

Errata

Patricia M. Greenfield

Department of Psychology, University of California at Los Angeles, Los Angeles, CA 90024-1563

Due to a printer error, the wrong graph was printed on p. 578 of the Author's Response for "Language, Tools and Brain," by Patricia M. Greenfield, *BBS* (1991), 14(4):531-95. The correct graph is presented below. Note that, at 16 months, Strategy 2, the pot strategy, was dominant for five children, whereas Strategy 1, the pairing strategy, was dominant for three children.

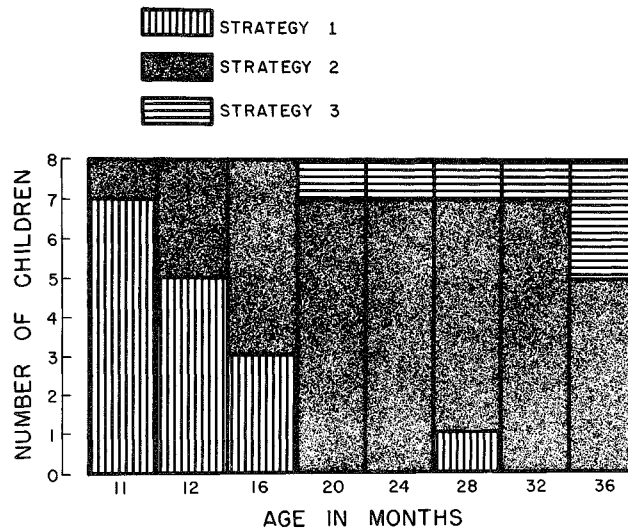

Figure R1. Frequency of dominant cup strategies at different ages (Greenfield et al. 1972).

Max Velmans

Department of Psychology, Goldsmiths' College, University of London, London SE14 6NW, England

On p. 662 of the target article "Is Human Information Processing Conscious," by Max Velmans, *BBS* (1991), 14(4):651-69, the phrase "electrical stimuli applied 500 msec later" (sect. 5.1, para. 3, 2nd sentence) should read "electrical stimuli applied 500 msec *earlier*."
