

THE FORMATION OF THE CONTINENTS BY CONVECTION

By G. F. S. HILLS, B.A. Demy 8vo,
viii + 102 pages, illustrated. *Ready at the end*
of the year. 7s. 6d. net.

A new book for geologists and geographers, discussing why the continents—consisting of granite—lie in one hemisphere and occupy about one quarter of the earth's surface, and the ocean floor—probably a basaltic rock—occupies the remainder.

41 MADDOX STREET, LONDON, W.1

SECOND-HAND copies of January–February, March–April, May–June, July–August, 1946, and May–June, 1940, *Geological Magazines* urgently required.—STEPHEN AUSTIN & SONS, LTD., 1 FORE STREET, HERTFORD.

Notice to Authors

Articles submitted for publication in the *Geological Magazine* should be addressed to DR. R. H. RASTALL or to DR. O. M. B. BULMAN at THE SEDGWICK MUSEUM, CAMBRIDGE, not to the Publishers.

Manuscripts should be typewritten (double-spaced and preferably with a wide margin), and should be as concise as possible: *in no case should an article exceed 10,000 words*. References should be arranged in alphabetical order of authors' names, at the end of the article; the date of publication should follow the author's name, and the title of each paper should be given in addition to volume and page references. References in the text should be cited by the author's name, followed by the date in brackets.

Authors will receive twenty-five reprints free.

Subscriptions for 1948, inquiries relating to back stock, advertising, etc., should be sent to Stephen Austin & Sons, Ltd., Fore Street, Hertford, Herts.
