CONTENTS

PROGRAM.....	ii
PREFACE.....	iii
AUTHORS	iv
Taphonomic approaches to time resolution in fossil assemblages:	
Introduction, by Susan M. Kidwell and Anna K. Behrensmeier	1
Time-averaging and temporal resolution in Recent marine shelly faunas by Karl W. Flessa	9
Time and taphonomy: Actualistic evidence for time-averaging of benthic foraminiferal assemblages, by Ronald E. Martin	34
Time resolution in terrestrial macrofloras: Guidelines from modern accumulations, by Robyn J. Burnham.....	57
Constructing the past from late-Quaternary pollen data: Temporal resolution and a zoom lens space-time perspective, by Thompson Webb III	79
Processes of time-averaging in the terrestrial vertebrate record by Russell W. Graham	102
Models and simulations of time-averaging in terrestrial vertebrate accumulations, by Anna K. Behrensmeier and Ralph E. Chapman	125
Using numerical models to evaluate the consequences of time-averaging in marine fossil assemblages, by Arnold I. Miller and Hays Cummins.....	150
Mathematical models of temporal mixing in the fossil record by Alan H. Cutler	169
Models of time-averaging as a maturation process: How soon do sedimentary sections escape reworking?, by Peter M. Sadler.....	188
Time resolution and the study of Late Cretaceous and Early Tertiary megafloras, by Kirk R. Johnson	210
Systematic patterns of time-averaging in the terrestrial vertebrate record: A Cretaceous case study, by Raymond R. Rogers	228
Taphonomic approaches to time resolution in stratigraphy: Examples from Paleozoic marine mudrocks, by Carlton E. Brett and Gordon C. Baird...	250
Patterns of time-averaging in the shallow marine fossil record by Susan M. Kidwell	275
Summary: Estimates of Time-Averaging edited by Susan M. Kidwell and Anna K. Behrensmeier	301
