

New in 1995

Volume 1, 6 Issues

A SYNTHESIS OF NEW IDEAS...
COMPLEXITY

— Edited by —

Harold Morowitz, Editor-in-Chief
George Mason University

John L. Casti, Executive Editor
Santa Fe Institute

Complexity is a new publication providing global coverage of all aspects of the science of complexity in a readable, topical and informative way. The journal will feature concise, up-to-date survey articles, tutorials, commentary, technical communications, book and software reviews, as well as refereed original research. **Complexity** will serve as a medium of communication for professionals and students of complex adaptive systems from the fields of physics, biology, chemistry, economics, anthropology, computer science and linguistics, as well as other traditional areas where complex adaptive behavior occurs.

Complexity will interrelate these fields by focusing on the development and application of common techniques, and promote discussion among scientists and engineers concerned with real world problems.

*We invite submission of papers to **Complexity**.*

USA

Earthquake Engineering and Structural Dynamics provides a forum for the publication of papers on all aspects of engineering related to earthquakes. The editors' policy is to maintain a reasonable balance between papers from research workers and from design engineers so that the Journal will be useful to both groups. The problems in this field and their solutions are international in character and require a knowledge of several traditional disciplines and the Journal reflects this.

The main subject of the Journal is earthquake engineering in all its varied aspects including seismicity, ground motion characteristics, soil amplification and failure, probabilistic and deterministic methods of dynamic analysis, experimental behaviour of structures, seismic code requirements and tsunamis. Methods for analysing the effects of earthquakes are applicable to the determination of the response of structures to other types of loading, for example, wind or wave loading. Thus papers on structural dynamics, which are concerned with other forms of dynamic loading but have relevance to earthquake engineering problems, are welcomed.

The publication has the endorsement and support of the President and Directors of the International Association for Earthquake Engineering.

ISSN: 0098 8847 Volume 24 (1995) 12 Issues Institutional \$1025.00/Personal \$940.00

USA

AIMS AND SCOPE

The Structural Design of Tall Buildings provides structural engineers and contractors with a detailed written presentation of innovative structural engineering and construction practices for tall buildings. It also presents applied research on new materials or analysis methods that can directly benefit structural engineers involved in the design of tall buildings. The editor's policy is to maintain a reasonable balance between papers from design engineers and from research workers so that the Journal will be useful to both groups. The problems in this field and their solutions are international in character and require a knowledge of several traditional disciplines and the Journal will reflect this. The main subject of the Journal is the structural design and construction of tall buildings. The basic definition of a tall building, in the context of the Journal audience, is a structure that is equal to or greater than 160 feet in height, or 6 stories, with special attention to buildings that exceed 50 stories in height in a basic geographic zone. The journal will present papers on new innovative structural systems, materials and methods of analysis.

Volume 4 (1995) 4 Issues Institutional \$225.00/Personal \$140.00

We would be happy to send you a complimentary copy of this journal so you can judge the benefits of a subscription for yourself. Simply write to either of the addresses given below:

JOHN WILEY & SONS LIMITED

WILEY JOURNAL AUTHOR PUBLISHING AGREEMENT

John Wiley & Sons, Ltd requires a grant of copyright from authors of articles contributed to our journals in order to effectively publish and distribute these journals worldwide. Therefore, we ask you to confirm your acceptance of the following terms by signing and returning this agreement to us:

1. The undersigned (individually or collectively the "Author") hereby assigns to John Wiley & Sons, Ltd (the "Publisher") for the full term of copyright, the sole and exclusive rights in the whole copyright in and to the article entitled _____

_____ (the "Article")
for initial publication in the journal entitled _____

_____ (the "Journal"). This grant of rights includes, but is not limited to, the rights to republish and use the Article and the material contained therein, throughout the world, in all languages and in all media of expression now known or later developed, and to license or permit others to do so.

2. The Publisher will not withhold permission for any reasonable request from the Author to use material from the Article in connection with any other work by the Author, except for inclusion of all or a substantial part of the Article in a competing publication, provided the material appears with an appropriate credit to the Publisher and to the Journal and with copyright notice as set forth in the Journal. Such permission must be obtained from the Publisher in writing and in advance.
3. If the Article was written by the Author in the course of employment, the employer shall sign this agreement in the space provided below.
4. Any proprietary rights other than copyright (e.g. patent rights) are retained by the Author or the employer, as applicable.
5. If the Author is a U.S. government employee *and* this Article was prepared as part of his/her official duties, the Article will constitute a "U.S. Government Work" not protected by copyright in the U.S., but protectable outside the U.S. In such case, this assignment applies only outside the U.S. (If applicable, please mark the appropriate box provided below.) *Note:* If at least one co-Author is *not* a government employee, it is not a U.S. Government Work and said co-Author should sign this agreement.
6. In case of work prepared under U.S. Government contract, if the contract so requires the U.S. Government may reproduce, royalty free, all or portions of the Article and may authorise others to do so, for official U.S. Government purposes only. (If applicable, please mark the appropriate box provided below and attach a copy of the relevant contract.)
7. The Author warrants that the Article is the Author's original work and has not been published before. If excerpts from copyrighted works or illustrations provided by others are included, the Author will obtain written permission from the copyright owners and show credit to the sources in the manuscript. The Author also warrants that he or she has the right to enter into this Agreement, the Article contains no libelous or unlawful statements, contains no instructions that may cause harm or injury, and does not violate the copyright or trademark, or infringe on the rights or the privacy of others; and that all statements in the Article asserted as fact are either true or are based upon reasonable research.
8. If the article was prepared jointly by more than one Author, the Author warrants that he or she has been authorised by all co-Authors to sign on their behalf.
9. If the Article is accepted, publication in the Journal is deemed to constitute consideration. In addition, the Publisher will furnish the Author with a number of free copies of the Article, in accordance with its current applicable policies. If the Article is rejected, this assignment is null and void.

