## SENIOR EDITORS

Derek B. Booth  
Nicholas Lancaster  
Lewis A. Owen

## ASSOCIATE EDITORS

Lesleigh Anderson, Patrick J. Bartlein, Robert Booth, Louisa Bradtmiller, Aaron Diefendorf, John Dodson, Mary Edwards, Tyler Faith, Jaime Fucugauchi, Kathleen Johnson, Terri Lacourse, Pete Langdon, Thomas Lowell, Curtis W. Marean, Barbara Mauz, James O'Connor, W. Wyatt Oswald, Jeff Pigati, Yeong Bae Seong, James Shulmeister, Ashok K. Singhvi, Xiaoping Yang

## EDITORS EMERITI

A. Lincoln Washburn  
Estella B. Leopold  
Stephen C. Porter  
Eric J. Steig  
Alan R. Gillespie

## MANAGING EDITOR

Karin Perring

## Quaternary Research Center

Box 351360

Seattle, WA 98195-1360

## EDITORIAL BOARD

ZHISHENG AN  
Institute of Earth Environment, Chinese  
Academy of Sciences  
*Quaternary geology, monsoon and  
global change, dust and aerosols*

GAIL ASHLEY  
Rutgers University  
*Paleoenvironments, paleohydrology of springs,  
wetlands and rivers, geoarchaeology*

JULIE BRIGHAM-GRETTE  
University of Massachusetts  
*Stratigraphy, sedimentology, chronology  
of Arctic climate and sea level*

JOHN DODSON  
Institute of Earth Environments, Xi'an, China  
*Australia, Pacific Islands, China, vegetation  
history, human impacts*

YEHOUDA ENZEL  
Hebrew University of Jerusalem  
*Desert geomorphology, palaeohydrology of  
lakes and streams*

DAVID FINK  
Australian Nuclear Science and Technology  
Organisation  
*Cosmogenic dating*

SHERI FRITZ  
University of Nebraska–Lincoln  
*Paleoclimate, paleolimnology, diatom  
ecology of North and South America*

ALAN R. GILLESPIE  
University of Washington  
*Glacial geology, paleoclimate, megafloods,  
Central Asia*

LISA GRAUMLICH  
University of Washington  
*paleoclimatology, paleoecology,  
climate change, mountain ecosystems*

VANCE T. HOLLIDAY  
University of Arizona  
*Geoarchaeology, North American  
Archaeology, Peopling of the New World,  
Soils, Late Quaternary Stratigraphy*

RICHARD G. KLEIN  
Stanford University  
*Human origins, Quaternary paleontology*

MELANIE LENG  
British Geological Survey,  
University of Nottingham  
*Stable isotope geochemistry, climate and  
environmental change*

DANIEL R. MUHS  
U.S. Geological Survey  
*Quaternary sea level history, Eolian  
stratigraphy, soils North America, Pacific,  
Atlantic, and Caribbean Islands*

COLIN V. MURRAY-WALLACE  
University of Wollongong  
*Coastal evolution, neotectonism, geochronology,  
Quaternary sea-level changes*

JAY QUADE  
Department of Geosciences,  
University of Arizona  
*geochemistry, paleoclimatology,  
Quaternary geology*

MARIA SOCORRO LOZANO-GARCIA  
Universidad Nacional Autónoma de México  
*Tropical paleoecology, paleoclimatology,  
human impact on ecosystems*

CATHY L. WHITLOCK  
Montana State University  
*Paleoecology and vegetation history:  
North and South America*

YURENA YANES  
University of Cincinnati  
*Isotope geochemistry, paleoclimatology,  
Quaternary mollusks, taphonomy,  
paleoecology*

LIPING ZHOU  
Peking University  
*Land-sea correlation, loess, geochronology,  
geomorphology, Central Asia, East Asia*

*Cover photo.* Gold Creek Lake is located in the Mount Zirkel Wilderness north of Steamboat Springs, Colorado, USA. This and the five other study lakes in Parish et al. are located in a vital snow-accumulation region that the Western United States relies upon for year-round water availability. A fossil pollen-based winter precipitation reconstruction indicates that this region in northern Colorado experienced a large and persistent period of below-modern winter precipitation in the first millennium of the Common Era. Photo: Kristina Bartowitz (see the article by Parish et al., pages 1–13 this issue).
