*Political Analysis* is an annual publication of the political methodology section of the American Political Science Association. It publishes scholarly articles related to all areas of political science methodology including formal modeling. Quantitative empirical and mathematical methods have become increasingly important in the field of political science. Yet recently no publication has served the substantial audience of political scientists who identify themselves as methodologists or methodology users. To fill this need, *Political Analysis* has been established as the vehicle to promote the development and dissemination of innovative scholarship in the field of methodology in political and social science. Areas to be covered include empirical methods, measurement, modeling, and other topics that further analytical research and its application in the social sciences. *Political Analysis* follows editorial procedures in general use in political science. All manuscripts are anonymously refereed by appropriate experts.

“I think the annual *Political Analysis* is just what political methodology needs at this time. . . . there is a definite need and audience for this periodical. . . . as it currently stands, only the most true believing, died-in-the-wool political science number crunchers have vehicles for keeping up with the methodological world and contributing to it.”

– Charles Stewart, III,  
Professor of Political Science,  
Massachusetts Institute of Technology

## Instructions to Contributors

*Political Analysis* publishes full-length articles on topics generally in the area of political methodology, including formal or positive models of political phenomena. The annual follows editorial procedures in general use in political science. All manuscripts are anonymously refereed by subject matter experts, often a mix of some editorial board members and some who are not. No manuscripts may be reviewed if concurrently under consideration elsewhere.

**Manuscript format and preparation:** Manuscripts to be considered for publication should be typed, double-spaced on one side of the paper. Of the four copies to be submitted, three should be free of any author identification on the cover and throughout the text of the manuscript. A brief abstract of the contents of the proposed article should be included in each. The journal uses as guide to matters of form and style the *Style Manual for Political Science*, a publication of the American Political Science Association's Committee on Publications. It is available from the association's office at 1527 New Hampshire Avenue, NW, Washington, D.C. 20036. Manuscripts for review are to be submitted to:
