Bulletin of Entomological Research

Commonwealth Institute of Entomology

COMMONWEALTH INSTITUTE OF ENTOMOLOGY

Editor

J. M. B. HARLEY, B.Sc.

Headquarters, Publication Office and Library—56 Queen's Gate, London SW7 5JR, UK.
Telephone: 01-584-0067. Telegrams: ENTINFO LONDON SW7. Telex: 847964.

Identification Service—c/o British Museum (Natural History), Cromwell Road, London SW7 5BD, UK.

The Commonwealth Institute of Entomology is one of 10 Bureaux and 4 Institutes that together form the Commonwealth Agricultural Bureaux, an organisation sponsored by the Commonwealth governments for the dissemination of information on agricultural research.

The *Bulletin of Entomological Research* is a quarterly journal prepared by the Institute and published by the Commonwealth Agricultural Bureaux.

Annual Subscription Rate 1985

To subscribers in countries that are members of CAB	£60.00
To subscribers in countries that are not members of CAB	£80.00

Back Numbers

Back volumes of the *Bulletin of Entomological Research* are available and there are discounts up to a maximum of 20% on orders of more than 10 volumes.

Orders and enquiries concerning subscriptions and back numbers should be sent to

ACADEMIC PRESS

INTEGRATED MOSQUITO CONTROL METHODOLOGIES Volume 2

Biocontrol and Other Innovative Components, and Future Directions

Edited by **Marshall Laird and James W. Miles**

1985, 464pp., \$85.00/£65.50 (UK only), ISBN: 0.12.434002.4 Prices subject to change without notice

This book supplements the information given in **Volume 1** on the conventional methods of chemical control, with accounts of the ecological basis and economic aspects of bio-control. Special attention is given to innovative approaches such as the use of entomopathogenic bacteria. The other control methods discussed include the use of appropriate insect growth regulators, organo-phosphate and carbamate poisoning of adults, and ways in which communities can help to reduce the sources of favourable environments for mosquito reproduction.

CONTENTS (Section Headings): The Ecological Background. Conventional Biocontrol Using Predators. Innovative Approaches: Chemosterilization. Innovative Approaches: Insect Growth Regulators. Innovative Approaches: Biocontrol, Basic Investigations. Innovative Approaches: Biocontrol, Operational Research. Biocontrol By Bacteria. Biocontrol By Fungi. Economic Aspects. Large-scale Field Trials and Operational Control. Addendum. Glossary. Index.

Review of Applied Entomology

prepared by the Commonwealth Institute of Entomology

A monthly abstracting journal in two parts: *Series A (Agricultural)* covering the world literature on insects, mites and other arthropods harmful to cultivated plants of every kind including forest trees, and also beneficial arthropods; *Series B (Medical and Veterinary)* covering the world literature on insects, mites, ticks and other arthropods that transmit diseases to man or livestock or cause any other form of injury to them.

Annual subscriptions: Series A £115, Series B £70 in member countries of the Commonwealth Agricultural Bureaux and £155 and £90 in non-member countries.

Further details and free sample copies from: Central Sales, Commonwealth Agricultural Bureaux, Farnham House, Farnham Royal, Slough SL2 3BN, UK.

COMMONWEALTH INSTITUTE OF ENTOMOLOGY

Eighth International Course on Applied Taxonomy of Insects and Mites of Agricultural Importance 28th April – 13th June 1986

This course, lasting seven weeks, will be held at the Commonwealth Institute of Entomology at the address below. It aims to provide training in the taxonomy of insects and mites of agricultural importance with special reference to the identification of pest species and their natural enemies, and will highlight the role of taxonomy as a major input in modern agricultural technology. A large part of the training will be devoted to practical work and demonstrations to equip participants with a working knowledge that will enable them to act as first level identifiers.

Candidates should preferably have a degree in biology or agriculture and be employed in a plant protection or field-research-orientated department with some involvement in pest identification.

Twelve students can be admitted to this eighth course, for which there is a fee of £650 Sterling. Maintenance in England will be the responsibility of the participants.

A limited number of fellowships may be made available by the Commonwealth Fund for Technical Cooperation to suitable candidates officially nominated by governments of the developing countries of the Commonwealth. These fellowships cover travel, subsistence and course fees.

Closing date for receipt of applications 1 November 1985
