Nagoya Mathematical Journal is, in principle, the official organ of the Department of Mathematics, Nagoya University, designed solely for the publication of research papers. However, some invited papers and other original papers in mathematics from all over the world are also regularly published in Nagoya Mathematical Journal. Currently, 4 volumes are published each year.

All manuscripts should be typewritten in English, French, or German with sufficient space between lines, and special letters such as bold-face, German, Greek, and script should be clearly marked. All single letters used in formulas will appear in italic, and mathematical symbols will appear in the standard style usual for mathematical literature. Therefore, it is not required to mark such letters and symbols. Instructions which conflict with the general printing rules of the journal will not be accepted. For example, each paragraph title should appear in bold-face. Good reproductions of a typewritten manuscript are acceptable.

As soon as we receive a manuscript, a receipt will be sent to the author. When a manuscript has been sent to a referee, the author will receive another notice. These receipts and notices, however, do not mean anything regarding the acceptability of the paper for publication. If the editorial committee has decided to accept a paper, the author will receive a notice containing the number of the volume in which the paper will appear.

Each author, as well as each co-author, will have 100 reprints, while only one set of proof will be prepared per paper for proof-reading by the author(s). Therefore, a joint paper must carry instructions as to whom the proof should be sent. Attached to the proof, an order form will be sent to the author for the additional reprints which are available at approximately 3¢ per page.

The actual business of the Nagoya Mathematical Journal is performed by the managing editor with the cooperation of editors residing in Nagoya.

The manuscript and general correspondence should be addressed to: Managing editor, Nagoya Mathematical Journal, Department of Mathematics, Faculty of Science, Nagoya University, Chikusa-ku, Nagoya, 464, Japan.

CONTENTS

On classification of quasi-symmetric domains	I. SATAKE	1
On nilpotent factors of congruent ideal class groups of Galois extensions	Y. FURUTA	13
On certain abelian varieties obtained from new forms of weight 2 on $\Gamma_0(3^4)$ and $\Gamma_0(3^5)$	M. KOIKE	29
A generalized principal ideal theorem	D. EISENBUD and E. G. EVANS, JR.	41
Non-degenerate real hypersurfaces in complex manifolds admitting large groups of pseudo-conformal transformations. I	K. YAMAGUCHI	55
On boundaries of Schottky spaces	H. SATO	97
A correspondence between quaternary quadratic forms	P. PONOMAREV	125
Les pseudo-groupes intransitifs et le probleme d'equivalence	T. HIGA	141
