**J WOLPE**, Philadelphia, Pa.

**A J YATES**, Nedlands,

Western Australia

**W YULE**, London

BEHAVIOUR RESEARCH AND THERAPY was conceived in response to ever-growing interest in applying modern learning theories to the control of maladaptive behaviour and to the improvement of learning efficacy.

Contributions in BEHAVIOUR RESEARCH AND THERAPY stress equally the application of existing knowledge to psychiatric and social problems, experimental research into fundamental questions arising from attempts to relate learning theory and maladaptive behaviour, and high level theoretical efforts to lay more secure foundations for experimental and observational studies along these lines.

## A selection of papers from past issues

- Drugs employed in the treatment of alcoholism: rat data suggest they are unnecessarily severe.
- Predicting consensus about propositions concerning depression and antidepressive behaviour: another cognitive dimension of commonsense knowledge
- A controlled group study of pedestrian-skill training for the mentally retarded
- Effects of erotic stimuli on sexually functional and dysfunctional women: multiple measures before and after sex therapy
- Maintenance of improvement in agrophobic patients treated by behavioural methods — a four year follow-up
- Relief of phantom limb pain after EMG biofeedback — assisted relaxation: a case report
- Massed vs. space exposure sessions in the treatment of agrophobia
- Cognitive therapy and behavioural practice

# Appetite

THE JOURNAL FOR RESEARCH ON INTAKE AND  
DIETARY PRACTICES, THEIR CONTROL  
AND CONSEQUENCES

**Chief Editors: Judith Rodin, Gordon Morgenson, David Booth**

**Editorial Board: P. Bjorntorp, A.N. Epstein, S. Garattini, J.S. Garrow**

**A.E. Harper, D.J. McFarland, P.R. McHugh, G.E. Montgomery**

**S. Nicolaidis, D. Novin, R.M. Pangborn, E.T. Rolls, P. Rozin**

**F.J. Simoons, U. Ungerstedt, G.T. Wilson**

**Publication: Quarterly**

**Subscription: Volume 2, 1981**

**£27.50 (UK only) £34.40 (overseas)**

**\$ 81.00 (overseas)**

*Appetite* is the new interdisciplinary journal dedicated to research on intake and dietary practices in all their aspects:

*fundamental* – neural, systemic, physiological, biochemical, pharmacological

– sensory, psychological, ecological

– social, cultural and economic

*clinical*

– dietary health risks, weight control, obesity, anorexia nervosa,

malnutrition

*industrial*

– sensory evaluation, consumer research on foods and drinks, petfoods,

feed regulation in animal production

*zoological*

– conservation, pest control, applied ecology of diet and foraging.

The journal publishes reviews, mini-reviews, comments, reports of new investigations, abstracts, bibliographies, meeting reports, summaries of publications elsewhere, and announcements. This major publication, while not affiliated to any society, is intended for researchers in a wide range of disciplines including psychology, anthropology, zoology, pharmacology, physiology, psychiatry, medical research, nutrition, food science and applied social science.

## From Recent Issues

**S. Armstrong, Caroline Shahbaz and G. Singer:** Inclusion of meal-reversal in a behavior modification program for obesity.

**J. Slochower and S.P. Kaplan:** Anxiety, perceived control, and eating in obese and normal weight persons.

**Joyce Slochower, Sharon P. Kaplan and Lisa Mann:** The effects of life stress and weight on mood and eating.

**Lynne Spitzer, Janice Marcus and Judith Rodin:** Arousal-induced eating: a response to Robbins and Fray (commentary).

**P. Rozin and April Fallon:** The psychological categorization of foods and non-foods: a preliminary taxonomy of food rejections.

