

Book Reviews

countries in this respect came in for scarcely any comment. Readableness of what is before us owes a great deal to the editor who must have been carefully selective in curtailment of the commentaries and discussion. A knowledge of past and present performance in enforcement of laws, as here exemplified, will be of value to all concerned with therapeutics and in arriving at the goal uppermost in the minds of all the contributors—the better protection of the public in this aspect of renewed health.

LESLIE G. MATTHEWS