AGREED:

(Author)

(Employer (if applicable))

Date _____

U.S. Government Employee

U.S. Government Contract attached

NOTES FOR CONTRIBUTORS

1. The original and two copies of a manuscript submitted for publication should be sent to the Editor, Sir Arnold Burgen, Department of Pharmacology, Tennis Court Road, Cambridge, CB2 1QJ, UK. The Author's full postal address, as well as telephone, telex and fax numbers where available, should appear on the manuscript.
2. The language of the Review is English and only original papers, not published elsewhere, will be accepted. The copyright must be assigned to the Publisher by filling in the Publishing Agreement form which will be sent to the prospective author.
3. Manuscripts are to be typed double-spaced, with wide top and side margins, on one side of the paper only. Authors are advised to keep one copy of their manuscript for reference. A summary of 100–150 words should be provided.
4. Accepted papers should be provided on disk if possible. Two identical disk copies of the final version of the paper should be accompanied by a hard copy. If the disk and the hard copy differ, the hard copy will be used as the definitive version. The disks must be labelled with a six letter acronym representing the journal title (3) and the author's name (3), for example, EURWAC. The label should also include the date, author's name, hardware and software used. Most software is acceptable but WordPerfect, Word or Tex are best.
If there is artwork provided on the disk, please include the source file as well as the encapsulated PostScript file. Name each file carefully using the same code as for the text, for example, EURWACF01. If you have any questions, please ring the Journal Production department of John Wiley & Sons, Ltd.
5. The title should be brief. It should appear on a separate sheet, with the Author's name typed on the line below the title.
6. The papers should be subdivided into sections and, if necessary, subsections. Authors should submit a brief autobiography of 75–100 words along with the paper.
7. Mathematical symbols may be hand-written or typed: Greek letters and unusual signs should be identified separately in the margin. Distinction should be made between letter O and zero; between letter I and number 1 and prime. All abbreviations should be preceded the first time they appear by the full name. Boldface, spacing, and italics for emphasis are to be avoided; the latter are to be used, though, for words taken over from other languages and not integrated in the language of the text.
8. Half-tone illustrations are to be restricted in number to the minimum necessary. Good glossy bromide prints should accompany the manuscript and should not be attached to manuscript pages.
9. Figures and tables are to be numbered consecutively and placed on separate sheets, with their place in the running text indicated therein. Original outline drawings (not photocopies) should be provided. Drawings should be of about twice the final size; the lettering must be clear and large enough for proportionate reduction. Figure legends should be typed on a separate sheet and placed at the end of the manuscript.
10. Footnotes are to be held to a minimum; parentheses in the text are to be preferred. Footnotes are not to be used for bibliographical references.
11. References to published literature should be quoted in the text by superior numbers and grouped together at the end of the paper in numerical order. Journal references should be arranged thus:
 1. F. Fukuyama, 'The End of History', *The National Interest*, **16**, 3–19 (1989).Book references should be as follows:
 2. J. Cadwell, *Theory of Fertility Decline*, Academic Press, London, 1982.For many articles submitted to the publication, it may be more useful to provide a short bibliography under the heading 'Further Reading'.
12. No manuscript or illustration will be returned following publication unless a request for return is made at the time when the manuscript is submitted.
13. Page proofs are sent to authors for the correction of printers' errors; alterations of the text will not be accepted. Corrected proofs should be returned to the Publisher within 48 hours of receipt.
14. Twenty-five offprints of the paper and one copy of the Journal issue in which it appears will be provided to the Author free of charge. Additional copies of the article and the Journal may be purchased from the Publisher on an offprint order form supplied with the proofs.
15. It is the Author's responsibility to obtain written permission to quote material which has appeared in another publication.

COPYING OF ARTICLES

The code and the copyright notice appearing at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The per-copy fee is to be paid through the Copyright Clearance Center Inc. and details of their authorization schemes can be obtained from them at 27 Congress Street, Salem, MA 01970, U.S.A. Tel: (508) 744-3350, Fax: (508) 745-9379. The consent does not extend to other kinds of copying such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Such permission requests, or other inquiries should be addressed to the publisher.
