Rails	109	urologic intervention	108, 117
overdose	121	<b>S</b>			
overrides	54	San Francisco Syncope Rule	79	utility	101, 129
oxygen saturation	48	Saudi Arabia	119	validation	79
<b>P-Q</b>					
paediatric CTAS (PaedCTAS)	11, 12, 54	serum biomarkers	61	vaso-occlusive crises	83
patient safety	14, 15, 77, 100, 102	sepsis	30, 98	vasopressors	63
pediatric ankle injury	40, 44	shift-work	6	vasospasm	23
pediatric asthma	22	shock	26, 32	very elderly	64
		sickle cell disease	83	vitamins	113
		simulation	131	weight measurements	42
		skin and soft tissue infection (SSTI)	13, 60	wheelchair-related falls	55
				workflow analysis	7
				xanthochromia	118
				young investigators	10