**F. Bellisle and J. Le Magnen:** The analysis of human feeding patterns: the edogram.

**R.M. Milstein:** Responsiveness in newborn infants of overweight and normal weight parents.

## Instructions to Authors

1. **Submission.** Articles, written in English and not submitted for publication elsewhere, may be sent to any one of the following editors: *Dr Ray Hodgson, Addiction Research Unit, Institute of Psychiatry, Denmark Hill, London SE5 8AF, U.K.*; *Dr William Yule, Psychology Department, Institute of Psychiatry, De Crespigny Park, London SE5 8AF, U.K.*; *Dr G. Terence Wilson, Graduate School of Applied and Professional Psychology, Rutgers University, Busch Campus, P.O. Box 819, Piscataway, New Jersey 08854, U.S.A.*

Manuscripts will be sent out for review exactly as submitted. Authors who want a blind review should mark two copies of their article "review copy" omitting from these copies details of authorship.

2. **Manuscript preparation.** Articles must be typed double-spaced throughout on standard sized paper (preferably A4) allowing good margins all round. Three copies must be submitted, and the author should retain a further copy. Original figures must be supplied at the time of submission.

*Abbreviations* where used must be standard. The *Système Internationale (SI)* should be used for all units; where metric units are used the SI equivalent must also be given. Probability values and power statistics should be given with statistic values and degrees of freedom [e.g.  $F(1,34) = 123.07, P < 0.001$ ], but such information should preferably be included in tables rather than the main text.

*Spelling* must be consistent within an article, either using British usage (*The Shorter Oxford English Dictionary*), or American usage (*Webster's New Collegiate Dictionary*). However, spelling in the list of references must be literal to each original publication.

Details of style not specified here may be determined by reference to the *Publication Manual of the American Psychological Association* or the *Style Manual for Biological Journals*.

Articles should conform to the following scheme:

(a) **Title page.** The title should phrase concisely the major issues. Author(s) to be given with departmental affiliations and addresses, grouped appropriately. A running head of no more than 40 characters should be indicated.

(b) **Summary.** This should summarize the article in no more than 200 words.

(c) **Text.** This should begin with an introduction, succinctly introducing the point of the paper to those interested in the general area of the journal. References within the text should be given in the form Jones and Smith (1973). Three or more authors should be given as Williams *et al.* (1973). Authors of the same surname should be distinguished by their initials. The approximate positions of tables and figures should be indicated in the text. Footnotes should be avoided where possible.

(d) **Reference note(s).** A list of all cited unpublished or limited circulation material, numbered in order of appearance in the text, giving as much information as possible about extant manuscripts.

(e) **References.** All citations in the text should be listed in strict alphabetical order according to surnames. Multiple references to the same author should be listed chronologically, using a, b, etc., for entries within the same year. Formats for journal articles, books and chapters should follow these examples:

BECKER, M. R. and GREEN, L. W. (1975). A family approach to compliance with medical treatment: A selective review of the literature. *International Journal of Health Education* 18, 173–182.

THORP, R. G. and WETZEL, R. J. (1969). *Behaviour Modification in the Natural Environment*, New York: Academic Press.

ROSKIES, E. and LAZARUS, R. S. (1980). Coping theory and the teaching of coping skills. In *Behavioural Medicine: Changing Health Lifestyles*, P. O. Davidson and S. M. Davidson (Eds), New York: Brunner/Mazel.

(f) **Footnotes.** The first, and preferably only, footnote will appear at the foot of the first page of each article, and subsequently may acknowledge previous unpublished presentation (e.g. dissertation, meeting paper), financial support, scholarly or technical assistance, or a change in affiliation. Its concluding (or only) paragraph must be the name and full mailing address of the author to whom reprint requests or other inquiries should be sent.

(g) **Tables.** Tables should be numbered and given explanatory titles.

(h) **Figure captions.** Numbered captions should be typed on a separate page.

(i) **Figures.** Original drawings or prints must be submitted for each line or half-tone illustration. Figures should be clearly labelled.

3. **Proofs, Reprints and Copyright.** Proofs of accepted articles will be sent to authors for the correction of printers' errors; author's alterations may be charged. Authors submitting a manuscript do so on the understanding that if it is accepted for publication exclusive copyright in the paper shall be assigned to the Society. In consideration of the assignment of copyright, 25 copies of each paper will be supplied. Further reprints may be ordered at extra cost; the copyright assignment form and the reprint order form will be sent with the proofs. The publishers will not put any limitation on the personal freedom of the author to use material contained in the paper in other works.
