NEWLY PUBLISHED STUDY:

**"ChloroPrep<sup>®</sup> is more effective than DuraPrep<sup>™</sup> and povidone-iodine at eliminating bacteria"<sup>1</sup>**

- *Journal of Bone and Joint Surgery*  
August 2009

In a newly published study in the *Journal of Bone and Joint Surgery*, ChloroPrep was proven to be the most effective way to prep for the shoulder region.<sup>1</sup>

- After treatment, ChloroPrep had an overall 7% positive culture rate, compared to 19% and 31% for DuraPrep<sup>™</sup> and povidone-iodine, respectively.
- ChloroPrep has again been proven superior to DuraPrep at reducing bacteria that can cause infection.<sup>2</sup>
- The 2% CHG formulation is now proven in 37 outcome studies and supported by 11 evidence-based guidelines.
